Regina, Saskatchewan
June 2014

*To Her Honour
The Honourable Vaughn Solomon Schofield
Lieutenant Governor of the Province of Saskatchewan*

Your Honour:

I have the honour to submit the Summary Financial Statements of the Government of the Province of Saskatchewan for the fiscal year ended March 31, 2014.

Respectfully submitted,

KEN KRAWETZ
*Deputy Premier
Minister of Finance*

Regina, Saskatchewan
June 2014

*The Honourable Ken Krawetz
Deputy Premier
Minister of Finance*

We have the honour of presenting the Summary Financial Statements of the Government of the Province of Saskatchewan for the fiscal year ended March 31, 2014.

Respectfully submitted,

CLARE ISMAN
Deputy Minister of Finance

TERRY PATON
Provincial Comptroller

Introduction to the Public Accounts

The 2013-14 Public Accounts of the Government of Saskatchewan (the Government) are prepared in accordance with the *Financial Administration Act, 1993* and consist of two volumes. The Government is responsible for the integrity and objectivity of the information presented in these two volumes.

Volume 1

Financial Statement Discussion and Analysis provides users of the Government's Summary Financial Statements (SFS) with an overview of the Government's performance by presenting comparative financial highlights and variance analysis. The information in the financial statement discussion and analysis should be read in conjunction with the SFS.

Summary Financial Statements provide an accounting of the full nature and extent of the financial affairs and resources of the Government. This includes the financial results of the General Revenue Fund (GRF), Crown corporations, boards and other organizations controlled by the Government. A listing of all organizations controlled by the Government, collectively referred to as the government reporting entity, is provided in schedule 17 of the SFS.

Volume 2

Volume 2 contains the following unaudited financial information:

General Revenue Fund

- reconciliation of GRF results to the SFS;
- revenue and expense schedules and details;
- capital asset acquisitions schedule and details;

Revolving Funds

- expense details;

Supplier Summary

- listing of suppliers who received \$50,000 or more for goods and services and capital assets supplied to the GRF and Revolving Funds during the fiscal year;

Other Information

- Growth and Financial Security Fund transfers and accumulated balance;
- Debt Retirement Fund accumulated balance;
- assets, liabilities and residual balances of pension plans and trust funds administered by the Government;
- remissions of taxes and fees; and
- road-use fuel tax accountability revenues and expenditures.

The Public Accounts are available on the Internet at <http://www.finance.gov.sk.ca/public-accounts/>.

A Compendium is also available on the Internet at <http://www.finance.gov.sk.ca/public-accounts/> that contains the financial statements of various government agencies, boards, commissions, pension plans, special purpose funds and institutions, as well as Crown corporations which are accountable to Treasury Board.

Financial Statement Discussion and Analysis

Financial Statement Discussion and Analysis

Financial Highlights

(millions of dollars)

	2014		2013 Actual	Change from	
	Budget ^{1 2}	Actual		Budget	2013 Actual
Revenue	14,179	14,418	14,323	239	95
Expense	14,030	13,829	14,285	(200)	(456)
Surplus	150	589	37	439	551
Financial assets		10,096	9,534		562
<i>Less:</i> Pension liabilities		(7,085)	(6,774)		(310)
Public debt		(4,927)	(4,949)		22
Other liabilities		(2,700)	(2,920)		221
Net debt		(4,615)	(5,109)		494
<i>Plus:</i> Non-financial assets		8,085	7,558		527
Accumulated Surplus		3,469	2,449		1,021

Totals may not add due to rounding.

¹ The Budget does not include a statement of financial position.

² Includes details of budgeted revenue and expense as presented in the 2014-15 Budget.

Reporting Entity

The Summary financial statements (SFS) include the financial activities of government service organizations (GSOs), government business enterprises (GBEs) and government partnerships. GBEs are self-sufficient government organizations that have the financial and operating authority to sell goods and services to individuals and organizations outside the government reporting entity as their principal activity. All other organizations, except government partnerships, are GSOs. A complete listing of the organizations included in the government reporting entity is provided in schedule 17 of the SFS.

Surplus

The 2013-14 SFS report a surplus of \$589 million, \$439 million greater than budget. These favourable results are largely attributable to the insurance sector where investment returns were greater-than-expected and agricultural claims were significantly lower-than-budgeted due to record crop production in 2013. This, together with a higher-than-expected gain on the Government's sale of a 69.0 per cent ownership interest in Information Services Corporation, more than offsets the lower-than-expected non-renewable resources and taxation revenues.

Compared to 2012-13, the SFS surplus is \$551 million higher due to a \$456 million decrease in expense together with a \$95 million increase in revenue.

Credit Rating

Saskatchewan continues to maintain a strong credit rating with all three major credit rating agencies. The Province's credit rating from Standard & Poor's is AAA, the highest level possible. The Province's credit rating reflects its solid financial position and is an independent confirmation of the strength of Saskatchewan's economy. This is particularly noteworthy during a period when many credit ratings are being downgraded worldwide.

Surplus/Deficit

Annual Surplus (Deficit) - 10 Year Trend

Accumulated Surplus

The accumulated surplus represents the Government's reported net economic resources. An accumulated surplus indicates that a government has net resources that can be used to provide future services.

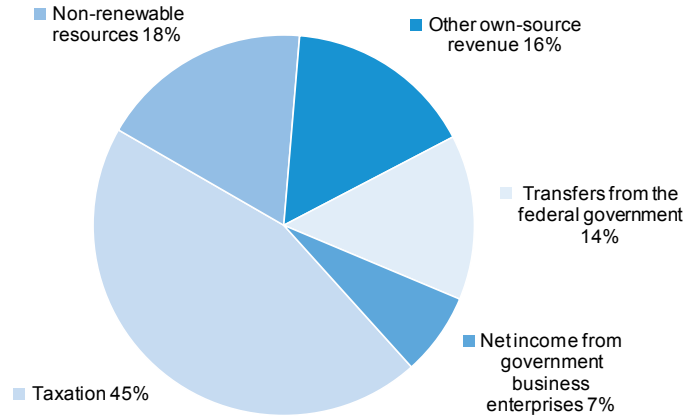

Accumulated Surplus (Deficit) - 10 Year Trend

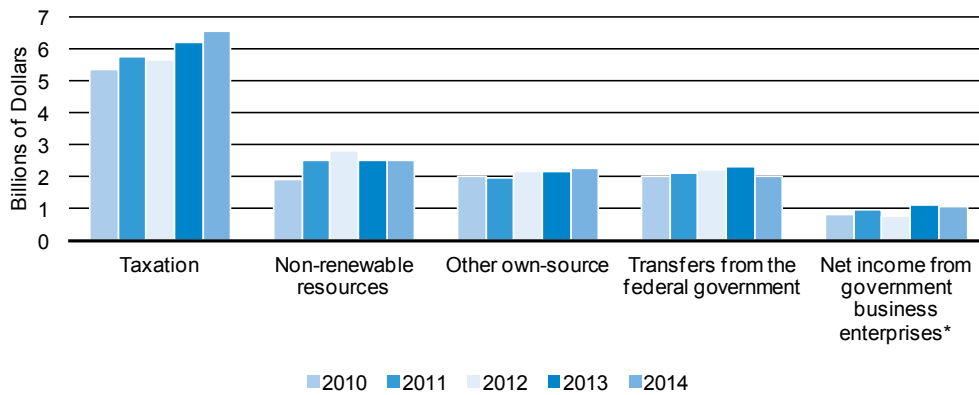

* Includes a \$1.58 billion increase for the first-time inclusion of the Boards of Education.

Revenue

2013-14 Revenue by Source (\$14.42 billion)

Revenue by Source - 5 Year Comparison

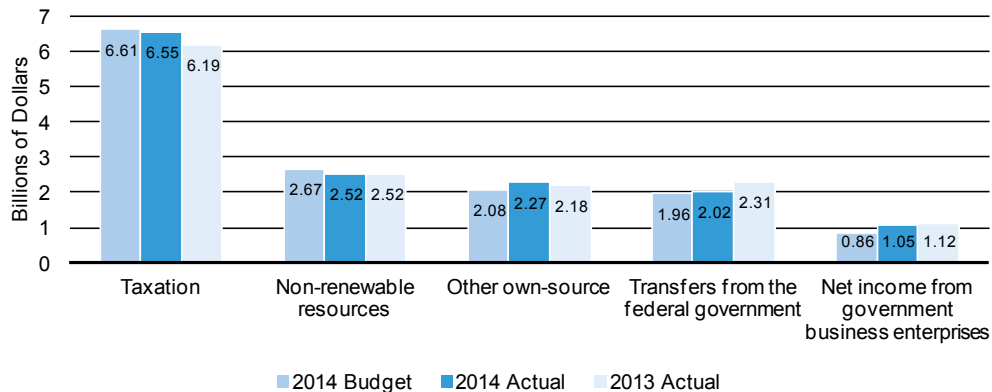

* Beginning in 2012, the financial statements of government business enterprises (GBEs) are prepared in accordance with International Financial Reporting Standards. Prior to this, the financial results of GBEs are presented on the basis of Canadian Generally Accepted Accounting Principles and have not been restated.

Revenue (continued)

Total revenue was \$14.42 billion in 2013-14, an increase of \$239 million, or 1.7 per cent, from budget. This increase from budget is largely due to higher-than-expected other own-source revenue, net income from government business enterprises and transfers from the federal government, partially offset by lower-than-expected non-renewable resources and taxation revenue. Compared to 2012-13, revenue increased \$95 million, or 0.7 per cent. The improvement over the previous year is mainly due to an increase in taxation and other own-source revenues, partially offset by a reduction in transfers from the federal government and net income from government business enterprises.

Revenue by Source - Current Year Comparison to Budget and Prior Year

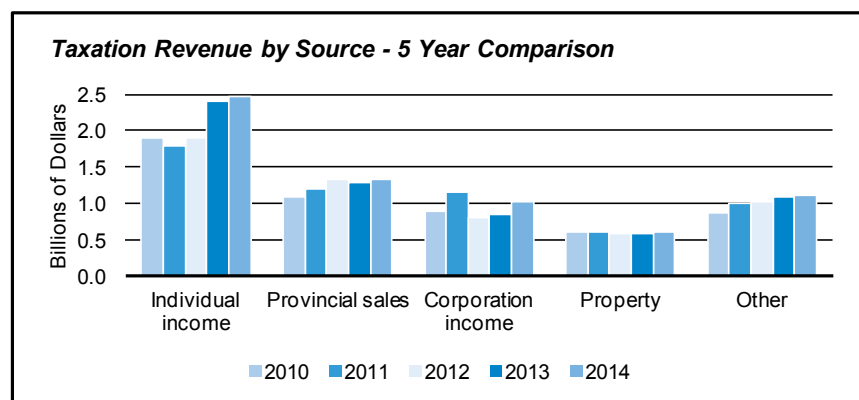

Taxation Revenue

Taxation revenue was \$6.55 billion in 2013-14, an increase of \$358 million over 2012-13 and a decrease of \$63 million compared to budget. An increase over the previous year was reported for all taxation sources, with the \$358 million increase largely attributable to higher Corporation Income Tax, Individual Income Tax and Provincial Sales Tax revenue. The decrease from budget is largely a result of lower-than-expected Provincial Sales Tax revenue, partially offset by higher-than-expected Corporation and Individual Income Tax revenue.

Individual Income Tax revenue was \$2.47 billion in 2013-14, \$64 million higher than in 2012-13, primarily due to growth in the taxable income base. This was partially offset by an increased cost of tax credits and a decline in the prior-year adjustment.

Provincial Sales Tax revenue was \$1.33 billion in 2013-14, an increase of \$42 million from the prior year, primarily due to growth in personal expenditures and business spending, reflecting continued growth in the Saskatchewan economy.

Corporation Income Tax revenue was \$1.02 billion in 2013-14, a \$179 million increase over 2012-13. This increase was primarily due to an increase in estimates of both the national tax base and Saskatchewan's share of the base. An improvement in the prior-year adjustment supplemented this increase.

Property tax revenue was \$605 million in 2013-14, \$19 million higher than reported in the prior year. This increase is due to the property tax base growing as a result of new construction in the Province.

Other tax revenue (including fuel, tobacco and other miscellaneous taxes) was a combined \$55 million higher than the prior year. A four cent increase per cigarette, tobacco stick and gram of cut tobacco, effective March, 2013, contributed to a \$23 million increase in tobacco taxes. The remaining increase is primarily a result of economic growth and a growing population.

Revenue (continued)

Non-Renewable Resources Revenue

Non-renewable resources revenue is one of the Government's most volatile revenue sources because it is largely susceptible to external factors, particularly changes in market demand and commodity prices.

In 2013-14, non-renewable resources revenue was \$2.52 billion, an increase of \$5 million over 2012-13 and a decrease of \$150 million compared to budget. Revenue derived from oil, Crown land sales and natural gas were all higher than in 2012-13, and partially offset by decreases in resource surcharge, potash and other non-renewable resources revenue. The decrease from budget is mainly attributable to lower-than-expected potash and resource surcharge revenues, partially offset by higher-than-expected oil revenue.

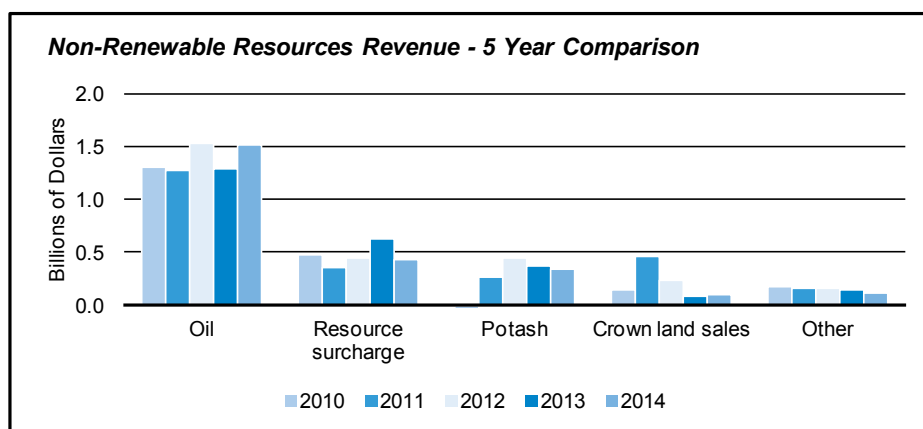

Oil revenue was \$1.51 billion in 2013-14. This is an increase of \$230 million over 2012-13, primarily due to higher West Texas Intermediate (WTI) oil prices, a lower average exchange rate and a lower light-heavy blend differential.

