*To Her Honour
The Honourable Vaughn Solomon Schofield
Lieutenant Governor of the Province of Saskatchewan*

Your Honour:

I have the honour to submit the main financial statements of the Government of the Province of Saskatchewan for the fiscal year ended March 31, 2012.

Respectfully submitted,

KEN KRAWETZ
*Deputy Premier
Minister of Finance*

Regina, Saskatchewan
June 2012

*The Honourable Ken Krawetz
Deputy Premier
Minister of Finance*

We have the honour of presenting the main financial statements of the Government of the Province of Saskatchewan for the fiscal year ended March 31, 2012.

Respectfully submitted,

CLARE ISMAN
Deputy Minister of Finance

TERRY PATON
Provincial Comptroller

Introduction

The 2011-12 Public Accounts of the Government of Saskatchewan are prepared in accordance with the *Financial Administration Act, 1993* and consist of two volumes.

Volume 1

Financial Statement Discussion and Analysis provides users of the Government's main financial statements with an overview of the Government's performance by presenting comparative financial highlights and variance analysis.

General Revenue Fund Financial Statements account for the financial transactions of the General Revenue Fund (GRF). The GRF is comprised of all Ministries of the Government. This is the fund into which all revenues are paid, unless otherwise provided for by legislation, and from which all expenses are appropriated by the Legislative Assembly.

Summary Financial Statements consolidate the financial transactions of the GRF, Crown corporations, agencies, boards and commissions. These consolidated statements provide an accounting of the full nature and extent of the financial affairs and resources controlled by the Government.

Supplementary Information contains unaudited information on:

- the Growth and Financial Security Fund;
- GRF public issue debentures;
- GRF debentures issued to the Minister of Finance of Canada; and
- a glossary of terms used throughout.

