

SUSTAINABLE COMMUNITIES GRANT
GREEN AGRICULTURE
Project Funding Recipients

PROPONENT	PROJECT	PROJECT SUMMARY
Cornerstone REDA	Educating SK Youth	Work with 4H groups in southeastern Saskatchewan on green agriculture practices.
Connecting as Neighbours MJ	Community Gardens	Expand a community garden in Moose Jaw.
Last Cattle Frontier	Last Cattle Frontier	Promote cattle operations and associated benefits (maintenance of perennial forage, reduced flooding and water source protection) amongst four Regional Economic Development Areas.
First Nations University of Canada	Shared Garden	Create a sustainable community garden to demonstrate good agricultural practices; to promote cultural activities; and to showcase traditional knowledge.
Saskatchewan Forestry Centre	Hybrid Poplar Demonstration	Plant hybrid poplar trees to assess the value of the trees for the following uses: best economic fit for wood fibre; best fit for shelterbelt and riparian purposes; and fastest maturing to enhance carbon sequestration.
		Total Funding: \$134, 222

SUSTAINABLE COMMUNITIES GRANT
CLIMATE CHANGE
Project Funding Recipients

PROPONENT	PROJECT	PROJECT SUMMARY
Craik Sustainable Living Project	Sustainability Planning	Create a new five-year sustainability plan that may be used as a model for other communities.
City of Regina	Vehicle Idling	Develop a multifaceted vehicle idling awareness program, including: school presentations, public service announcements, an interactive website, signage at schools, idling free zones, and a Smart Driver training program offered to school bus drivers.
Saskatchewan Waste Reduction Council	Sustainable Composting	Explore the viability of large-scale composting programs by researching appropriate composting strategies for Saskatchewan's climate and creating five pilot projects in Saskatchewan.
Prairie Eco-Village Development Corporation	Eco-Village at River Landing	Create a resource-efficient Ecovillage at River Landing in Saskatoon to demonstrate greenhouse gas reduction, water conservation, and pedestrian friendly urban living.
Eco-Network	Green Building Product Database	Develop an online database of green building products and materials that offer ethical, health conscious, environmentally low-impact and cost-effective alternatives to current standards.
Regina Car Share Collaborative	Regina Car Share	Initiate a small scale and financially self-sustaining car sharing cooperative in downtown Regina.
University of Regina	Green Roof	Install a demonstration green roof on the Strathdee Building in Regina and measure the effects of installing this green roof.
		Total Funding \$134,287

SUSTAINABLE COMMUNITIES GRANT
ECOSYSTEM CONSERVATION
Project Funding Recipients

PROPONENT	PROJECT	PROJECT SUMMARY
Meewasin Valley Authority	Resource Management	Prepare a resource management plan and undertake restoration of 28 acres along the South Saskatchewan River within the Saskatoon City limit.
Partners for the Saskatchewan River Basin	State of the Basin Report	Develop a State of the Basin Report for the Saskatchewan River Basin in the Prairie Provinces.
		Total Funding: \$36,100

October 10, 2007

SUSTAINABLE COMMUNITIES GRANT
ECOTOURISM
Project Funding Recipients

PROPONENT	PROJECT	PROJECT SUMMARY
Town of Mossbank	Old Wives Lake Interpretive Area	Create an eco-tourism area that promotes preservation through education of this historically significant area.
Science Centre	My Home, Planet Earth	Host an exhibit called “My Home Planet Earth” which explores the connections between environmental health and human health in a manner that can be understood by children ages 5-12.
		Total Funding: \$82,742

October 10, 2007

SUSTAINABLE COMMUNITIES GRANT
SUSTAINABLE DEVELOPMENT AWARENESS
Project Funding Recipients

PROPONENT	PROJECT	PROJECT SUMMARY
Regina Folk Festival	Greening Project	Support a 'green' component to the Festival including audience surveys to examine what worked and lessons learned in order to encourage 'greener' public events in the future.
Prairie Conservation Action Plan	Prairie to Pavement	Develop a stewardship outreach program for grade 1 to 5 students in urban areas that shows how students can contribute to greening their urban communities and the prairie ecosystem as a whole.
Museums Association of Saskatchewan	Green Life: Learning to Live with the World	Develop a documentary that will explore how Saskatchewan people are changing the way they behave in an effort to live more environmentally conscious lifestyles.
TigerLily Education Inc.	Sustainability in Progress	Develop a citizen education program around Education for Sustainable Development for people in and around Prince Albert.
Regina Ecoliving Inc	Voices of Global Change Project	Support progress toward sustainability via ten public skills building workshops on environmental issues and an EcoFair.
Regina Farmer's Market Cooperative Association	Sustainable Shopping Bag Project	Educate the public on the choice to eliminate plastic from the waste stream and utilize compostable bags and cloth bags to replace the estimated 250,000 plastic bags that are used each year in the market.
University of Saskatchewan – Faculty of Education	Youth Forum 2007	Support high school students and teachers to develop sustainability action projects.
Saskatchewan Education for Sustainable Development Network	SESDN Action Framework	Establish a multi-sectoral working group to create a culture of ecologically sustainable development in Saskatchewan to network, communicate, establish collective goals and work on collective actions.

SUSTAINABLE COMMUNITIES GRANT
SUSTAINABLE DEVELOPMENT AWARENESS
Project Funding Recipients

PROPONENT	PROJECT	PROJECT SUMMARY
HELP International	Implementing Zero Waste Community Management in Saskatchewan	Implement zero waste community strategies in communities and schools in southeastern Saskatchewan.
UN Regional Centre of Expertise (RCE) on Education for Sustainable Development in Saskatchewan	Building New Partners, Opportunities and Capacity for regional Sustainability	Conduct research on sustainable development education, create networks of interested individuals around sustainability and host a United Nations RCE conference in Saskatchewan.
Saskatchewan Forestry Association	Kristy Lake Interpretive Nature Trail	Develop the Kristi Lake interpretive nature trail with educational stations interpreting unique environmental elements.
Nature Saskatchewan	Engaging Youth Through Climate Change Education	Create and deliver a presentation on the subject of climate change and the PlantWatch program that is appropriate for schoolchildren in grades 5 to 8.
		Total Funding: \$300, 250

**SUSTAINABLE COMMUNITIES GRANT
WATER CONSERVATION
Project Funding Recipients**

PROPONENT	PROJECT	PROJECT SUMMARY
Lower Souris Watershed Committee	Public Watershed Awareness Billboards	Educate residents in the area about the existence of the Watershed Committee and its objectives.
Assiniboine Watershed Stewardship Association	Signage and Awareness	Create awareness and understand public attitudes of people in the Assiniboine watershed.
North Saskatchewan River Watershed Advisory Committee	Capacity Building Strategy	Consult with municipalities, industry, First Nations to determine their needs and gain their involvement prior to implementation of its watershed plan.
Moose Jaw River Watershed Stewards	Water Supply Analysis Study	Undertake a Water Supply Analysis Study which involves: 1) Assessment of Water Supply Resources, 2) Water Quality Assessment, and 3) Identification of Current Surface and Groundwater Infrastructure.
South Saskatchewan River Watershed Stewards Inc.	Source Water Protection through Fisheries Mapping	Digitize fish and fish habitat information for public release in order to help protect fish habitat and encourage protection of source water.
HELP International	Implementing Water Protection Strategies	HELP International will support water protection strategies using field camps, municipal seminars, and publications
		Total Funding: \$141,250