WTI oil prices averaged 99.04 U.S. dollars per barrel in 2013-14, an increase of 6.97 U.S. dollars per barrel over the 2012-13 WTI average oil price of 92.07 U.S. dollars per barrel.

The average exchange rate fell from 99.90 U.S. cents in 2012-13 to 94.97 U.S. cents in 2013-14.

The light-heavy blend differential averaged 19.81 U.S. dollars per barrel in 2013-14. In 2012-13, the light-heavy blend differential averaged 20.53 U.S. dollars per barrel.

Resource surcharge revenue was \$437 million in 2013-14, a decrease of \$191 million from 2012-13, primarily due to one-time revenue in 2012-13 resulting from the implementation of new federal rules and regulations which limit the deferral of income to future years through the use of partnerships. This resulted in a \$123 million year-over-year change. Lower values of resources sales, particularly potash, also contributed to the decline.

Potash revenue was \$346 million in 2013-14, an \$18 million decrease over the previous year. This reduction is primarily due to a decrease in the average mine netback (price). On a fiscal-year basis, the average mine netback (price) decreased from 428 U.S. dollars per KCl tonne in 2012-13 to 324 U.S. dollars per KCl tonne in 2013-14 (from \$702 to \$559 per K₂O tonne). Increased sales volume, from 8.6 million K₂O tonnes in 2012-13 to 9.8 million K₂O tonnes in 2013-14, partially offset the decrease in revenue related to lower prices.

Crown land sales revenue was \$107 million in 2013-14, \$18 million more than reported in 2012-13. This increase is primarily due to a higher average sale price per hectare, reflecting continued interest in southeast Saskatchewan.

Other non-renewable resources revenue (including natural gas) was \$118 million, a decrease of \$33 million over the prior year, primarily due to lower uranium royalties.

Other Own-Source Revenue

Other own-source revenue was \$2.27 billion in 2013-14, representing a \$93 million increase over the previous year and a \$193 million increase over budget. Both increases are largely due to the \$141 million gain on the Government's sale of a 69.0 per cent ownership interest in Information Services Corporation in July, 2013.

When compared to the prior year, increases were also reported in insurance own-source revenue and transfers from other governments. These increases were partially offset by lower own-source fees and investment income.

Revenue (continued)

Transfers from the Federal Government

Federal transfers were \$2.02 billion in 2013-14, a decrease of \$292 million from 2012-13 but an increase of \$67 million over budget. Compared to 2012-13, federal contributions for agricultural stability and housing subsidy are significantly lower but somewhat higher for crop insurance, Canada Health Transfer and Canada Social Transfer. The increase over budget is largely due to an increase in crop insurance contributions.

Agricultural stability contributions from the federal government are down \$177 million over the previous year, representing low program uptake due to the well-above-average yields and crop quality experienced by Saskatchewan producers for the 2013 crop year.

Housing subsidy revenue declined \$119 million when compared to 2012-13, primarily due to a change in accounting standard that resulted in a one-time increase in reported federal transfers.

Legislated increases in both the Canada Health Transfer and the Canada Social Transfer programs, together with an increase in Saskatchewan's share of the national population, resulted in increased funding compared to last year.

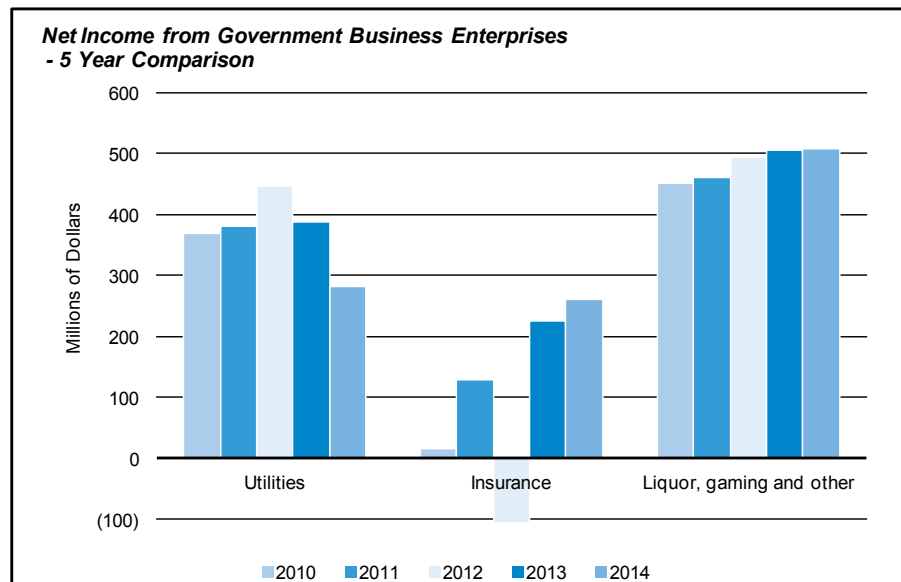

Net Income from Government Business Enterprises

Net income from government business enterprises was \$1.05 billion in 2013-14, a decrease of \$68 million from 2012-13 but an increase of \$191 million over budget. Compared to the prior year, the Government reported lower net income in utilities but more favourable results in insurance. The \$191 million improvement over budget was entirely due to better than expected results reported in insurance.

Utilities reported a combined net income of \$283 million, a \$105 million decrease over the previous year. This decrease is primarily attributed to unfavourable changes in unrealized market value adjustments mainly related to natural gas management activities. Utilities also saw increased depreciation and financing costs resulting from record capital investment over the past two years.

Insurance reported \$261 million in net income for the year. This result was a \$36 million improvement over the previous year mainly due to higher investment earnings consistent with strong global investment markets. While investment earnings rose in insurance, net underwriting results declined as increased insurance claims exceeded increased premiums collected.

Liquor, gaming and other contributed \$508 million towards the Government's bottom line, an improvement of \$2 million over 2012-13.

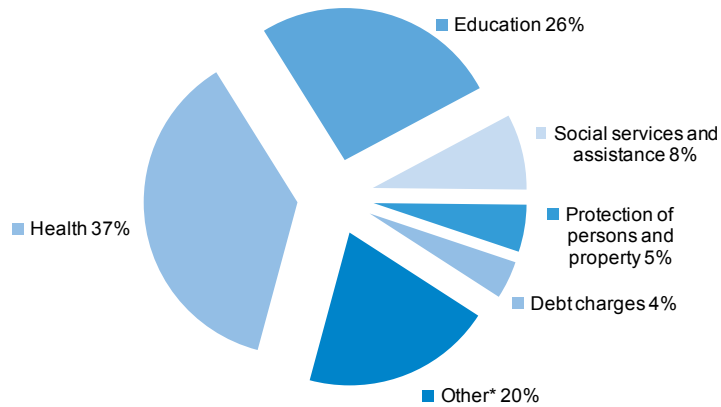

Expense

Expense is reported by theme in the Summary Statement of Operations. In addition to reporting expense by theme, the SFS also provide information on expense by object, or major type of expense.

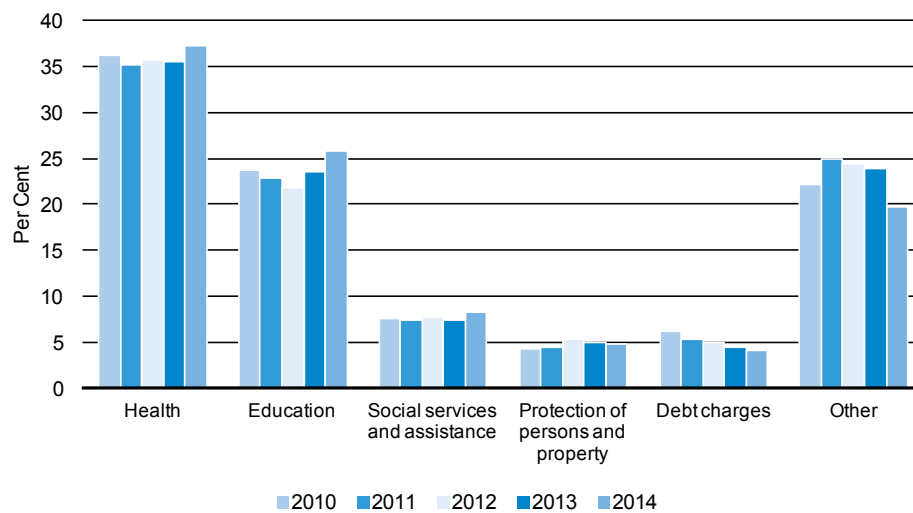

Expense by Theme

2013-14 Expense by Theme (\$13.83 billion)

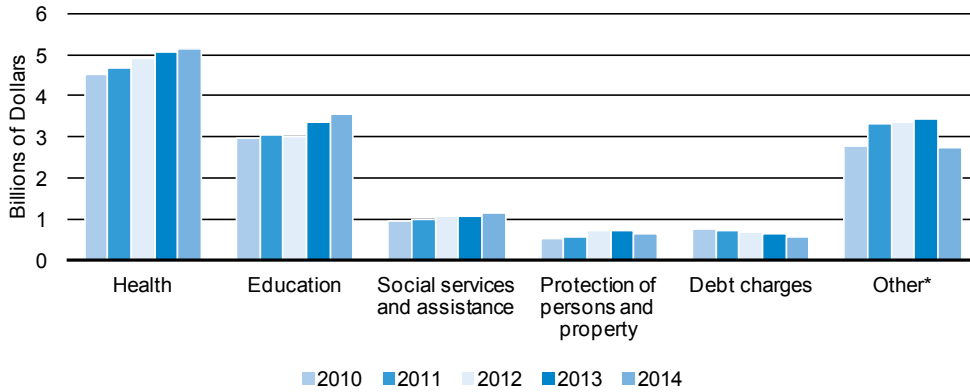

* Key components of "other" include community development (4%), transportation (4%), agriculture (4%) economic development (2%) and environment and natural resources (2%).

Expense by Theme as a Percentage of Total Expense - 5 Year Comparison

Expense (continued)

Expense by Theme - 5 Year Comparison

* In 2013-14, key components of "other" include community development (\$538 million), transportation (\$537 million), agriculture (\$520 million), economic development (\$344 million) and environment and natural resources (\$231 million).

Total expense was \$13.83 billion in 2013-14. This was \$456 million, or 3.2 per cent, lower than reported in the prior year and \$200 million, or 1.4 per cent, lower than budget. These decreases were predominantly experienced in agricultural spending. Key changes in expense reported by theme are explained below.

Agriculture expense was \$587 million, or 53.0 per cent, lower than the prior year and \$310 million, or 37.3 per cent, lower than budget. These decreases are primarily due to record crop production resulting in considerably lower claims made for AgriStability and Crop Insurance programs.

Debt charges decreased \$63 million, or 9.8 per cent, from 2012-13 and \$19 million, or 3.2 per cent, from budget. Lower interest rates on refinanced debt and lower in-year borrowing requirements contributed to the reduction in debt charges.

Economic development expense experienced a \$20 million, or 6.1 per cent, increase over the previous year and a \$21 million, or 6.6 per cent, increase over budget. An increase in the Research and Development Tax Credit contributed to the increase over both prior year and budget. In addition, higher funding for the provincial nuclear research and development strategy contributed to the increase from the prior year.

Education expense increased \$204 million, or 6.1 per cent, over 2012-13 and \$71 million, or 2.0 per cent, over budget. The increase over budget is primarily due to higher pension costs for the Teachers' Superannuation Plan (TSP), as a result of additional actuarial losses recognized during the year which were caused by a decline in the discount rate used to determine the pension liability. In addition to the higher cost for the TSP, increases over the prior year were also caused by higher post-secondary operating and capital funding for universities as well as increases in teachers' salaries. The increase in teachers' salaries was a result of increased staffing requirements as well as annual salary increments negotiated in the collective bargaining agreement signed during the 2011-12 school year.

Health expense was \$86 million, or 1.7 per cent, higher than the prior year but \$96 million, or 1.8 per cent, lower than budget. When compared to 2012-13, the increase in health costs was primarily due to the rising cost of health care compensation resulting from retroactive wage adjustments in newly negotiated collective bargaining agreements for health provider unions. In addition, there were increases in regional health authority operating costs, in funding for medical services provided by non-governmental agencies and in costs for the Saskatchewan Prescription Drug Plan, all due to pressures that an increasing and aging population put on the health care system. These year-over-year increases are partially offset by lower pension costs for the Saskatchewan Healthcare Employees' Pension Plan (SHEPP) which experienced favourable returns on plan assets. When compared to budget, the Government experienced lower-than-expected utilization of the Saskatchewan Prescription Drug Plan and physician services. In addition, higher-than-budgeted investment returns on the plan assets of SHEPP resulted in savings over budgeted amounts.

Protection of persons and property expense was \$63 million, or 8.7 per cent, lower than the prior year but \$59 million, or 9.7 per cent, higher than budget. The decrease over 2012-13 is primarily due to a year-over-year decrease in claims under the Provincial Disaster Assistance Program (PDAP) which had unusually high program uptake 2012-13 for the spring flooding in 2011-12. In addition, the Government's sale of a 69.0 per cent ownership interest in Information Services Corporation in July of 2013 resulted in the SFS reporting only a partial year of registry services costs.

Expense (continued)

These reductions were partially offset by higher operating costs in the correctional system and increased policing costs. The increase over budget is mainly due to higher-than-expected 2013 claims and increases to outstanding prior year claims under the PDAP as well as increased utilization of court and custody services.

Social services and assistance expense saw an increase of \$70 million, or 6.6 per cent, over 2012-13 and \$23 million, or 2.0 per cent, over budget. These increases were primarily due to a higher caseload in the Saskatchewan Assured Income for Disability program, pressures in child and family services and increased emergency social services costs, partially offset by savings experienced in capital transfers for housing programs.

