

## Background Information

# Redvers Long-term Care Replacement Project

This long-term care redevelopment project was announced in February 2009, as part of the renewal of 13 outdated long-term care homes in Saskatchewan. Provincial funding is provided under the government's Ready for Growth initiative.

When construction is complete, all services from the Centennial Haven wing will move to the two new, more home-like units.

*The addition (foreground) will be built adjacent to the existing Redvers Health Centre..*

### Long-term Care Addition

- 24 beds
- Two units of 12 beds each, with common kitchen and dining areas
- All private rooms
- Connected to Redvers Health Centre
- Modern amenities
- Adult day program
- Replaces 24-bed Centennial Haven wing, built in 1967

### Donations

The Redvers Health Foundation
