

New Regional Hospital Fact Sheet

Our new hospital will:

- Reflect the efforts of over 200 people that have been involved in its design. Not only have we included Doctors, Nurses, Therapists, Dietary Workers, Maintenance Workers, and Housekeepers, (to name a few) we've also included patients and their family members.
- Help us provide "the right care in the right place by the right provider".
- Use single patient standard rooms throughout the hospital that will allow healthcare professionals to provide better care for patients AND make the hospital much more efficient.
- Provide ample parking on our 30-acre lot.
- Meet our needs today and into the future!

Inpatient Rooms – 100% Single Patient Rooms	
<p><i>72 Beds in total:</i></p> <ul style="list-style-type: none"> - 4 Intensive Care Unit (ICU) Beds - 4 Labour/ Delivery/ Recovery/ Post-partum beds - 2 Post-Partum Beds - 62 Standard Inpatient Rooms 	<p><i>All Inpatient Rooms include:</i></p> <ul style="list-style-type: none"> - Outside window - Washroom - Dedicated family space with sleeping area
Treatment Rooms - 43 Standard, Single Rooms	

Flexibility

- 18 standard rooms designed to be easily adapted to provide more "ICU" care if needed
- 8 standard rooms built to a "Bariatric" standard – comfortably accommodate large patients
- Single patient standard rooms are not assigned to specific healthcare services and can easily be converted to meet different patients' needs. This design avoids the waste of beds.
- Department zones - allow department areas to take more patients into their areas by expanding into the neighboring zone as needed.

Accommodating Exterior

- 30-acre lot (compared to 6 acres at current facility)
- Double garage for EMS at ER entrance for unloading patients
- STARS heli-pad on-site
- Multiple entrances to accommodate different services

Easy Access

- Primary access will be off of Main St. on Diefenbaker Rd.
- Bus routes will be added to accommodate bus travelers
- Additional access via Hwy 1 East and off of Thatcher Dr. on Highland Rd.

Project Timeline

- *April 2013:* Construction Start
- *November 2013:* Building Close-up
- *December 2014:* Construction Completion
- *Summer 2015:* Move-in

Architectural rendering of the new hospital design