Expense by Object

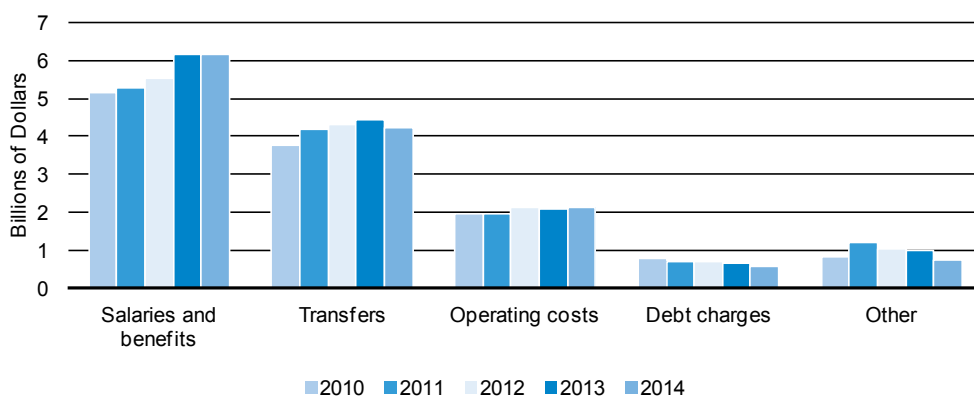

2013-14 Expense by Object (\$13.83 billion)

* Supports third party salary, capital and other costs.

** The key component of "other" is amortization of tangible capital assets.

Expense by Object - 5 Year Comparison

Public Debt and Debt Charges

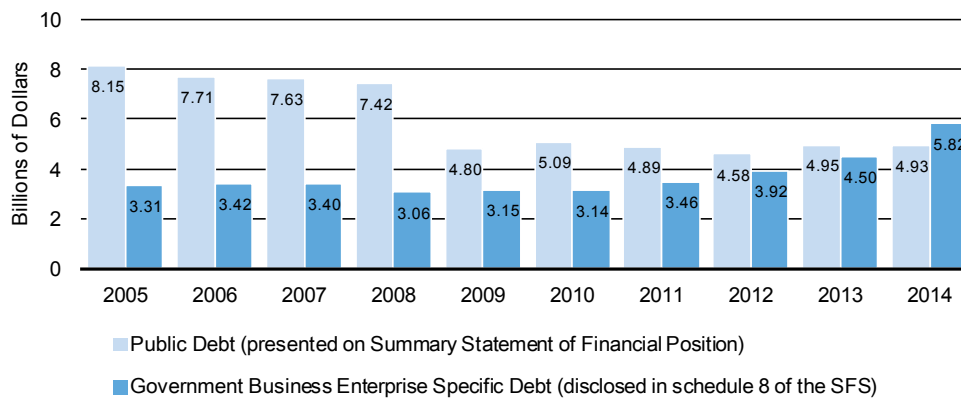

Public Debt

Public debt consists of gross debt net of sinking funds and includes:

- general debt, which is:
 - debt issued by the General Revenue Fund (GRF) and other government service organizations (GSOs); and
 - debt issued by the GRF and subsequently loaned to government business enterprises (GBEs); and
- GBE specific debt, which is debt issued by GBEs or debt issued by the GRF specifically on behalf of GBEs where the Government expects to realize the receivables from the GBEs and settle the external debt simultaneously.

Public debt on the Summary Statement of Financial Position represents general debt and does not include GBE specific debt. GBE specific debt is disclosed in schedule 8 of the SFS.

Public Debt - 10 Year Trend

At March 31, 2014, the SFS report public debt of \$4.93 billion. Since 2004-05, public debt has declined \$3.22 billion, from \$8.15 billion to \$4.93 billion.

At March 31, 2014, GBEs specific debt was \$5.82 billion. GBE specific debt is included in the investment in (or net assets of) GBEs reported on the Summary Statement of Financial Position and disclosed in schedule 3 of the SFS. Since 2004-05, GBE specific debt has increased from \$3.31 billion to \$5.82 billion. This increase has helped to finance the replacement of aging infrastructure as well as the building of new capacity to meet the demands of the recent population growth in the Province.

Public Debt and Debt Charges *(continued)*

Debt Charges

The Government incurs interest and other costs to service its public debt. The amount of these costs is determined by the amount of general public debt and the interest rate attached to that debt. The average effective interest rate on gross debt during 2013-14 was 5.2 per cent (2012-13 - 5.6 per cent).

Debt Charges - 10 Year Trend

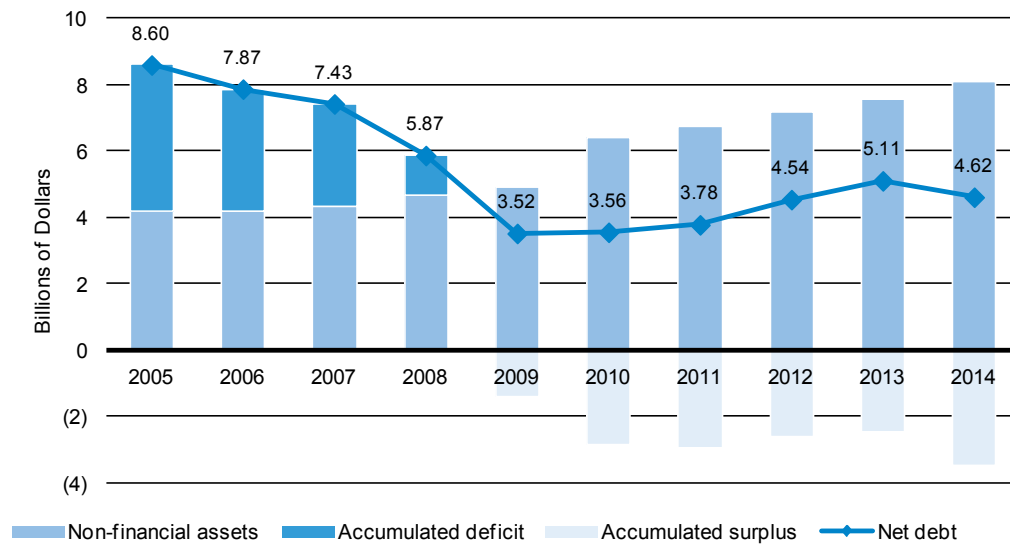

Since 2004-05, both the amount of general public debt and the level of interest rates have declined. As a result, the debt charges reported in the SFS have decreased from \$905 million in 2004-05 to \$580 million in 2013-14.

Net Debt

Net debt represents the future revenue that is required to pay for past transactions and events. It is the difference between the SFS liabilities and financial assets.

During 2013-14, net debt decreased by \$494 million.

Net Debt - 10 Year Trend

Since 2008-09, the SFS have reported an accumulated surplus. Accumulated surplus reduces net debt.

Net debt of the SFS is:

- net debt from the acquisition of non-financial assets, primarily representing the Government's investment in educational and health care facilities and highways; net of
- the accumulated surplus, representing the extent to which past revenues have exceeded past expenses.

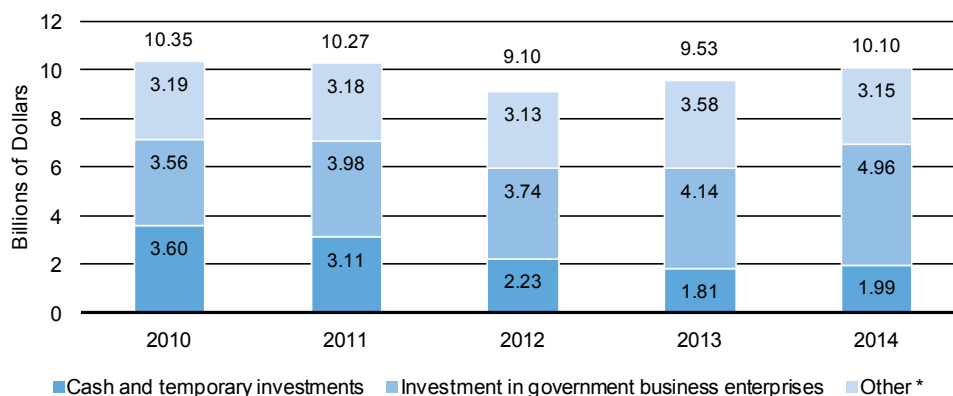

Since 2004-05, the net debt of the SFS has declined by \$3.98 billion from \$8.60 billion to \$4.62 billion. Lower levels of net debt indicate increased flexibility over future spending.

In addition, the portion of net debt representing non-financial assets has increased significantly. The Government's net debt is primarily related to its investment in tangible capital assets.

Financial Assets

Financial assets represent the amount of resources available to the Government that can be converted to cash to meet obligations or fund operations.

Financial Assets - 5 Year Trend

* In 2013-14, primarily accounts receivable (\$1.58 billion), other investments (\$0.83 billion) and loans receivable (\$0.73 billion).

Liabilities

Liabilities represent the obligations the Government has to others arising from past transactions or events.

Liabilities - 5 Year Trend

* In 2013-14, primarily accounts payable (\$2.16 billion).

From 2009-10 to 2013-14, liabilities increased by \$797 million. This is primarily a result of a \$1.21 billion increase in pension liabilities net of a \$162 million decrease in public debt. Information relating to public debt can be found in more detail in the public debt and debt charges section found on page 16.

The total pension liability has increased from \$5.87 billion in 2009-10 to \$7.08 billion in 2013-14. The increase is due to the amount by which pension costs, including interest on the pension liabilities and amortization of actuarial losses, exceed payments to the pension plans and retirees.

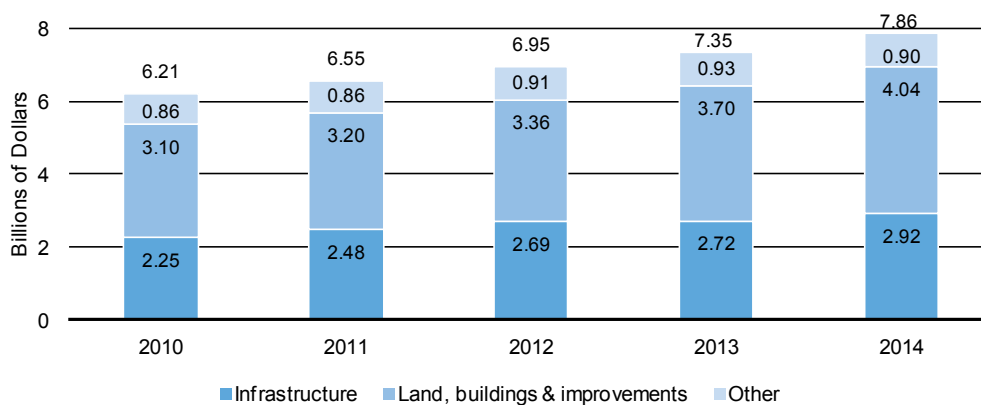

Non-financial Assets

Non-financial assets typically represent resources that the Government can use to provide services in the future. Non-financial assets primarily consist of tangible capital assets but also include inventories held for consumption and prepaid expenses.

Tangible Capital Assets

The Statement of Financial Position reports the net book value of tangible capital assets held by government service organizations (GSOs) and does not include the capital assets held by government business enterprises (GBEs). Capital assets held by GBEs total \$11.22 billion at March 31, 2014 and are included in the investment in (or net assets of) GBEs reported on the Statement of Financial Position and disclosed in schedule 3 of the SFS. The net book value of capital assets of GSOs in the past five years is as follows:

Net Book Value of Tangible Capital Assets - 5 Year Trend

The net book value represents the original cost of tangible capital assets net of accumulated amortization and write-downs in value. The net book value of tangible capital assets held by the Government has steadily increased over the last five years illustrating how the Government is acquiring new or replacing existing tangible capital assets faster than these same assets are wearing out or becoming obsolete.

Acquisition of tangible capital assets in 2013-14 was \$1.07 billion. These capital additions were primarily in the education, transportation and health sectors mainly for land, buildings and improvements (\$537 million), infrastructure (\$335 million) and office and information technology (\$107 million).

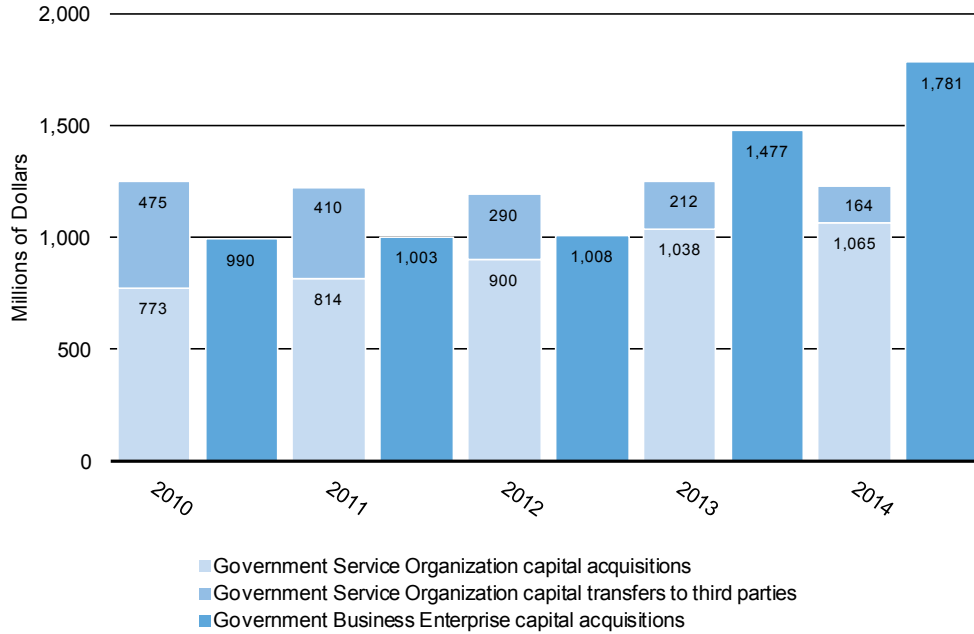

Investment in Infrastructure

The Government invests in infrastructure in two ways:

- by investing in government-owned capital; and
- by providing transfers to third parties, including municipalities and universities, for capital purposes.

During 2013-14, the Government invested \$3.01 billion in infrastructure: \$1.78 billion for government business enterprises (GBEs) to maintain existing and build new infrastructure; and \$1.23 billion to meet the capital requirements of government service organizations (GSOs).

Investment in Infrastructure - 5 Year Trend

The Government's capital acquisitions totaled \$2.85 billion in 2013-14, \$1.78 billion acquired by GBEs and \$1.07 billion acquired by GSOs. Capital assets held by GBEs are included in the investment in (or net assets of) GBEs reported on in the Summary Statement of Financial Position and disclosed in schedule 3 of the SFS.

