

Background

Canada and Saskatchewan fund 75 projects to improve water and wastewater infrastructure in the province

Investment of more than \$94 million

Clean Water and Wastewater Fund (CWWF) and the New Building Canada Fund's Provincial-Territorial Infrastructure Component – National and Regional Projects (PTIC-NRP)

These 75 projects represent combined federal, provincial and local partner funding of more than \$94 million, with the Government of Canada contributing more than \$45 million, the Government of Saskatchewan providing nearly \$25 million and local partners covering the remaining costs. Funding for the 74 projects under the CWWF was made possible by the [signing of the bilateral agreement on September 16, 2016](#). These projects are in addition to the [10 CWWF projects announced on September 16, 2016](#) and the [26 projects announced on January 11, 2017](#).