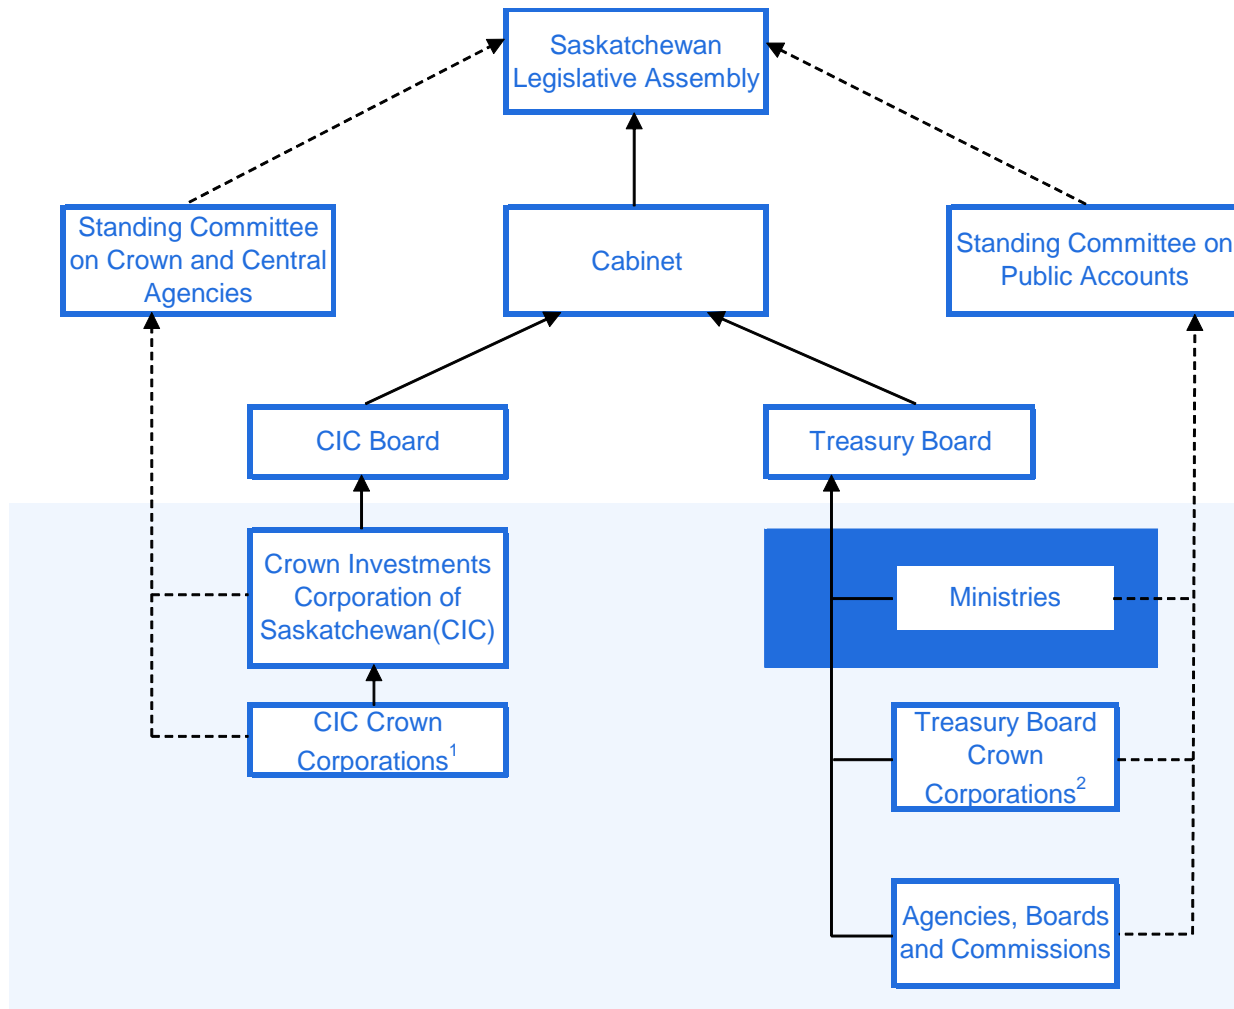

Volume 2

Volume 2 contains details on the revenue and expense of the GRF. It also provides details on capital asset acquisitions of the GRF; a listing of suppliers who received \$50,000 or more for goods and services and capital assets supplied to the GRF and Revolving Funds during the fiscal year; financial information on the assets, liabilities and residual balances of pension plans and trust funds administered by the Government; a listing of remissions of taxes and fees; and information on road-use fuel tax accountability.

The Public Accounts are available on the Internet at <http://www.finance.gov.sk.ca/public-accounts/>.

A Compendium is also available on the Internet at <http://www.finance.gov.sk.ca/public-accounts/> that contains the financial statements of various government agencies, boards, commissions, pension plans, special purpose funds and institutions, as well as Crown corporations which are accountable to Treasury Board.

Financial Reporting Structure

- General Revenue Fund financial statements
- Summary financial statements
- Financial control and reporting
- Financial reporting

¹ Examples of CIC Crown corporations are: SaskEnergy Incorporated, Saskatchewan Power Corporation, Saskatchewan Telecommunications Holding Corporation, Saskatchewan Government Insurance and Saskatchewan Transportation Company.

² Examples of Treasury Board Crown corporations are: Agricultural Credit Corporation of Saskatchewan, Liquor and Gaming Authority, and Saskatchewan Housing Corporation.

Financial Statement Discussion and Analysis

Financial Statement Discussion and Analysis

The purpose of the Financial Statement Discussion and Analysis is to provide users of the Government's main financial statements with an overview of the Government's financial performance, as well as the Government's accountability for the resources entrusted to it. This information should be read in conjunction with these main financial statements, the General Revenue Fund and Summary financial statements. The Government is responsible for the integrity and objectivity of this discussion and analysis.

General Revenue Fund (GRF) Financial Statements

❖ *How has the Government performed as compared to the Budget Estimates?*

The GRF is the fund where all public monies are deposited to and disbursed from, as authorized by the Legislative Assembly. Exceptions to this principle must be authorized by law. Each year the Government presents a Budget for the GRF to the Legislative Assembly along with a detailed financial plan for the GRF called the Estimates. The GRF financial statements report on the performance of the Government against the Estimates. As a result, budget-to-actual analysis on the Government's revenue and expense can be found in the GRF section of the Financial Statement Discussion and Analysis.

Summary Financial Statements (SFS)

❖ *How has the Government performed as a whole?*

The SFS provide an accounting of the full nature and extent of the financial affairs and resources controlled by the Government. The SFS include the financial results of the GRF, Crown corporations, agencies, boards and commissions.