In addition to capital acquisitions, in 2013-14, the Government provided \$164 million in capital transfers to third parties.

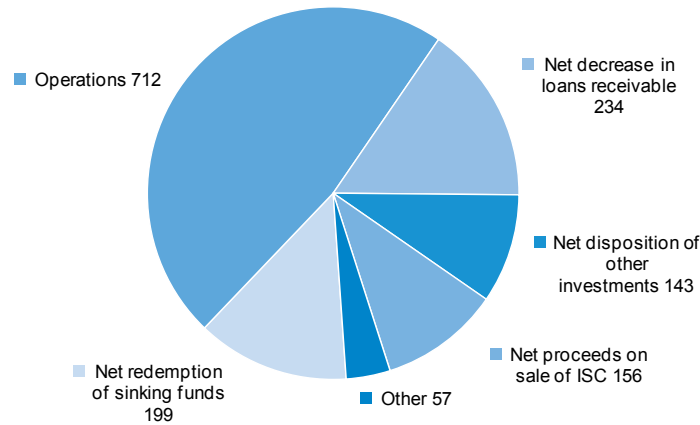

Cash Flow

The Summary Statement of Cash Flow reports on the sources and uses of cash and temporary investments during the year. During the year, the Government's overall cash position increased by \$172 million, from \$1.81 billion in 2012-13 to \$1.99 billion in 2013-14.

2013-14 Sources and Uses of Cash

(millions of dollars)

Sources of Cash (1,500)

Uses of Cash (1,328)

The primary source of cash was operations, generating \$712 million in cash. Other sources of cash include a \$234 million net reduction in loans receivable, primarily in loans receivable from GBEs, a \$199 million net redemption in sinking funds, net proceeds of \$156 million on the Government's sale of a 69.0 per cent ownership interest in Information Services Corporation (ISC) and a \$143 million net disposition of other investments, mainly bonds and debentures held by the Government. Cash was mainly used for a \$1,065 million investment in tangible capital assets, representing the Government's continued commitment to invest in the Province's infrastructure, as well as in education and health care facilities. In addition, cash was also used for a net repayment of public debt of \$179 million.

Credit Rating

The improvement in the Government's finances over the past several years has led to a series of upgrades in its credit ratings. One of the world's leading credit rating agencies is Standard & Poor's.

Standard & Poor's Credit Rating from 2004-05 to 2013-14

The credit ratings for all jurisdictions as at March 31, 2014, are shown below.

Credit Ratings - March 2014

Jurisdiction	Rating Agency ¹		
	Moody's Investors Service Inc.	Standard & Poor's	Dominion Bond Rating Service
Alberta	Aaa	AAA	AAA
British Columbia	Aaa (neg)	AAA	AA(high)
Saskatchewan	Aa1 (pos)	AAA	AA
Manitoba	Aa1	AA	A(high)
Ontario	Aa2	AA- (neg)	AA (low)
Quebec	Aa2	A+	A(high)
New Brunswick	Aa2	A+	A(high)
Nova Scotia	Aa2	A+	A (high)
Newfoundland & Labrador	Aa2	A+	A
Prince Edward Island	Aa2	A	A(low)

Ratings reflect the latest credit ratings available at March 31, 2014.

¹ The rating agencies assign letter ratings to borrowers. The major A bracket categories, in descending order of credit quality, are: AAA/Aaa; AA/Aa; A. The '1', '2', '3', 'high', 'low', '-', and '+' modifiers show relative standing within the major categories. For example, AAA exceeds AA, Aa1 exceeds Aa2 and AA exceeds AA-.

Assessment of Financial Condition

Financial condition describes a government's financial health or its ability to meet its existing financial obligations, both with respect to its service commitments to the public and its financial commitments to creditors, employees and others. The following assessment of the Government's financial condition considers three elements: sustainability, flexibility and vulnerability.

Sustainability

Sustainability is the degree to which a government can maintain its existing service commitments and meet its existing financial obligations without increasing its debt or tax burden relative to the economy within which it operates.

Net Debt to the Province's Gross Domestic Product

Gross domestic product (GDP) is a measure of the value of the goods and services produced during a year, indicating the size of the provincial economy. Net debt is the difference between a government's liabilities and financial assets and represents the future revenue that is required to pay for past transactions and events. Net debt as a percentage of the Province's GDP provides a measure of the level of financial demands placed on the economy by the Government's spending and taxation policies. A lower net debt to GDP ratio is desired and indicates higher sustainability.

Net Debt as a Percentage of the Province's Gross Domestic Product - 10 Year Comparison

The overall downward trend illustrated by this ratio is a result of growth in the provincial economy together with declining net debt over the ten-year period.

Assessment of Financial Condition *(continued)*

Net Debt to Total Revenue

Another measure of a government’s sustainability is net debt as a percentage of total revenue. Net debt provides a measure of the future revenue that is required to pay for past transactions and events. A lower net debt to revenue ratio indicates higher sustainability, as less time is required to eliminate net debt.

Net Debt as a Percentage of Total Revenue - 10 Year Comparison

When expressed as a percentage of total revenue, the Government’s net debt has declined from 93.3 per cent to 32.0 per cent of total revenue since 2004-05. The reduction in this ratio indicates that the Government’s annual revenue has been sufficient not only to pay for current transactions and events, but also to pay off a portion of past deficits.

Net Debt per Capita

Net debt per capita represents the net debt attributable to each Saskatchewan resident. A decrease in this ratio indicates the debt burden per resident has improved.

Net Debt per Capita - 10 Year Comparison

Figures are based on Statistics Canada first quarter estimates representing the population at January 1 of each year.

The overall downward trend illustrated by this ratio is a result of a declining net debt together with a steady increase in the Province’s population over the ten-year period.

Assessment of Financial Condition *(continued)*

Flexibility

Flexibility is the degree to which a government can change its debt or tax burden and still meet its existing service commitments and financial obligations.

Debt Charges to Total Revenue

A debt charges to revenue ratio, often referred to as the interest bite, indicates the proportion of provincial revenue that is required to pay interest charges on general public debt and therefore, is not available to pay for essential public services and programs. A lower ratio means that there is more money available to provide government services.

Debt Charges as a Percentage of Total Revenue - 10 Year Comparison

Over the last ten years, the interest bite has decreased due to both increased revenue and decreased interest costs. In 2013-14, the Government spent approximately 4.0 cents of each dollar of revenue on debt charges on general public debt, compared to 9.8 cents in 2004-05. This reduction leaves more resources available to the Government to provide services without increasing its revenue.

Assessment of Financial Condition *(continued)*

Own-source Revenue to the Province's Gross Domestic Product

This ratio measures the extent to which the Government is taking income out of the provincial economy, either through taxation, non-renewable resources revenue or user fees. An increase in this ratio indicates that the Government's own-source revenue is growing faster than the economy, reducing the Government's flexibility to increase revenue without slowing the growth of the provincial economy.

Own-source Revenue as a Percentage of the Province's Gross Domestic Product - 10 Year Comparison

Own-source revenue as a percentage of GDP has remained relatively stable over the last ten years meaning that the Government has not significantly changed its demands on the provincial economy over this time. The chart, while relatively stable, shows a decreasing trend which indicates that the Government's flexibility has improved slightly over the last ten years.

Assessment of Financial Condition *(continued)*

Vulnerability

Vulnerability is the degree to which a government is dependent on sources of funding outside of its control or is exposed to risks that could impair its ability to meet its existing service commitments and financial obligations.

Transfers from the Federal Government to Total Revenue

The Government has no control over the amount of federal transfers that it receives each year. Transfers from the federal government as a percentage of total revenue is therefore an indicator of the degree of vulnerability the Government has as a result of reliance on the federal government for revenue. Generally, a decreasing ratio indicates that a government is less reliant on federal transfers to fund its programs, making it less vulnerable.

Transfers from the Federal Government as a Percentage of Total Revenue - 10 Year Comparison

In 2013-14, 14.0 per cent of the Government’s revenue came from transfers from the federal government with the remainder coming from Saskatchewan sources. The Government’s ability to fund essential programs and services from own-source revenue has remained fairly stable over the past several years.

Foreign Currency Debt to Net Debt

The ratio of foreign currency debt to net debt is an indicator of the degree of vulnerability a government has to currency rate fluctuations. Where the Government holds debt that is issued in foreign currencies it often uses cross currency swaps, a hedging strategy, to effectively convert this debt to Canadian dollar debt. At March 31, 2014, this ratio is essentially nil due to the Government’s hedging strategies together with its investment in U.S. dollar sinking fund assets. Over the last ten years, exposure to currency rate fluctuations on foreign currency debt has been minimal. Decreasing this exposure through the use of hedging activities and holding U.S. dollar sinking fund investments mitigates the risk of debt and debt servicing costs rising due to changes in foreign currency rates.

Risks and Uncertainties

The Government is subject to risks and uncertainties that arise from variables which the Government cannot directly control. These risks and uncertainties include:

- changes in economic factors such as economic growth or decline, commodity and non-renewable resource prices, inflation, interest rates, marketplace competition, population change, personal income and retail sales;
- exposure to interest rate risk, foreign exchange rate risk, credit risk and liquidity risk;
- changes in transfers from the federal government;
- utilization of government services, such as insurance, health care and social services;
- other unforeseen developments including unusual weather patterns and natural and other disasters;
- criminal or malicious attacks, both cyber and physical in nature, potentially resulting in business interruption, privacy breach and loss of, or damage to, information, facilities and equipment;
- identification and quantification of environmental liabilities;
- factors that could hinder the safe delivery of products and services;
- outcomes from litigation, arbitration and negotiations with third parties;
- changes in reported results where actual experience may differ from initial estimates as discussed in note 2 of the Summary financial statements; and
- changes in accounting standards.

Recognizing that Saskatchewan is heavily reliant on the revenue from non-renewable resources and that the Province's financial results can be influenced by other external factors, the Government takes a prudent approach in developing its budget assumptions for macroeconomic variables and non-renewable resources prices. The Government uses a number of forecasts from national forecasting agencies and banks, private industry and private sector analysts when developing the underlying assumptions for fiscal forecasts both on budget day and throughout the fiscal year.

The fiscal impact of changes in the underlying economic assumptions, including non-renewable resources prices, are estimated on a regular basis to quantify the risk associated with each forecast assumption. By understanding the size of the risk inherent in the fiscal projections, the Government is better able to make sound financial decisions.

Finally, for the Government to meet its challenges of growth and remain competitive where it operates in a competitive environment, attention is directed towards maintaining and investing in the Province's infrastructure to support the steady growth the Province has been experiencing and to allow for continued growth in the future.

Risk management specific to public debt is discussed in note 4 of the Summary financial statements.

Summary Financial Statements

Responsibility for the Summary Financial Statements

The Government is responsible for the Summary Financial Statements. The Government maintains a system of accounting and administrative controls to ensure that accurate and reliable financial statements are prepared and to obtain reasonable assurance that transactions are authorized, assets are safeguarded, and financial records are maintained.

The Provincial Comptroller prepares these statements in accordance with generally accepted accounting principles for the public sector, using the Government's best estimates and judgement when appropriate. He uses information from the accounts of the General Revenue Fund, Crown corporations and other government organizations to prepare these statements.

The Provincial Auditor expresses an independent opinion on these statements. Her report, which appears on the following page, provides the scope of her audit and states her opinion.

Treasury Board approves the Summary Financial Statements. The statements are tabled in the Legislative Assembly as part of the Public Accounts and referred to the Standing Committee on Public Accounts for review.

On behalf of the Government of the Province of Saskatchewan.

KEN KRAWETZ
Deputy Premier
Minister of Finance

CLARE ISMAN
Deputy Minister of Finance

TERRY PATON
Provincial Comptroller

Regina, Saskatchewan
June 2014

Independent Auditor's Report

To the Members of the Legislative Assembly of Saskatchewan

I have audited the accompanying financial statements of the Government of Saskatchewan, which comprise the Summary Statement of Financial Position as at March 31, 2014, and the Summary Statements of Operations, Accumulated Surplus, Change in Net Debt, and Cash Flow for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian public sector accounting standards for Treasury Board's approval, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Opinion

In my opinion, the financial statements present fairly, in all material respects, the financial position of the Government of Saskatchewan as at March 31, 2014, and the results of its operations, the changes in its net debt, and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

JUDY FERGUSON, FCA
Acting Provincial Auditor

Regina, Saskatchewan
June 12, 2014

Summary Statement of Financial Position

As at March 31, 2014

(thousands of dollars)

	2014	2013
Financial Assets		
Cash and temporary investments (<i>note 3</i>)	1,987,475	1,814,961
Accounts receivable (<i>schedule 1</i>)	1,578,372	1,690,375

Summary Statement of Cash Flow

For the Year Ended March 31, 2014

(thousands of dollars)

	2014	2013
Operating Activities		
Surplus	588,866	37,448
Non-cash items included in the surplus		
Net income from government business enterprises (<i>schedule 3</i>)	(1,052,179)	(1,119,836)
Gain on sale of Information Services Corporation shares (<i>note 11</i>)	(141,243)	-
Other non-cash items included in the surplus (<i>schedule 15</i>)	391,749	308,434
Net change in non-cash operating activities (<i>schedule 15</i>)	253,298	368,325
Adjustment for unrealized inter-organizational gain (<i>schedule 3</i>)	20,474	-
Dividends received from government business enterprises (<i>schedule 3</i>)	644,869	672,632
Dividends received from other investments	5,972	-
Cash Provided by Operating Activities	711,806	267,003
Capital Activities		
Acquisition of tangible capital assets (<i>schedule 11</i>)	(1,064,880)	(1,038,061)
Proceeds on disposal of tangible capital assets	57,408	77,025
Cash Used for Capital Activities	(1,007,472)	(961,036)
Investing Activities		
Net decrease (increase) in loans receivable	233,770	(386,545)
Net proceeds on sale of Information Services Corporation shares (<i>note 11</i>)	156,199	-
Net disposal of equity of Information Services Corporation (<i>note 11</i>)	(21,676)	-
Repayment of equity advances by government business enterprises	-	8,805
Acquisition of other investments	(673,358)	(723,387)
Disposition of other investments	816,053	799,927
Sinking fund contributions for general debt (<i>schedule 9</i>)	(51,601)	(51,114)
Sinking fund redemptions for general debt (<i>schedule 9</i>)	250,104	1,039,846
Cash Provided by Investing Activities	709,491	687,532
Financing Activities		
Proceeds from public debt	497,712	656,281
Repayment of public debt	(676,713)	(1,134,640)
Net (decrease) increase in other liabilities	(62,310)	91,672
Cash Used for Financing Activities	(241,311)	(386,687)
Increase (decrease) in cash and temporary investments	172,514	(393,188)
Cash and temporary investments, beginning of year	1,814,961	2,228,622
Adjustment to accumulated surplus (<i>note 10</i>)	-	(20,473)
Cash and Temporary Investments, End of Year	1,987,475	1,814,961

The accompanying notes and schedules are an integral part of these financial statements.

