

Humboldt District Health Centre Fact Sheet

7,458 square metres
Humboldt District Hospital - 34 inpatient beds
Humboldt Community Services

Services

The new building will accommodate services currently provided at St. Elizabeth's Hospital, and community health services currently provided at various locations.

Acute care: Ambulance services, emergency and ambulatory care, diagnostic imaging, laboratory, surgery, and palliative care.

Community health: Home care, public health nursing, community nutrition, health promotion, public health inspection, dental health education, and pharmacy support.

Therapies: Acquired brain injury care, mental health, speech language services, and addictions services.

Administration: Management, the hospital foundation, volunteer services and chapel.

Planning and Construction Process

The project is in the third and final phase of planning and construction: project delivery. Of the 18 steps in Saskatchewan Health's capital project process, it is at step 13, just prior to tendering the project.

Background

The Sisters of St. Elizabeth founded St. Elizabeth's hospital in 1911. In 1945, the province began to fund hospital services. The ownership was subsequently transferred to the Saskatchewan Catholic Health Corporation, and is expected to transfer to the Saskatoon Regional Health Authority in 2007.
