

# COP28

## Saskatchewan Companies and Third Parties

### Aboudheir Consulting

"De-carbonizing existing industry is an essential part of the solutions in reaching the goal of net-zero by 2050. At COP28, Aboudheir Consulting will be presenting to the world the feasible and implemented commercial solutions that will speed the transition to cleaner industries in the field of Carbon Capture Utilization and Storage."

Ahmed Aboudheir, Chief Executive Officer

---

### Agrocorp

"We recognize the pivotal role agriculture plays in addressing climate change. Pulses, being a climate-friendly crop, stand out as a beacon of hope in mitigating environmental impact, promoting biodiversity and soil health and is a nutrition powerhouse. Saskatchewan plays a vital role in global pulse production and is at the forefront of plant protein innovation. Agrocorp continues to increase our investment in Saskatchewan given these conducive factors. By increasing the production and consumption of pulses, we not only contribute to food security but also foster a more resilient and sustainable future. Our dedication to innovation and sustainable agriculture aligns with the global effort to combat climate change, and we look forward to collaborative discussions at COP28 to propel positive change."

Vijay Iyengar, Chairman and Managing Director

---

### Blackfox Distillery

"Attending the COP28 meetings is an opportunity to collaborate with visionary individuals, leveraging the occasion to enhance our own sustainability initiatives."

John Cote, Chief Operating Officer and Co-founder

## BrewNature

“Attending COP28 presents a unique opportunity to actively engage with and support the Saskatchewan and Canadian delegations. By fostering collaborations with the global climate action community, participants can forge valuable partnerships across member countries, private industries, NGOs, governments, the media, and civil society. This convergence provides a platform to collectively explore and devise effective measures and solutions in response to climate change impacts while working towards emission reduction goals.”

Babak Roshani, Chief Executive Officer and Founder

---

## Cameco

“Climate change is the most pressing issue of our time, one that requires a global response, and our province can be part of the solution. Saskatchewan’s world-class uranium resources are increasingly vital on the global stage as countries turn to safe, clean, secure nuclear power to meet their net-zero emission targets. Cameco’s vision is to energize a clean-air world – a goal that perfectly aligns with COP28. As the province’s largest uranium producer, our mission in Dubai is to emphasize the critical role nuclear energy, Cameco and Saskatchewan all play in addressing the climate crisis.”

Tim Gitzel, President and Chief Executive Officer

---

## Cenovus

“Cenovus and our peers in the Canadian oil and natural gas sector are taking meaningful action to address the emissions from our operations. Participating in the discussions at COP28 provides the opportunity for us to share advancements we’ve achieved and also gather ideas from business leaders, governments and researchers from around the world to help further progress our decarbonization efforts.”

Rhona DelFrari, Chief Sustainability Officer and Executive Vice-President of Stakeholder Engagement

---

## City of Regina

“I am honoured to join this delegation to represent, advocate for, and promote the City of Regina on a global stage. In participating in COP28, I plan to share Regina’s progress in transitioning to renewable energy, showcase our innovations in food production, exchange ideas on research and technology, and attract investment opportunities to our region.”

Sandra Masters, Mayor

## Economic Development Regina

"COP 28 provides a unique opportunity to exchange knowledge on climate-friendly production of commodities and energy. As the home to an emerging energy and renewables sector, Regina has a vital role to play in those discussions, and we look forward to sharing our story with the world."

Chris Lane, Chief Executive Officer

---

## Enbridge

"COP 28 presents an opportunity to be engaged in, and benefit from, global discussions on issues including climate change and energy security. It's an excellent forum for Enbridge to listen and learn from like-minded organizations and stakeholders, and engage in finding ways to reduce GHG emissions and advance the energy transition. Enbridge has attended in previous years and will be sending a small delegation to COP28. We're participating in various events, including panel discussions on the role of natural gas in supporting the energy transition and the importance of Indigenous equity partnerships."

Gina Sutherland, Sr. Advisor of Corporate Communications and Media Relations

---

## Foran Mining

"Foran is honoured to join the Government of Saskatchewan's COP28 delegation to showcase our McIlvenna Bay project and champion Saskatchewan as a world-class critical minerals mining district. Saskatchewan's rich geology and regulatory stability enables companies like Foran to build and operate responsible and sustainable assets that can provide generational benefits to our community partners as we help to build a global decarbonized society."

Dan Myerson, Executive Chairman and Chief Executive Officer

---

## Genesis Fertilizers

"Genesis Fertilizers proudly aligns with the Saskatchewan pavilion, at the forefront of Canadian agricultural innovation. At COP28, we boldly showcase our unwavering dedication to sustainable farming, forging partnerships that propel innovation. We aim to unequivocally illustrate how our approach mirrors global sustainability goals, empowering communities and nurturing a resilient, environmentally responsible agricultural landscape."

Rachel Hor, Chief Sustainability Officer

## Global Institute for Food Security

"COP28 provides one of the largest global platforms to discuss topics related to climate change, energy and agriculture, and I am excited at this opportunity for Saskatchewan to highlight some research and advancements we have made to enhance productivity and sustainable food security and to drive trade and exports. Agriculture is often thought of at the national level, but we also need to recognize regional differences and share Saskatchewan's sustainable farming practices which are some of the best in the world. We need to tell our own story – it is good for Saskatchewan, Canada, and the world."

Dr. Steven Webb, Chief Executive Officer

---

## Greenwave Innovations

"Greenwave is a leader in providing data-driven energy management solutions to our client base across Canada. At COP28, we look forward to sharing our client's success stories on how they are using our made-in-Saskatchewan technology to use energy more responsibly and reduce their carbon footprints. We intend to bring back a global perspective to our clients that desire to be more competitive in a low carbon economy."