Notes to the Summary Financial Statements

As at March 31, 2014

1. Significant Accounting Policies

Basis of accounting

These Summary financial statements are prepared in accordance with Canadian public sector accounting standards.

Government reporting entity

The government reporting entity consists of government service organizations, government business enterprises and government partnerships.

Government service organizations and government business enterprises represent organizations that are controlled by the Government. Controlled organizations that are self-sufficient and have the financial and operating authority to sell goods and services to individuals and other organizations outside the government reporting entity as their principal activity are classified as government business enterprises. All other controlled organizations are government service organizations.

A government partnership exists when the Government has entered into a contractual arrangement with one or more partners outside the government reporting entity where these partners share, on an equitable basis, the significant risks and benefits associated with operating the partnership.

A listing of the organizations included in the government reporting entity is provided in schedule 17. Unless otherwise noted, the financial activities of all subsidiaries of these organizations have also been included.

Trust funds

Trust funds are administered but not controlled by the Government and, therefore, are excluded from the government reporting entity and are disclosed in note 9.

Method of consolidation

Government service organizations are consolidated after adjustment to a basis consistent with the accounting policies described in this note. Significant inter-organizational balances and transactions are eliminated. Government service organizations in which a non-controlling interest exists are proportionately consolidated.

Government business enterprises are accounted for by the modified equity method. Using this method, the Government's investment in government business enterprises, which is initially recorded at cost, is adjusted annually to include the Government's proportionate share of net earnings or losses and certain other net equity changes of the government business enterprise without adjustment to conform with the accounting policies described in this note. With the exception of dividends declared by March 31 and significant unrealized inter-organizational gains and losses, inter-organizational balances and transactions are not eliminated.

Government partnerships are proportionately consolidated after adjustment to a basis consistent with the accounting policies described in this note and are disclosed in note 8. Significant inter-organizational balances and transactions are eliminated.

Financial results of government organizations with fiscal year-ends other than March 31 are adjusted for transactions occurring before March 31 that have a significant impact on these financial statements.

Specific accounting policies

Financial assets

Financial assets are assets that could be used to discharge existing liabilities or finance future operations and are not for consumption in the normal course of operations.

Temporary investments are recorded at the lower of cost or market.

Inventories held for resale are valued at the lower of cost and net realizable value.

Deferred charges include issue costs and net discounts or premiums incurred on the issue of debt and related derivative instruments. They are recorded at cost and amortized on a straight-line basis over the remaining life of the debt issue.

Notes to the Summary Financial Statements

1. Significant Accounting Policies *(continued)*

Loans receivable are initially recorded at cost. Where there has been a loss in value that is other than a temporary decline, the loan is written down to recognize the loss. Interest is recognized on the accrual basis; when collection is uncertain, it is recorded on the cash basis.

Other investments are accounted for by various methods as described below and are written down to market value when there is evidence of a permanent decline in value.

Equities are investments in shares of private or public companies. Investments that are subject to significant influence and the Government has less than a controlling interest are accounted for by the modified equity method. Using this method, the Government's investment, which is initially recorded at cost, is adjusted annually for the Government's share of the investees' net earnings or losses and is reduced by dividends and partnership distributions received from these investments. Investments that are not subject to significant influence are recorded at cost; dividends from these shares are recorded as income when receivable.

Pooled investment funds are recorded at market value.

All other investments are recorded at amortized cost.

Liabilities

Liabilities are present obligations to individuals and organizations outside the government reporting entity as a result of transactions and events occurring prior to year-end, which will be satisfied in the future through the transfer or use of assets or another form of economic settlement. Contingencies, including loss provisions on guaranteed debt, are recorded when it is likely that a liability exists and the amount can be reasonably estimated.

Liabilities consist of obligations to provide retirement and other future benefits to employees, to repay borrowings, to provide authorized transfers where eligibility criteria are met, to pay for goods and services acquired prior to year-end and to deliver goods or services in the future where payment has been received.

Accounts payable and accrued liabilities include obligations for other employee future benefits. The Government recognizes the cost of accumulating benefits in the periods the employees provide service.

Public debt is recorded at par, and is comprised of:

- *general debt*, which is debt issued by government service organizations and includes issued amounts subsequently transferred to government business enterprises; and
- *government business enterprise specific debt*, which is debt issued by, or specifically on behalf of, government business enterprises.

On the Statement of Financial Position public debt includes only general debt. Government business enterprise specific debt is listed separately on schedule 8.

Certain debenture issues require contributions to a sinking fund. These obligations are recorded at principal less sinking fund balances where applicable. Premiums and discounts on long-term investments within these sinking funds are amortized on a constant yield basis.

Debt issues and sinking fund investments held in foreign currencies are converted to the Canadian dollar equivalent at the exchange rate in effect at March 31.

Premiums, discounts and issue costs are recorded as deferred charges.

Unamortized foreign exchange gain includes unrealized foreign exchange gains and losses resulting from the conversion of debentures due and sinking funds held in a foreign currency to the Canadian dollar equivalent at the exchange rate in effect at March 31. Unrealized foreign exchange gains and losses are amortized on a straight-line basis over the remaining life of the debt issue. Realized foreign exchange gains and losses are included in the surplus or deficit.

Pension liabilities are calculated using the projected benefit method prorated on services, except as otherwise disclosed in note 5. Pension fund assets are valued at market-related values. Changes in the pension liabilities that result from estimation adjustments due to experience gains and losses and changes in actuarial assumptions are amortized on a straight-line basis over the expected average remaining service life of the related employee group. Gains or losses resulting from plan amendments are recognized in the period of the plan amendment.

Notes to the Summary Financial Statements

1. Significant Accounting Policies *(continued)*

Non-financial assets

Non-financial assets are acquired, constructed or developed assets that do not normally provide resources to discharge existing liabilities, but instead are normally employed to deliver government services, may be consumed and are not for sale in the normal course of operations.

Inventories held for consumption are recorded at cost and are expensed as they are consumed.

Tangible capital assets are recorded at cost and include all amounts directly attributable to the acquisition, construction, development or betterment of the asset. Tangible capital assets are generally amortized on a straight-line basis over the estimated useful life of each asset.

Revenue

Revenues are recorded on the accrual basis. For corporate and individual income taxes, cash received from the federal government provides the best estimate and is used as the basis for recording the tax revenue. Government transfers are recognized as revenue in the period during which the transfer is authorized and eligibility criteria are met.

Expense

Expenses are recorded on the accrual basis. Government transfers are recognized as expenses in the period during which the transfer is authorized and eligibility criteria are met.

Future changes in accounting policies

A number of new standards and amendments to standards issued by the Public Sector Accounting Board of the Canadian Institute of Chartered Accountants are not yet effective and have not been applied in preparing these financial statements. The following standards for governments will become effective as follows:

PS 3260 Liability for Contaminated Sites (effective April 1, 2014), a new standard providing guidance on the recognition, measurement and disclosure of liabilities for the remediation of contaminated sites.

PS 3450 Financial Instruments (effective April 1, 2016), a new standard establishing guidance on the recognition, measurement, presentation and disclosure of financial instruments, including derivatives.

PS 2601 Foreign Currency Translation (effective April 1, 2016), replaces PS 2600 with revised guidance on the recognition, presentation and disclosure of transactions that are denominated in a foreign currency.

PS 1201 Financial Statement Presentation (effective in the period PS 3450 and PS 2601 are adopted), replaces PS 1200 with revised general reporting principles and standards of presentation and disclosure in government financial statements.

PS 3041 Portfolio Investments (effective in the period PS 3450, PS 2601 and PS 1201 are adopted), replaces PS 3040 with revised guidance on accounting for, and presentation and disclosure of, portfolio investments.

The Government plans to adopt these new and amended standards on the effective date and is currently analyzing the impact this will have on these financial statements.

With respect to the Liability for Contaminated Sites standard, a number of contaminated sites have been identified and work is underway to estimate the amount of the Government's liability. The majority of the identified contaminated sites relate to abandoned uranium and other mines. The liability associated with the Gunnar uranium mine and mill site is expected to be significant. The Government plans to record the contaminated sites liability retroactively without restatement in 2015.

Notes to the Summary Financial Statements

2. Measurement Uncertainty

Uncertainty in the determination of the amount at which an item is recognized or disclosed in financial statements is known as measurement uncertainty. Such uncertainty exists when there is a variance between the recognized or disclosed amount and another reasonably possible amount.

Measurement uncertainty, disclosed in aggregate for government service organizations and government business enterprises that may be material to these financial statements exists:

- in pension obligations of \$7,312.3 million (2013 - \$7,364.3 million), insurance claim obligations of \$2,968.6 million (2013 - \$2,749.4 million - restated) and environmental obligations of \$317.5 million (2013 - \$267.0 million) because actual experience may differ significantly from actuarial or historical estimations and assumptions;
- in corporate and individual income taxation revenue of \$3,487.2 million (2013 - \$3,244.5 million) because final tax assessments may differ from initial estimates on which cash payments are based;
- in oil and natural gas non-renewable resource revenue of \$1,530.3 million (2013 - \$1,295.2 million) because of price and production sensitivities in the royalty revenue structures;
- in resource surcharge non-renewable resource revenue of \$436.9 million (2013 - \$627.7 million) because the final valuation of resource sales may differ from initial estimates on which installments are based;
- in potash non-renewable resource revenue of \$346.0 million (2013 - \$364.5 million) because actual operating profits may differ from initial estimates;
- in the Canada Health Transfer and Canada Social Transfer revenue of \$1,349.2 million (2013 - \$1,300.4 million) because of changes in economic and demographic conditions in the Province and the country;
- in the Provincial Disaster Assistance Program receivable of \$210.4 million (2013 - \$373.5 million) because actual settlement payments may differ from initial estimates;
- in unbilled utility revenue of \$141.3 million (2013 - \$116.4 million) because actual usage may differ from estimated usage; and
- in agricultural income stability program obligations of \$122.8 million (2013 - \$247.3 million) because historical production margins may differ from actual experience.

While best estimates are used for reporting items subject to measurement uncertainty, it is reasonably possible that changes in future conditions, occurring within one fiscal year, could require a material change in the amounts recognized or disclosed.

3. Cash and Temporary Investments

Temporary investments are \$741.3 million (2013 - \$801.6 million) and mature in less than one year. Due to the short-term nature of these investments, market value approximates cost. Cash and temporary investments includes \$159.0 million (2013 - \$106.5 million) restricted as a result of agreements with external parties.

Notes to the Summary Financial Statements

4. Risk Management of Public Debt

The Government borrows funds in both domestic and foreign capital markets by issuing Government of Saskatchewan securities. As a result, the Government is exposed to four types of risk: interest rate risk, foreign exchange rate risk, credit risk and liquidity risk.

To manage these risks, the Government maintains a preference for fixed rate Canadian dollar denominated debt. Where market conditions dictate that other forms of debt are more attractive, the Government seeks opportunities to use derivative financial instruments to reduce these risks. A derivative financial instrument is a contract, the value of which is based on the performance of an underlying financial asset, index or other investment.

Interest rate risk is the risk that the Government's debt charges will increase due to changes in interest rates. This risk is managed by issuing debt securities at predominantly fixed rates of interest rather than at floating rates of interest.

Floating rate debt is defined as the sum of floating rate debentures, short-term promissory notes, fixed rate debt maturing within one year and Saskatchewan Savings Bonds. The Government seeks opportunities to effectively convert floating rate debt into fixed rate debt through the use of interest rate swaps. The Government has interest rate swaps on a notional value of debt of \$69.8 million (2013 - \$74.3 million). At March 31, 2014, 80.7 per cent (2013 - 80.5 per cent) of the Government's gross debt effectively carried a rate of interest that was fixed for greater than a one-year period.

Public debt includes floating rate debt of \$2,414.7 million (2013 - \$2,204.8 million). A one percentage point increase in interest rates would have decreased the surplus by \$24.1 million.

Foreign exchange rate risk is the risk that the Government's debt charges will increase due to a decline in the value of the Canadian dollar relative to other currencies. This risk is managed by maintaining a preference for issuing debt that is denominated in Canadian dollars. Where debt has been issued in foreign currencies, the Government seeks opportunities to effectively convert it into Canadian dollar debt through the use of cross currency swaps. At March 31, 2014, 98.0 per cent (2013 - 97.5 per cent) of the Government's gross debt is effectively denominated in Canadian dollars. A one cent change in the value of the U.S. dollar compared to the Canadian dollar from the March 31, 2014 level would have an insignificant effect on debt and debt servicing costs.

The following foreign denominated items have been hedged to Canadian dollars using cross currency swaps:

- debentures totalling 575.0 million U.S. dollars (2013 - 825.0 million) fully hedged to \$725.3 million Canadian (2013 - \$1,051.1 million);
- debentures totalling 300.0 million Swiss francs (2013 - 300.0 million) fully hedged to \$274.7 million Canadian (2013 - \$274.7 million); and
- interest payments on debentures of 225.0 million U.S. dollars (2013 - 275.0 million) hedged to Canadian dollars at an exchange rate of 1.2172 (2013 - 1.2325).

In total, the Government has cross currency swaps on a notional value of debt of \$1,548.5 million (2013 - \$1,939.3 million). The effectiveness of these hedges is assessed on an ongoing basis by monitoring the credit ratings of the counterparties to the hedges.

Credit risk is the risk that a loss may occur from the failure of another party to meet its obligations. For derivative financial instrument contracts this risk is managed by dealing only with counterparties that have good credit ratings and by establishing limits on individual counterparty exposures and monitoring those exposures on a regular basis. At March 31, 2014, 100 per cent (2013 - 100 per cent) of the Government's counterparties held a Standard and Poor's credit rating of A or better.