General Revenue Fund Financial Statements

Financial Highlights

	2012		2011 Actual ²	Change from	
	Budget ¹	Actual ²		Budget ¹	2011 Actual
<i>(millions of dollars)</i>					
Revenue	10,794	11,120	11,061	326	60
Expense	10,679	11,066	10,965	386	100
Pre-transfer surplus	115	55	96	(60)	(41)
Transfer to the Growth and Financial Security Fund	(58)	(27)	(48)	30	20
Transfer from the Growth and Financial Security Fund	325	325	-	-	325
Net transfer from (to) the Growth and Financial Security Fund	267	298	(48)	30	345
Surplus	383	352	48	(30)	305
Financial assets		2,998	3,082		(84)
Less: Government general debt		(3,808)	(4,135)		328
Other liabilities		(2,750)	(2,623)		(127)
Net debt		(3,560)	(3,676)		116
Plus: Non-financial assets		3,413	3,177		236
Accumulated Deficit		(146)	(499)		352
Growth and Financial Security Fund Balance	738	708	1,006	(30)	(298)

Totals may not add due to rounding.

¹ The Budget Estimates do not include a statement of financial position.

² The Provincial Auditor's report indicates that, in her opinion, there are certain adjustments required to the General Revenue Fund financial statements.

Surplus

The 2011-12 General Revenue Fund (GRF) financial statements report a pre-transfer surplus of \$55 million, \$60 million less than budget. The decrease is due to a \$386 million increase in expense, largely as the result of flood and weather-related costs, partially offset by a \$326 million increase in revenue, primarily from increases in transfers from Crown entities, other own-source revenue and transfers from the federal government.

One-half of the pre-transfer surplus, or \$27 million, was transferred to the Growth and Financial Security Fund (GFSF). After a \$325 million transfer from the GFSF to the GRF for government debt reduction, the GRF posted a surplus of \$352 million in 2011-12, \$30 million less than budget.

Compared to 2010-11, the GRF surplus is \$305 million higher, largely due to the \$325 million transfer from the GFSF to the GRF for government debt reduction.

Growth and Financial Security Fund

The Government's Growth and Financial Security Fund, established to safeguard Saskatchewan's future, has a balance of \$708 million at March 31, 2012. This is after a \$27 million transfer from the GRF, representing half of the 2011-12 GRF pre-transfer surplus, less a \$325 million transfer to the GRF for government debt reduction.

General Revenue Fund Financial Statements

Financial Highlights (*continued*)

Debt

Government general debt at March 31, 2012 is \$3.81 billion, a decline of \$328 million over the past year and the lowest level since 1988.

Credit Rating Upgrade

In May 2011, the Province received a credit rating upgrade from Standard & Poor's, moving it to the highest level possible. For the first time in Saskatchewan's history, the credit rating is at the AAA level. Standard & Poor's attributed the rating upgrade to Saskatchewan's low and declining debt burden, a rebounding economy, strong liquidity and only moderate reliance on support from the federal government.

General Revenue Fund Financial Statements

Surplus

The GRF annual results for the past ten years were as follows:

Annual Surplus - 10 Year Trend

* Since 2004-05, tangible capital assets have been capitalized and expensed over their useful lives rather than being fully expensed in the year of acquisition.

Accumulated Deficit

The accumulated deficit represents the Government's reported net economic resources. An accumulated deficit indicates that a government has financed past annual operating deficits by borrowing. In 2011-12, the GRF accumulated deficit improved from \$499 million to \$146 million.

The GRF accumulated deficit for the past ten years was as follows:

Accumulated Deficit - 10 Year Trend

* Since 2004-05, tangible capital assets have been capitalized and expensed over their useful lives rather than being fully expensed in the year of acquisition.

General Revenue Fund Financial Statements

Revenue

The GRF sources of revenue for 2011-12 were as follows:

2011-12 Revenue by Source (\$11.12 billion)

In the last five fiscal years, the GRF revenue was derived from the following sources:

Revenue by Source - 5 Year Comparison

General Revenue Fund Financial Statements

Revenue (continued)

Total revenue was \$11.12 billion in 2011-12, an increase of \$326 million, or 3.0 per cent, from budget due to increases in all categories except taxation and non-renewable resources. Compared to 2010-11, GRF revenue increased \$60 million, or 0.5 per cent. The increase from the previous year is primarily due to higher non-renewable resources revenue and transfers from the federal government. A comparison of budget, current year and prior year by revenue source is illustrated below.

