

Routine Immunization Schedules - 2016

Free routine vaccines are provided by Public Health and other health-care providers in Saskatchewan. By getting these vaccines “on-time” and “on schedule”, you and your child get the best protection against many serious and contagious preventable diseases.

Let's keep Saskatchewan's population healthy, safe and protected.

Routine Childhood Immunization Schedule	
Age/Grade	Vaccines
2 months	DTaP-IPV-Hib (Diphtheria, Tetanus, acellular Pertussis, inactivated Polio & <i>Haemophilus influenzae</i> type b) Pneumococcal conjugate 13 Rotavirus
4 months	DTaP-IPV-Hib (Diphtheria, Tetanus, acellular Pertussis, inactivated Polio & <i>Haemophilus influenzae</i> type b) Pneumococcal conjugate 13 Rotavirus
6 months	DTaP-IPV-Hib (Diphtheria, Tetanus, acellular Pertussis, inactivated Polio & <i>Haemophilus influenzae</i> type b)
12 months	MMRV (Measles, Mumps, Rubella, Varicella) Meningococcal conjugate C Pneumococcal conjugate 13
18 months	DTaP-IPV-Hib (Diphtheria, Tetanus, acellular Pertussis, inactivated Polio & <i>Haemophilus influenzae</i> type b) MMRV (Measles, Mumps, Rubella, Varicella)
4-6 years	DTaP-IPV (Diphtheria, Tetanus, acellular Pertussis, inactivated Polio)
Grade 6	Hepatitis B Meningococcal conjugate ACYW-135 HPV (Human Papillomavirus) (girls only) Varicella
Grade 8	Tdap (Tetanus, Diphtheria, acellular Pertussis)
6 months to 17 years	Influenza (every year)
Routine Adult Immunization Schedule	
Age	Vaccines
18 years and older	Influenza (every year) Td (Tetanus, Diphtheria) every 10 years. Tdap (Tetanus, Diphtheria, acellular Pertussis) should replace one of the Td doses. MMR (Measles, Mumps, Rubella) - 2 doses for those born since January 1, 1970. Polio – 3 doses for eligible adults. Varicella - 2 doses for eligible adults.
65 years and older	Pneumococcal polysaccharide 23 (one lifetime dose)