Liquidity risk is the risk that the Government will not be able to meet its financial commitments over the short term. This risk is managed by distributing debt maturities over many years, maintaining sinking funds on long-term debt issues and maintaining adequate cash reserves and short-term borrowing programs as contingent sources of liquidity.

Notes to the Summary Financial Statements

5. Retirement Benefits

The Government sponsors several defined benefit and defined contribution pension plans. The Government also participates in a joint defined benefit pension plan.

Defined benefit plans provide benefits based on length of service and pensionable earnings. A typical defined benefit plan provides pensions equal to 2.0 per cent of a member's average five years highest salary, multiplied by the years of service to a maximum of 35 years. Members contribute a percentage of salary, which may vary based on age, to their plan. Pensions and contribution rates are integrated with the Canada Pension Plan.

Actuarial valuations are performed at least triennially. When a valuation is not done in the current fiscal year an actuary extrapolates the most recent valuation. Valuations and extrapolations are based on a number of assumptions about future events, such as inflation rates, interest rates, wage and salary increases and employee turnover and mortality. These assumptions reflect estimates of expected long-term rates and short-term forecasts. Estimates vary based on the individual plan.

The accrued benefit obligation is determined using the projected benefit method prorated on services. Pension fund assets are valued at market related values based on the actual market values averaged over a four-year period. In the periods between valuations, the actuary estimates the market related value of pension fund assets using expected long-term rates of return for the individual plans.

Joint defined benefit plans are governed by a formal agreement between the joint sponsors (i.e., employer and plan members), which establishes that the joint sponsors have shared control over the plan. Funding contributions are shared mutually between the employer and plan members. The sponsors share, on an equitable basis, the significant risks of each plan. Accordingly, the Government accounts for only its portion of the plan. Plan assets and surpluses are restricted for member benefits or certain other purposes set out in the agreement. Plan benefits are determined on the same basis as defined benefit plans.

The accrued benefit obligation is determined using the projected accrued benefit actuarial cost method. Pension fund assets are valued at market related values by averaging the difference between the net investment income on a market value basis and the expected investment income determined by the actuary, over a five-year period.

Defined contribution plans provide pensions based on accumulated contributions and investment earnings. Employees contribute a percentage of salary. The Government provides contributions at specified rates for employee current service.

Pension fund assets of government sponsored defined benefit and defined contribution plans are invested in fixed income securities, equities, real estate, pooled investment funds and short-term monetary items. The investment in Government of Saskatchewan securities is insignificant for all plans.

Government service organizations

Defined benefit plans and joint defined benefit plan

The two main defined benefit plans are the Teachers' Superannuation Plan (TSP) and the Public Service Superannuation Plan (PSSP). Other plans include Judges of the Provincial Court Superannuation Plan (Judges), Saskatchewan Transportation Company Employees Superannuation Plan, Anti-TB League Employees Superannuation Plan, and the Pension Plan for the Non-Teaching Employees of the Saskatoon School Division No. 13 (PPNTE). Defined benefits are also payable to members of the former Members of the Legislative Assembly Superannuation Fund (MLA).

The Government is required to match member current service contributions for all plans except the PSSP, Judges and PPNTE. Funding contributions are required for the PPNTE. Separate pension funds are maintained for all plans except the PSSP and the MLA, for which member contributions are received and pension obligations are paid directly by the Government.

The Government also participates in the Saskatchewan Healthcare Employees' Pension Plan (SHEPP), a joint defined benefit plan for employees of the Regional Health Authorities. The Government contributes to the plan at the ratio of 1.12 to 1 of employee contributions. Any actuarially determined deficiency is the responsibility of participating employers and employees in the ratio of 1.12 to 1. The Government's participating employer contributions for the SHEPP represents approximately 90 per cent of the total employer contributions to the plan.

Notes to the Summary Financial Statements

5. Retirement Benefits (continued)

Information on the defined benefit plans and the joint defined benefit plan of government service organizations is as follows:

					2014	2013
	TSP	PSSP	Others	SHEPP	Total	Total

¹ Judges and PPTE are open to new membership; all other plans are closed.

² Contribution rate varies based on age upon joining the plan.

Defined contribution plans

The two main multi-employer defined contribution plans sponsored by the Government are the Public Employees Pension Plan (PEPP) and the Capital Pension Plan (Capital). The Government provides contributions to the plans at specified rates for employee current service. The Government also contributes to the Saskatchewan Teachers' Retirement Plan (STRP) which is sponsored by the Saskatchewan Teachers' Federation, as well as the Municipal Employees' Pension Plan (MEPP) and the Regina Civic Employees' Superannuation and Benefit Plan (RCESP). The Government has fully funded its share of contributions to the defined contribution plans.

Information on the defined contribution plans of government service organizations is as follows:

	Government Sponsored					2014	2013
	PEPP	Capital	STRP ¹	MEPP ²	RCESP ³	Total	Total
Plan status	open	open	open	open	open	n/a	n/a
Member contribution rate (percentage of salary)	5.00-9.00 ⁴	5.00-7.50 ⁴	7.80-10.00	8.15	8.42-13.96	n/a	n/a
Government contribution rate (percentage of salary)	5.00-9.51 ⁴	5.50-7.50 ⁴	7.00-9.00	8.15	8.42-13.96	n/a	n/a
Government service organization participation							
Number of active members	15,969	666	14,871	9,712	2,086	43,304	42,637
Member contributions (thousands of dollars)	75,806	2,632	81,581	21,620	11,908	193,547	185,810
Government contributions (thousands of dollars)	80,810	3,229	71,775	21,620	12,190	189,624	188,408

¹ Teachers employed by Boards of Education after July 1, 1980 participate in the STRP, a contributory defined benefit pension plan. The Government contributes an amount which is set through provincial negotiations.

² Certain employees of Boards of Education and Regional Colleges participate in the MEPP, a multi-employer defined benefit plan. All costs, including costs of any actuarially determined deficiency, are equally shared by the employees and employers. At December 31, 2013, audited financial statements for the MEPP reported an accrued benefit obligation of \$1,472.0 million (2012 - \$1,394.3 million) and pension fund assets at market value of \$1,658.3 million (2012 - \$1,534.9 million - restated).

³ Certain employees of a Regional Health Authority and a Board of Education participate in the RCESP, a multi-employer defined benefit plan. All costs, including costs of any actuarially determined deficiency, are equally shared by the employees and employers. At December 31, 2013, audited financial statements for the RCESP reported an accrued benefit obligation of \$1,228.1 million (2012 - \$1,243.0 million) and pension fund assets at market value of \$1,110.2 million (2012 - \$991.5 million).

⁴ Contribution rate varies based on employee group.

Notes to the Summary Financial Statements

5. Retirement Benefits *(continued)*

Pension expense

Pension expense for government service organizations is primarily allocated to education expense, health expense and other expense. Pension interest expense is included in debt charges. The total pension expense of government service organizations includes the following:

<i>(thousands of dollars)</i>	2014	2013
Defined benefit plans		
Current period benefit cost	34,171	37,006
Amortization of estimation adjustments	476,522	510,919
Employee contributions	(8,167)	(7,652)
Cost of financing unfunded pension obligation (pension interest expense)	244,891	247,606
Pension expense, defined benefit plans	747,417	787,879
Other plans		
Pension expense, joint defined benefit plan	35,004	149,035
Pension expense, defined contribution plans	189,624	188,408
Total Pension Expense	972,045	1,125,322

Government business enterprises

Defined benefit plans

There are additional employee pension plans of government business enterprises which are accounted for in the investment in government business enterprises. The two main defined benefit plans of government business enterprises are the Power Corporation Superannuation Plan (SaskPower) and the Saskatchewan Telecommunications Pension Plan (SaskTel). Other plans include the Saskatchewan Government Insurance Superannuation Plan, the Liquor Board Superannuation Plan, and the Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board (WCB).

The Government contributes the amount necessary to fund the payment of pension benefits.

Information on the defined benefit plans of government business enterprises is as follows:

				2014	2013
	SaskPower	SaskTel	Others	Total	Total
Plan status	closed	closed	closed	n/a	n/a

Notes to the Summary Financial Statements

5. Retirement Benefits *(continued)*

Based on the latest actuarial valuation with extrapolations to December 31, 2013, the present value of accrued pension benefits and the market value of pension fund assets are shown in the table below:

<i>(thousands of dollars)</i>				2014	2013
	SaskPower	SaskTel	Others	Total	Total
Accrued benefit obligation	893,617	1,057,701	129,485	2,080,803	2,357,750
Fair value of plan assets	790,596	983,118	79,368	1,853,082	1,762,209
Plan deficit	103,021	74,583	50,117	227,721	595,541
Unamortized amounts ¹	-	-	-	-	(5,687)
Pension Liabilities	103,021	74,583	50,117	227,721	589,854

¹ During 2013-14, government business enterprises adopted amendments to the International Financial Reporting Standard IAS 19, Employee Benefits. As a result, the deferral of actuarial gains and losses on employee benefits is no longer allowed. Comparative figures have not been restated.

Defined contribution plans

Information on the defined contribution plans of government business enterprises is as follows:

			2014	2013
	PEPP	Capital	Total	Total
Plan status	open	open	n/a	n/a
Member contribution rate <i>(percentage of salary)</i> ¹	4.25-7.25	4.00-5.50	n/a	n/a
Government contribution rate <i>(percentage of salary)</i> ¹	6.00-7.25	6.00-8.00	n/a	n/a
Government business enterprise participation				
Number of active members	9,528	2,713	12,241	12,117
Government contributions <i>(thousands of dollars)</i>	48,246	9,354	57,600	52,500

¹ Contribution rate varies based on employee group.

Pension expense

Pension expense for government business enterprises are included in income from government business enterprises. The total pension expense of government business enterprises includes the following:

<i>(thousands of dollars)</i>	2014	2013
Pension Expense		
Defined benefit plans ¹	23,668	(6,700)
Defined contribution plans	57,600	52,500
Total Pension Expense	81,268	45,800
Net (gain) loss included in Other Comprehensive Income ¹	(387,725)	71,900

¹ During 2013-14, government business enterprises adopted amendments to the International Financial Reporting Standard IAS19, Employee Benefits. For defined benefit plans, re-measurements are recognized immediately in other comprehensive income and all current service costs and interest income or expense is recognized immediately in net earnings. Interest income or expense is calculated by applying the discount rate to the net accrued benefit obligation or asset. Comparative figures have not been restated.

Notes to the Summary Financial Statements

6. Contingencies

Guaranteed debt

The Government has guaranteed the debt of others of \$15.6 million (2013 - \$18.7 million).

Guarantees include \$14.7 million (2013 - \$17.5 million) provided to lenders who make loans to breeder and feeder production associations under *The Farm Financial Stability Act*. These guarantees are net of a recorded loss provision of \$0.5 million (2013 - \$0.1 million).

Lawsuits

The Government is involved in various legal actions, the outcome of which is not determinable. Up to \$359.6 million may be paid depending on the outcome of lawsuits in progress. The lawsuits in progress include aboriginal land claims, claims for damages to persons and property and disputes of taxes and funding.

7. Contractual Obligations

The Government has the following contractual obligations:

(millions of dollars)	2015	2016	2017	2018	2019	Thereafter	Total
Government Service Organizations							
Construction and acquisition of tangible capital assets	538,512	64,963	18,149	2,289	2,289	-	626,202

¹ These financial statements report capital lease obligations of \$1,202.2 million including:

- \$1,143.1 million for government business enterprises representing aggregate payments of \$3,500.9 million (reported above) net of interest and executory costs of \$2,357.8 million; and
- \$59.1 million (*schedule 6*) for government service organizations representing aggregate payments of \$116.3 million (reported above) net of interest and executory costs of \$57.2 million.

Notes to the Summary Financial Statements

8. Government Partnerships

The Government has entered into various contractual arrangements with parties outside the government reporting entity resulting in shared control of certain organizations.

The Government's holdings in government partnerships include:

- shared control of Battlefords First Nations Joint Board of Education, which operates Sakewew High School in North Battleford;
- a 33.3 per cent interest in Foragen Technologies Limited Partnership, a venture capital fund which provides seed capital to technology corporations;
- shared control of Prairie Diagnostic Services Inc., which provides veterinary diagnostic services to veterinary and livestock industries in the Province; and
- a 45.5 per cent interest in Saskatchewan Entrepreneurial Fund Joint Venture, which assists with the development and growth of small business in the Province.

The Government's proportionate share of government partnerships is as follows:

<i>(thousands of dollars)</i>	2014	2013
Financial assets	7,666	8,370
Liabilities	1,079	897
Net assets	6,587	7,473
Non-financial assets	801	547
Accumulated Surplus	7,388	8,020
Revenue	4,777	9,711
Expense	4,441	5,166
Surplus	336	4,545
Accumulated partnership losses, beginning of year	(3,509)	(148)
Sale of partnership ¹	-	(7,906)
Accumulated partnership losses, end of year	(3,173)	(3,509)
Equity advances from government organizations	10,561	11,529
Accumulated Surplus	7,388	8,020

¹ During 2012-13, the Government sold its 60.0 per cent interest in Apex Investment Limited Partnership.

Notes to the Summary Financial Statements

9. Trust Funds

Trust fund assets held and administered by the Government are as follows:

<i>(thousands of dollars)</i>	2014	2013
Pension plans	12,332,065	11,168,595
Employee benefit plans	421,241	357,280
Public Guardian and Trustee of Saskatchewan	208,202	177,922
Saskatchewan Pension Annuity Fund	191,129	193,985
Other	66,847	61,674
Total Trust Fund Assets¹	13,219,484	11,959,456

¹ Amounts are based on the latest financial statements of the funds closest to March 31, 2014, where available.

10. Adjustment to Accumulated Surplus

During 2013-14, the accumulated surplus was reduced by \$25.6 million. Government business enterprises adopted amendments to International Financial Reporting Standards resulting in a decrease in investment in government business enterprises of \$7.2 million and a corresponding decrease in the opening accumulated surplus. Additionally, government business enterprises recorded prior period adjustments resulting in a \$18.4 million decrease in investment in government business enterprises and a corresponding decrease in opening accumulated surplus. The comparative figures have not been restated. The net impact of these changes on the opening balances reported in government business enterprise financial statements was a \$47.5 million decrease in total assets, a \$21.9 million decrease in total liabilities, a \$326.0 million increase in retained earnings, beginning of year and a \$351.6 million decrease in accumulated other comprehensive income (loss), beginning of year.