Dean Clark, Chairman and Chief Executive Officer

---

## Hebert Grain Ventures

"Saskatchewan is a world leader in sustainability and Saskatchewan farmers are sequestering millions of tonnes of carbon each year through practices such as zero-till. Not only does the world need to know this, but we have a responsibility to share our story with other countries that need help in adopting more climate-positive practices."

Kristjan Hebert, President and Managing Partner

---

## Innocorps Research

"COP28 marks a pivotal moment when the world needs to come together to find sustainable solutions for our generation and the next. This conference also comes at a key moment for us after our recent success in unveiling Circular City to win the Department of National Defence's Innovation for Defence Excellence and Security Pop-up City Contest. We look forward to showcasing how thinking circularly about water, waste, and energy management can provide a practical approach to sustainability."

Aarya Shahsavar, Chief Executive Officer

## K+S

“The Bethune mine in Saskatchewan is a main part of K+S’s future growth plans. We look forward to continuing to work with the province to make a decisive contribution to sustainable world nutrition. We recognize the importance of decarbonization. This will take collaboration amongst all levels of government and the private sector in order to create a supportive regulatory framework. Events like COP28 bring together important stakeholders with the common goal to accelerate climate action.”

Markus Midden, Chief Sustainability Officer

---

## Mosaic Company

“We are pleased to join Premier Scott Moe and the Saskatchewan delegation at COP28 to tell the province’s potash sustainability story,” says Walt Precourt, Senior Vice President and Chief Administrative Officer for The Mosaic Company. “Mosaic has an ambitious target to reach net-zero company-wide by 2040 while pursuing our mission to help the world grow the food it needs. COP offers a global stage to learn and connect across industry, government, and communities.”

Walter Precourt, Senior Vice President and Chief Executive Officer

---

## NexGen

“In the years since the Paris Agreement, leading nations have increasingly viewed nuclear power as the linchpin to the energy transition and addressing the challenge of climate change. We are excited to join COP28 to discuss how NexGen is going to play a critical global role in this energy transition and how we are bringing in the next era of sustainable mining.”

Travis McPherson, Chief Commercial Officer

---

## Petroleum Technology Research Centre

“Petroleum Technology Research Centre is pleased to be in Saskatchewan’s COP28 contingent. The International Panel on Climate Change has indicated that CO2 reduction targets will not be reached without Carbon Capture and Storage and our Aquistore CO2 storage project is the world’s largest field site for testing new measurement and monitoring technologies. We look forward to sharing ten years of real-time CO2 storage expertise in the UAE and exploring new international business opportunities in the Middle East.”

Ranjith Narayanasamy, President and Chief Executive Officer

## Saskatchewan Chamber of Commerce

“The Saskatchewan Chamber stands ready to collaborate with global leaders at COP28. Our focus remains steadfast: advocating for pragmatic solutions that balance environmental responsibility with economic vitality.”

Prabha Ramaswamy, Chief Executive Officer

---

## Saskatchewan Polytechnic

“Conferences like this one attract the best and the brightest minds from across the globe. I’m looking forward to sharing the great work that Saskatchewan Polytechnic is contributing to sustainability with our applied research partners across Canada. At the same time, I’m looking forward to learning about innovations that are advancing sustainability globally.”

Dr. Larry Rosia, President and Chief Executive Officer

---

## Saskatchewan Research Council

“The Saskatchewan pavilion at COP28 provides the Saskatchewan Research Council with a unique opportunity to internationally showcase our leading-edge work around rare earth element processing and microreactor research. These two transformative projects, which are the first-of-their-kind in the world, align with the COP28 mission of ushering in a new era of sustainability and the transition to net-zero.”

Mike Crabtree, President and Chief Executive Officer

---

## Strathcona Resources

“Strathcona is pleased to participate in COP28 to promote the importance and the benefits of Western Canada’s vast hydrocarbon resources that can be part of the solution to the issues of global energy security and energy poverty. As Canadians, we have a strong history of technical innovation as we continue to reduce the carbon intensity and environmental impact of our operations. We look forward to sharing our passion for responsible resource development with the audience at COP28.”

Rob Morgan, President and Chief Executive Officer

## University of Regina

"We are excited to lead and participate in research and innovation events on an international stage that will have a positive impact for our province. This is an opportunity to further enhance our university and province's global profile and impact in areas such as climate change and the development of alternative, sustainable sources of energy. Together, with our partners, we can help build a more sustainable future for our province and indeed our world."

Dr. Jeff Keshen, President and Vice-Chancellor

---

## University of Saskatchewan

"At the University of Saskatchewan (USask), sustainability is more than a priority - it is one of the world's greatest challenges that our university community is dedicated to solving. USask educators and researchers are leading change that will reduce our carbon footprint and fight climate change. USask is leading discovery by developing new ways of learning and launching research initiatives that address the world's most pressing problems. Our leaders are attending COP28 to share our solutions, build international connections with other participants and join in action-based discussions that will create meaningful change for our world."

Peter Stoicheff, President and Vice-Chancellor

---

## Whitecap Resources

"We are looking forward to participating in a healthy conversation on practical and realistic energy transformation at COP28 that includes new renewable and other energy options along with oil and gas. Bringing a positive light to responsibly-produced Canadian energy while increasing communication on the environmental, economic benefits and challenges of Carbon Capture Utilization and Storage is important to provide a more complete understanding to the world."

Grant Fagerheim, President and Chief Executive Officer
