Tester Script for a Negative Antigen Result

TESTER PLEASE NOTE: Script is in black, instructions for actions by the tester are italicized and in green

(Remember to speak slowly and clearly.)

I have your screening results for you

Your screening test for COVID-19 is negative

(Pause and listen and observe the reaction. Indicate that you have a few things to share with them.)

Please remember that:

- This test is only based on the moment in time when you were tested.
- It doesn’t tell us anything about the future – even just a couple of hours from now.

It is important to remain watchful for symptoms in yourself (self-monitor); and those you are in contact with.

If you develop any symptoms, it is important you stay home and call HealthLine 811 to arrange for a test.

Please consider downloading the FREE COVID alert app onto your cell phone.

The app is:

- A tool to know if you’ve been exposed to COVID-19 and
- Without revealing any personal information it lets others know that they may have been exposed as well
- The app is most effective if it’s downloaded before receiving a positive test result.
- The app can be found on the Apple App Store or Google Play.

There are other important and effective tools we can all use daily

- remember to wash your hands often,
- keep a safe physical distance from others,
- wear a mask when you are in public spaces
- and stay home if you are sick.

Thank you for doing your part to keep your community safe.

(If they have any questions that are specific to their health refer them to HealthLine 811. If they have questions related to COVID – 19 refer them to the Government of Saskatchewan COVID 19 website).