During 2012-13, the accumulated surplus was reduced by \$133.5 million. Saskatchewan Water Corporation was reclassified from a government service organization to a government business enterprise, resulting in a decrease to opening accumulated surplus of \$27.8 million. In addition, a liability for an accumulated sick leave benefit obligation was reported, resulting in a decrease to opening accumulated surplus of \$105.7 million.

These financial statements were adjusted as follows at April 1:

<i>(thousands of dollars)</i>	Increase (Decrease)	
	2013	2012¹
Financial assets		
Cash and temporary investments	-	(20,473)
Investment in government business enterprises	(25,611)	39,167
Other financial assets	-	6,324
Liabilities	-	19,140
Net debt	25,611	(5,878)
Non-financial assets		
Tangible capital assets	-	(138,951)
Other non-financial assets	-	(396)
Accumulated Surplus	(25,611)	(133,469)

¹ Includes an adjustment to non-cash operating activities of \$69.5 million (*schedule 15*).

Notes to the Summary Financial Statements

11. Information Services Corporation of Saskatchewan

Pursuant to *The Information Services Corporation Act*, effective May 30, 2013, the Information Services Corporation of Saskatchewan was continued under *The Business Corporations Act* as Information Services Corporation (ISC) and 17,500,000 voting shares in ISC (100.0 per cent) were issued to the Government. In July 2013, the Government sold 12,075,000 (69.0 per cent) of the shares for net proceeds of \$156.2 million, realizing a gain on sale of \$141.2 million. As a result of the sale, the Government no longer controls ISC and, accordingly, its financial activities subsequent to the date of sale have not been included in these financial statements. The Government's investment in ISC is now recorded in other investments.

12. Comparative Figures

Certain 2013 comparative figures have been reclassified to conform with the current year's presentation.

Accounts Receivable

Schedule 1

As at March 31, 2014
(thousands of dollars)

	2014	2013
Taxation	433,199	429,458

Total Loans Receivable	731,344	964,137

Government Business Enterprises

Loans to government business enterprises are presented net of government business enterprise specific debt of \$5.7 billion (2013 - \$4.5 billion).

SaskEnergy Incorporated (SaskEnergy)

The Government has \$183.0 million (2013 - \$415.0 million) in loans receivable from SaskEnergy. Of this, \$120.0 million (2013 - \$170.0 million) is repayable over terms not exceeding 26 years and bears interest at rates between 4.5 and 4.8 per cent (2013 - 4.5 and 4.9 per cent). The remaining \$63.0 million (2013 - \$245.0 million) is repayable on demand at a floating rate of interest. The loans are recorded net of \$7.1 million (2013 - \$7.9 million) for SaskEnergy's equity in sinking funds administered by the Government.

Saskatchewan Telecommunications Holding Corporation (SaskTel)

The Government has \$158.4 million (2013 - \$157.0 million) in loans receivable from SaskTel repayable on demand at a floating rate of interest.

Municipal Financing Corporation of Saskatchewan (MFC)

The Government has \$128.0 million (2013 - \$15.3 million) in loans receivable from MFC. Of this, \$100.0 million (2013 - nil) is repayable over terms not exceeding 31 years and bears interest at 3.9 per cent. The remaining \$28.0 million (2013 - \$15.3 million) is repayable on demand at a floating rate of interest.

Loans Receivable *(continued)*

Schedule 2

Saskatchewan Power Corporation (SaskPower)

The Government has \$100.0 million (2013 - \$100.0 million) in loans receivable from SaskPower repayable over 26 years and bearing interest at 4.8 per cent (2013 - 4.8 per cent). The loans are recorded net of \$5.9 million (2013 - \$4.7 million) for SaskPower's equity in sinking funds administered by the Government.

Other government business enterprise loans

The Government has \$21.8 million (2013 - \$141.3 million) in loans receivable from other government business enterprises. The loans are repayable on demand at a floating rate of interest.

Student Loans

The program operates under the authority of *The Student Assistance and Student Aid Fund Act, 1985*. Loans are interest free until the discontinuance of full-time studies or graduation. Interest rates are prescribed by the Government and range between 3.0 and 6.8 per cent (2013 - 3.0 and 7.3 per cent). Student bursaries, study grants and other varieties of loan forgiveness are available to students who meet specific criteria.

The administration and delivery of the federal and provincial student loans programs is integrated. The Government approves applications for both provincial and federal loans. External agencies are contracted to disburse, administer and collect loans, and the federal government is responsible for collection of loans in default.

Student loans approved between August 1996 and July 2001 are lender financed, disbursed, managed and collected by a bank. The Government retained responsibility for loan approval during this period and pays a risk premium of 5.0 per cent to the bank when loans become repayable.

A loss provision of \$64.0 million (2013 - \$63.6 million) has been recorded on these loans.

Affordable Housing Loans

Headstart on a home loan program

The Government holds \$47.3 million (2013 - \$34.3 million) in loans receivable from various builders and developers that are used to construct entry level housing units. The loans are repayable at terms not exceeding 18 months and bear interest at 4.0 per cent (2013 - 4.0 per cent).

Other housing loans

The Government holds \$7.1 million (2013 - \$7.6 million) in loans receivable under various housing programs. These loans are repayable at terms not exceeding 15 years and bear interest at rates between 2.2 and 7.2 per cent (2013 - 2.2 and 7.2 per cent). A loss provision of \$0.8 million (2013 - \$0.9 million) has been recorded on these loans.

Other

The Government's loan portfolio also consists of numerous other loans at various interest rates and maturities. Security on the loans may include promissory notes or charges against residential property. A loss provision of \$5.9 million (2013 - \$7.2 million) has been recorded on these loans.

Investment in Government Business Enterprises *(continued)*

Schedule 3

The investment in government business enterprises is comprised of the Government's equity in the entities listed below. The financial statements of these entities are prepared in accordance with International Financial Reporting Standards.

SaskEnergy Incorporated (SaskEnergy)

SaskEnergy promotes, transports, stores and distributes natural gas in Saskatchewan.

Saskatchewan Power Corporation (SaskPower)

SaskPower generates, purchases, transmits, distributes and sells electricity and related products and services.

Saskatchewan Telecommunications Holding Corporation (SaskTel)

SaskTel markets and supplies a range of voice, data, internet, wireless, text, image, security and entertainment products, systems and services. Through interconnection agreements, SaskTel is part of the national and global communications network.

Saskatchewan Water Corporation (SaskWater)

SaskWater provides professional water and wastewater services to Saskatchewan communities as well as to industrial and commercial customers.

Saskatchewan Government Insurance (SGI) and Saskatchewan Auto Fund (Auto Fund)

SGI's competitive general insurance business, SGI CANADA, offers a comprehensive line of home, tenant, farm, automobile extension and commercial coverages.

The Auto Fund, the provincial compulsory vehicle insurance program, is administered by SGI on behalf of the Government. Any net assets of the Auto Fund are held on behalf of Saskatchewan's motoring public and cannot be used for any other purpose.

Workers' Compensation Board (Saskatchewan) (WCB)

WCB provides workers' compensation insurance to Saskatchewan workers and employers. Any net assets of the WCB cannot be used for any other purpose.

Liquor and Gaming Authority (SLGA)

SLGA's mandate is to control the manufacturing and distribution of beverage alcohol throughout the Province, to oversee the licensing of all establishments selling alcohol in the Province and to maintain the integrity of all licensed gaming while ensuring maximum benefit to Saskatchewan charities.

To fulfill its mandate, SLGA operates retail liquor stores and video lottery terminals. It also owns and manages all slot machines at Saskatchewan Indian Gaming Authority casinos.

Saskatchewan Gaming Corporation (SGC)

SGC manages and operates Casino Regina and Casino Moose Jaw.

Municipal Financing Corporation of Saskatchewan (MFC)

MFC assists municipalities in financing their capital requirements.

Other Investments

As at March 31, 2014
(thousands of dollars)

Schedule 4

	2014	2013
Bonds and debentures	587,776	673,973

Total Other Investments	829,615	915,953

Bonds and Debentures

Bonds and debentures held by the Government have a market value of \$589.7 million (2013 - \$674.0 million - restated), and include securities of:

	2014	2013 (Restated)
Corporations (coupon interest range 1.8% to 8.9%; maturing in 1.0 to 27.7 years)	262,192	259,998
Governments of other provinces (coupon interest range 1.4% to 5.7%; maturing in 1.1 to 23.2 years)	190,364	229,986
Government of Canada (coupon interest range 0.5% to 5.0%; maturing in 1.8 to 23.2 years)	103,955	108,541
Government of Saskatchewan (coupon interest range 4.5% to 5.8%; maturing in 2.4 to 14.9 years)	2,823	2,982
Other (coupon interest range 3.0% to 5.4%; maturing in 2.2 to 42.3 years)	28,442	72,466
Total Bonds and Debentures	587,776	673,973

Pooled Investment Funds

Pooled investment funds represent the Government's investment in units of various funds consisting primarily of debt and equities.

Equities

Equities include \$5.8 million (2013 - \$39.8 million) invested in shares of private companies and \$30.0 million (2013 - \$5.8 million) invested in Canadian and international equity markets for which the quoted market value is \$98.5 million (2013 - \$4.9 million).

Investments in equities include the Government's \$25.1 million (2013 - nil) investment in Information Services Corporation (ISC), which is subject to significant influence. ISC is contracted by the Government to operate the provincial land titles, personal property registry, survey, mapping and geographic information systems. During 2013-14, the Government sold its controlling interest in ISC retaining a 31.0 per cent ownership interest (*note 11*).

During 2013-14, the Government sold its remaining investments subject to significant influence for proceeds of \$44.9 million, resulting in a gain on sale of \$15.2 million.

Other

Other investments include various fixed rate securities having a market value of \$83.4 million (2013 - \$93.0 million - restated).

¹ Public debt on the Statement of Financial Position includes only general debt.

² General debt and government business enterprise specific debt are presented net of sinking funds.

³ General debt includes \$89.1 million (2013 - \$81.5 million) secured primarily by assets with a carrying value of \$105.5 million (2013 - \$114.7 million).

⁴ Public debt of government business enterprises includes both general debt and government business enterprise specific debt. General debt of government business enterprises represents amounts transferred from the General Revenue Fund to government business enterprises and recorded as loans receivable (schedule 2). Government business enterprise specific debt represents debt issued by, or specifically on behalf of, government business enterprises.

Schedule 3 provides information on government business enterprises as presented in their audited financial statements closest to March 31, 2014. Public debt of government business enterprises shown above has been adjusted for transactions occurring from the audited financial statements to March 31, 2014 as follows:

	2014		2013	
	Government Business Enterprise Debt (schedule 3) ^a	Transactions to March 31	Public Debt	Public Debt
Saskatchewan Power Corporation	4,003,303	118,795	4,122,098	3,346,951
SaskEnergy Incorporated	1,063,573	(22,480)	1,041,093	981,988
Saskatchewan Telecommunications Holding Corporation	743,837	48,871	792,708	652,754
Municipal Financing Corporation of Saskatchewan	155,832	104,600	260,432	147,666
Liquor and Gaming Authority	125,000	(425)	124,575	125,064
Saskatchewan Water Corporation	51,437	(5,729)	45,708	48,247
Saskatchewan Gaming Corporation	13,722	(3,360)	10,362	11,769
Total Government Business Enterprises	6,156,704	240,272	6,396,976	5,314,439

^a Includes gross debt net of sinking funds reported on schedule 3.

Public Debt (continued)

Schedule 8

⁵ Included in public debt is U.S. dollar debt converted to \$4.6 million Canadian (2013 - \$3.9 million) at the exchange rate in effect at March 31, 2014 of 1.1053 (2013 - 1.0156).

Public debt is comprised of gross debt net of sinking funds as follows:

			2014
	Gross Debt ^a	Sinking Funds (schedule 9)	Public Debt
General Revenue Fund	4,885,910	(1,082,904)	3,803,006
Less amounts held by government organizations	(14,453)	-	(14,453)
Saskatchewan Power Corporation	4,534,969	(412,871)	4,122,098
SaskEnergy Incorporated	1,128,964	(87,871)	1,041,093
Saskatchewan Telecommunications Holding Corporation	895,000	(102,292)	792,708
Municipal Financing Corporation of Saskatchewan	263,000	(2,568)	260,432
Saskatchewan Immigrant Investor Fund Inc.	176,423	-	176,423
Boards of Education	174,439	-	174,439
Liquor and Gaming Authority	124,575	-	124,575
Regional Health Authorities	103,091	-	103,091
Saskatchewan Water Corporation	60,542	(14,834)	45,708
Saskatchewan Opportunities Corporation	36,684	(1,833)	34,851
Saskatchewan Housing Corporation	57,068	(28,411)	28,657
Water Security Agency	20,154	-	20,154
Global Transportation Hub Authority	20,000	-	20,000
Saskatchewan Gaming Corporation	10,362	-	10,362
Other	2,521	-	2,521
Public Debt	12,479,249	(1,733,584)	10,745,665

^a The average effective interest rate on gross debt during 2013-14 was 5.2 per cent (2012-13 - 5.6 per cent) and includes the impact of foreign exchange and the amortization of any premiums or discounts associated with the debentures. The average term to maturity of gross debt is 13.3 years (2013 - 11.8 years).

Debt principal payment requirements in each of the next five years and thereafter are as follows:

Year of Maturity	2014	2013
Short-term promissory notes	1,303,886	1,385,978
2013-14	-	837,273
2014-15	1,036,545	928,382
2015-16	534,481	526,020
2016-17	573,066	464,579
2017-18	293,014	299,103
2018-19	363,372	-
6-10 years	2,063,335	1,913,722
Thereafter	6,311,550	4,926,870
Gross debt ^a	12,479,249	11,281,927
Sinking funds	(1,733,584)	(1,834,718)
Public Debt	10,745,665	9,447,209

^a Gross debt includes Canada Pension Plan debentures of \$745.1 million (2013 - \$745.1 million). These debentures are callable in whole or in part before maturity, at the option of the Minister of Finance of Saskatchewan.

Sinking Funds

As at March 31, 2014
(thousands of dollars)

Schedule 9

	2013					2014
	Sinking Funds	Contributions ¹	Earnings ²	Redemptions ³	Currency Adjustment	Sinking Funds
General Revenue Fund	1,220,677	48,014	39,998	(247,465)	21,680	1,082,904
Saskatchewan Power Corporation	401,790	30,723	14,531	(34,173)	-	412,871
Saskatchewan Telecommunications Holding Corporation	90,846	7,366	4,080	-	-	102,292
SaskEnergy Incorporated	79,011	8,112	3,387	(2,639)	-	87,871
Saskatchewan Housing Corporation	26,722	520	1,169	-	-	28,411
Saskatchewan Water Corporation	11,656	2,637	541	-	-	14,834
Municipal Financing Corporation of Saskatchewan	2,623	513	89	(657)	-	2,568
Saskatchewan Opportunities Corporation	1,393	367	73	-	-	1,833
Total Sinking Funds⁴	1,834,718	98,252	63,868	(284,934)	21,680	1,733,584

¹ Annual contributions, established by Order in Council, are set at not less than one per cent of debentures outstanding. The aggregate amount of contributions estimated to be required in each of the next five years and thereafter to meet sinking fund requirements by debt classification (see footnote 4) are as follows:

	2015	2016	2017	2018	2019	Thereafter	Total
General debt	48,215	39,876	35,679	32,443	30,843	380,875	567,931
Government business enterprise specific debt	52,477	51,977	51,379	50,827	50,063	814,854	1,071,577
Total Sinking Fund Contributions	100,692	91,853	87,058	83,270	80,906	1,195,729	1,639,508

² Sinking fund earnings include gains on investment sales of \$23.1 million (2013 - \$80.3 million).

³ The redemption value is based on the market value of the sinking fund units at the date of redemption.

⁴ The market value of total sinking funds is \$1,663.3 million (2013 - \$1,834.0 million). Total sinking funds by debt classification are as follows:

	2013					2014
	Sinking Funds	Contributions	Earnings	Redemptions	Currency Adjustment	Sinking Funds
General debt	1,261,372	51,601	41,628	(250,104)	21,680	1,126,177
Government business enterprise specific debt	573,346	46,651	22,240	(34,830)	-	607,407
Total Sinking Funds	1,834,718	98,252	63,868	(284,934)	21,680	1,733,584

Sinking fund assets have been invested as follows:

	2014	2013
Long-term investments in securities of:		
Governments of other provinces (coupon interest range 1.0% to 9.3%; maturing in 2.3 to 35.9 years)	786,585	859,692
Government of Saskatchewan (coupon interest range 0.0% to 9.4%; maturing in 6.7 to 31.2 years)	409,390	430,937
Government of Canada (coupon interest 3.5%; maturing in 31.7 years)	49,718	8,002
Government of the United States (coupon interest 2.9%; maturing in 29.1 years)	15,990	19,257
Cash, short-term investments and accrued interest	471,901	516,830
Total Sinking Funds^a	1,733,584	1,834,718

^a Includes U.S. dollar cash, investments and accrued interest converted to \$244.1 million Canadian (2013 - \$275.4 million) at the exchange rate in effect at March 31, 2014 of 1.1053 (2013 - 1.0156).

Pension Liabilities

As at March 31, 2014

(thousands of dollars)

Schedule 10

				2014	2013
	TSP ¹	PSSP	Others	Total	Total
Accrued benefit obligation,					
beginning of year	5,944,264	2,155,898	519,412	8,619,574	8,360,453
Current period benefit cost	20,322	1,374	12,475	34,171	37,006
Interest cost	199,342	62,743	13,158	275,243	291,549
Actuarial (losses) gains	(61,022)	(125,615)	10,064	(176,573)	399,023
Joint defined benefit plan (SHEPP) ²	-	-	(97,695)	(97,695)	18,999
Benefit payments	(344,414)	(131,047)	(14,957)	(490,418)	(487,456)
Accrued Benefit Obligation, End of Year	5,758,492	1,963,353	442,457	8,164,302	8,619,574
Plan assets, beginning of year	661,377	-	111,016	772,393	862,047
Employer contributions	198,822	130,791	10,042	339,655	349,442
Employee contributions	5,150	256	2,761	8,167	7,652
Return on plan assets	28,056	-	2,296	30,352	43,943
Actuarial (losses) gains	(31,599)	-	1,884	(29,715)	(3,235)
Benefit payments	(344,414)	(131,047)	(14,957)	(490,418)	(487,456)
Plan Assets, End of Year³	517,392	-	113,042	630,434	772,393
	5,241,100	1,963,353	329,415	7,533,868	7,847,181
Unamortized estimation adjustments ⁴	(533,244)	125,615	(41,689)	(449,318)	(1,072,698)
Total Pension Liabilities⁵	4,707,856	2,088,968	287,726	7,084,550	6,774,483

¹ The TSP had an actual rate of return on plan assets of 4.8 per cent (2013 - 5.5 per cent).

² The joint defined benefit plan includes only the Government's employer portion of the pension liability. At December 31, 2013, the SHEPP had a total accrued benefit obligation of \$4,694.0 million (2012 - \$4,390.1 million), pension fund assets at market related values of \$4,455.9 million (2012 - \$3,941.7 million) and unamortized estimation adjustment gains of \$21.8 million (2012 - \$16.9 million). The pension liability would increase by \$669.8 million or would decrease by \$545.0 million if the discount rate was decreased or increased by one percentage point respectively. The market value of the pension fund investments was \$4,760.1 million (2012 - \$4,047.8 million). The plan assets had an actual rate of return of 15.1 per cent (2012 - 11.2 per cent). The Government and member contributions to the plan totalled \$132.7 million (2012 - \$130.0 million) and \$131.6 million (2012 - \$128.7 million) respectively. Benefit payments from the plan totalled \$203.3 million (2012 - \$178.5 million).

³ At March 31, 2014, the market value of defined benefit plan investments was \$661.1 million (2013 - \$760.9 million).

⁴ Unamortized estimation adjustments are amortized to pension expense over periods ranging from 2.8 to 3.5 years for the TSP, 0.3 years for the PSSP and from 0.9 to 12.0 years for the other plans. These represent the expected average remaining service life of active plan members at the time the estimation adjustments arose.

⁵ The total pension liabilities are based on the latest actuarial valuations extrapolated to March 31, 2014 for the defined benefit plans and December 31, 2013 for the joint defined benefit plan. Changes in assumptions can result in significantly higher or lower estimates of pension liabilities. A one percentage point decrease in the discount rate would result in a \$807.0 million and \$243.4 million increase in the pension liabilities for the TSP and the PSSP respectively, and a one percentage point increase would result in a \$657.0 million and \$200.2 million decrease in the pension liabilities for the TSP and the PSSP respectively.

Tangible Capital Assets

As at March 31, 2014

(thousands of dollars)

¹ Net book value of tangible capital assets does not include the following:

- works of art and historical treasures, such as the Legislative Building;
- items inherited by right of the Crown, such as Crown lands, forests, water and mineral resources, which are not recognized in these financial statements; and
- capital assets held by government business enterprises (*schedule 3*).

² Closing cost includes work-in-progress of \$786.7 million (2013 - \$664.0 million).

³ During 2012-13, the net book value of tangible capital assets decreased by \$139.0 million as a result of the reclassification of Saskatchewan Water Corporation from a government service organization to a government business enterprise (*note 10*).

Health	5,146,447	5,060,841
Protection of persons and property	631,943	668,813
Social services and assistance	1,142,121	1,071,831
Transportation	507,109	504,302
Other	543,839	655,094
Total Expense (schedule 13)	13,614,597	13,567,351
Surplus (Deficit)	(405,705)	(386,997)

The segments of the Summary financial statements are based on the accountability and control relationships between the Government and the various organizations within the government reporting entity. Schedule 17 identifies the organizations included in each segment.

¹ *Treasury Board organizations* include the General Revenue Fund, Growth and Financial Security Fund and organizations such as Regional Health Authorities, Boards of Education and Liquor and Gaming Authority.

² *CIC Board organizations* are agencies that are responsible to the Crown Investment Corporation of Saskatchewan (CIC) and include organizations such as Saskatchewan Power Corporation, Saskatchewan Telecommunications Holding Corporation and CIC Asset Management Inc.

³ *Not-for-profit insurance organizations* are intended to be actuarially sound over the long term. These entities typically adjust rates to break even over the longer term and include Saskatchewan Auto Fund, Saskatchewan Crop Insurance Corporation, Crop Reinsurance Fund of Saskatchewan and Workers' Compensation Board (Saskatchewan).

¹ Organization established during 2013-14.

² Organization determined to be a government partnership during 2013-14.

³ Organization wound up during 2013-14.

⁴ Controlling interest in the organization was sold during 2013-14 (*note 11*).

⁵ Organization's name changed during 2013-14 from Saskatchewan Watershed Authority.

⁶ The year-ends of certain organizations differ from March 31, 2014: ^a June 2013; ^b July 2013; ^c August 2013; ^d December 2013.

⁷ For segment disclosure (*schedule 16*) certain organizations are classified into categories other than Treasury Board Organizations as follows: ^a CIC Board Organizations; ^b Not-for-Profit Insurance Organizations.

Glossary of Terms

Accrual Accounting

The method used to prepare the Summary Financial Statements (SFS) included in Volume 1 of the Public Accounts. Accrual accounting recognizes financial transactions at the time they occur, regardless of whether any cash is received or paid.

Accumulated Surplus

One of the two measures of a government's financial position (see net debt). The accumulated surplus is the amount by which revenue has exceeded expense from the beginning of incorporation (1905) plus any adjustments that were charged directly to the accumulated surplus. It is calculated as the difference between assets and liabilities.

Capital Transfer

A grant provided to a third party such as a university or municipality to acquire or develop capital assets.

Consolidation

The method used to account for government service organizations in the SFS in which the accounts are adjusted to the basis of accounting described in note 1 of the SFS and then combined. Inter-organization balances and transactions are eliminated.

Debenture

A certificate of indebtedness where the issuer promises to pay interest and repay principal by a maturity date. It is usually unsecured, meaning there are no liens or pledges on any specific assets.

Debt

Terms used when describing debt include:

Government business enterprise specific debt is debt issued by government business enterprises and debt issued by the General Revenue Fund (GRF) specifically on behalf of a government business enterprise where the government expects to realize the receivable from the government business enterprise and settle the external debt simultaneously.

Gross debt is borrowings through the issuance of debt instruments such as promissory notes and debentures.

Sinking funds are funds set aside for the repayment of debt.

Public debt is gross debt net of sinking funds.

General debt is public debt net of loans to Crown corporations for government business enterprise specific debt.

Guaranteed debt is the debt of others that the Government has agreed to repay if others default.

Total debt is public debt plus guaranteed debt.

Derivative

A contract in which the value is based on the performance of an underlying financial asset, index or other investment. It does not require an initial investment and is settled at a future date.

Financial Asset

An asset that can be used to discharge existing liabilities or finance future operations and is not for consumption in the normal course of operations.

Financial Instrument

Any contract that gives rise to a financial asset of one party and a financial liability or equity instrument of another party.

Financial Liability

Any liability that is a contractual obligation to deliver a financial asset to another party, or to exchange financial instruments with another party under conditions that are potentially unfavourable to the entity.

Government Reporting Entity

The government reporting entity consists of government service organizations, government business enterprises and government partnerships. Trusts administered by the Government are excluded from the government reporting entity.

General Revenue Fund (GRF)

The fund into which all revenues are paid, unless otherwise provided for by legislation, and from which all expenditures are appropriated by the Legislative Assembly.

Government Business Enterprise

A self-sufficient government organization that has the financial and operating authority to sell goods and services to individuals and organizations outside the government reporting entity as its principal activity. Government business enterprises are recorded in the SFS using the modified equity method.

Government Partnership

An investment by the Government where there is a contractual arrangement between the Government and one or more partners outside the government reporting entity and where the partners share, on an equitable basis, the risks and benefits of the partnership. Government partnerships are proportionately consolidated in the SFS.

Government Service Organization

An organization that is controlled by the Government, except those designated as government business enterprises and government partnerships. Government service organizations are consolidated in the SFS after adjustment to a basis consistent with the accounting policies described in note 1 of the SFS.

Gross Domestic Product (GDP)

The standard measure of the overall size of the economy, the value of all goods and services produced during a period.

Hedge

A strategy to minimize the risk of loss on an asset (or liability) from market fluctuations such as interest rate or foreign exchange rate changes. This is accomplished by entering into offsetting commitments with the expectation that a future change in the value of the hedging instrument will offset the change in the value of the asset (or liability).

Modified Equity

The method by which government business enterprises are accounted for in the SFS. The Government's investment, which is originally recorded at cost, is adjusted annually to include the net earnings/losses and other net equity changes of the enterprise/partnership without adjustment to conform with the accounting policies described in note 1 of the SFS. Inter-organizational balances and transactions are disclosed but not eliminated.

Net Debt

One of the two measures of a government's financial position (see accumulated surplus). Net debt is calculated as the difference between financial assets and liabilities.

Non-financial Asset

An asset that is acquired, constructed or developed and does not normally provide resources to discharge existing liabilities.

Other Comprehensive Income/Loss (OCI)

OCI includes certain unrealized gains and losses of government business enterprises that are excluded from net income but recognized as a change in net debt and accumulated surplus during the period.

Pension Liability

An actuarial estimate of discounted future payments to be made to retirees under government pension plans, net of plan assets.

Premium/Discount

The amount by which the selling price of a security is greater or less than its par or face value.

Segment

A distinguishable activity or group of activities of a government for which it is appropriate to separately report financial information to help users of the SFS identify the resources allocated to support the major activities of a government.

Summary Financial Statements (SFS)

The statements prepared to account for the full nature and extent of the financial activities of organizations in the government reporting entity.

Tangible Capital Asset

An asset with physical substance held by the Government that has an economic life extending beyond a year, is to be used on a continuing basis and is not for sale in the ordinary course of operations.

Transfer

A transfer of money from a government to an individual, an organization or another government for which the government making the transfer does not: receive any goods or services directly in return, as would occur in a purchase/sale transaction; expect to be repaid in the future, as would be expected in a loan; or expect a financial return, as would be expected in an investment. Major types of transfers include entitlements, transfers under shared cost agreements and grants.