Revenue by Source – Comparison of Budget, Current Year and Prior Year

Taxation Revenue

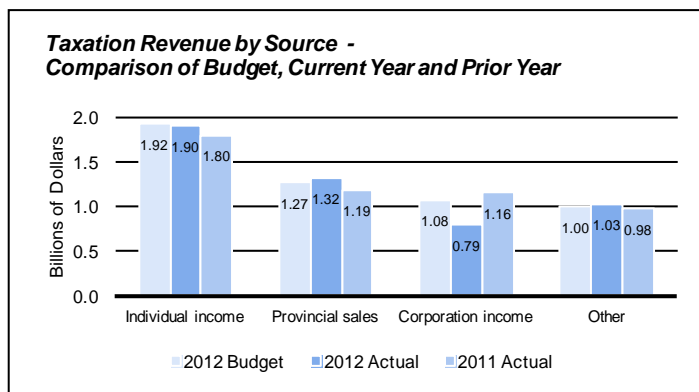

Taxation revenue was \$5.04 billion in 2011-12, a decrease of \$232 million from budget primarily due to lower Corporation Income Tax, partially offset by higher Provincial Sales Tax revenue. Compared to 2010-11, taxation revenue decreased by \$96 million as a result of lower Corporation Income Tax.

Corporation Income Tax (CIT) revenue was \$794 million in 2011-12, \$287 million lower than budgeted. The decrease is due to weaker-than-budgeted final assessment data for 2010, combined with higher-than-expected tax credit claims, which results in a large negative prior-year adjustment payment. Compared to 2010-11, CIT revenue was \$361 million lower as a result of a significant decline in the prior-year adjustment between the two years, partially offset by increased instalment payments resulting from growth in the national corporate tax base.

Individual Income Tax revenue was \$1.90 billion in 2011-12, \$18 million lower than budgeted primarily due to a negative prior-year reconciliation payment related to weaker-than-expected tax assessments for 2010.

Compared to 2010-11, revenue was \$102 million higher due to growth in the taxable income base, supplemented by an improvement in the prior-year adjustment between the two years.

Provincial Sales Tax (PST) revenue was \$1.32 billion in 2011-12, an increase of \$51 million from budget largely due to higher-than-expected economic activity and strong retail sales. Compared to 2010-11, PST revenue increased \$135 million due to continued growth in the provincial economy.

General Revenue Fund Financial Statements

Revenue (continued)

Other tax revenue (including fuel, tobacco and other miscellaneous taxes) was a combined \$21 million higher than budgeted, largely due to increased fuel tax revenue which resulted from stronger-than-expected economic activity and an extended construction season due to mild weather. Compared to 2010-11, other tax revenue increased \$28 million as a result of economic growth and a growing population.

Non-renewable Resources Revenue

Non-renewable resources revenue is one of the Government's most volatile revenue sources because it is largely susceptible to changes in factors beyond the control of the Government, particularly market demand and commodity prices.

In 2011-12, non-renewable resources revenue was \$2.82 billion, a decrease of \$7 million from budget. The decrease was largely due to lower-than-budgeted revenue from Crown land sales, partially offset by an increase in oil and potash revenue. Compared to 2010-11, revenue was \$294 million higher, largely as the result of increases in oil and potash revenue.

Oil revenue was \$1.53 billion in 2011-12. This is an increase of \$119 million from budget primarily due to higher-than-budgeted well-head prices resulting from higher West Texas Intermediate (WTI) oil prices, partially offset by a higher exchange rate. Compared to 2010-11, oil revenue increased \$255 million, primarily due to higher prices.

WTI oil prices averaged 97.33 U.S. dollars per barrel in 2011-12, an increase of 3.58 U.S. dollars from the budget assumption of 93.75 U.S. dollars. In 2010-11, WTI oil prices averaged 83.37 U.S. dollars.

The Canadian dollar averaged 100.76 U.S. cents in 2011-12, an increase of 0.94 U.S. cents from the budget assumption of 99.82 U.S. cents. In 2010-11, the dollar averaged 98.40 U.S. cents.

Crown land sales revenue was \$236

million in 2011-12, down \$201 million from budget. The amount of land sold was lower than budget expectations as a result of an industry focus toward drilling and developing lands accumulated over the past several years. In 2010-11, the sale of Crown petroleum and natural gas rights generated \$467 million for the GRF.

Potash revenue was \$438 million in 2011-12, an increase of \$57 million from budget due to higher prices, partially offset by a decline in sales volumes.

On a fiscal-year basis, the average mine netback (price) increased from the budget assumption of 393 U.S. dollars per KCl tonne to 426 U.S. dollars per KCl tonne (from \$646 to \$693 per K₂O tonne). Potash sales volumes decreased from the budget assumption of 10.4 million K₂O tonnes to 10.0 million K₂O tonnes.

Compared to 2010-11, potash revenue increased \$176 million. The increase is largely due to an increase in the average mine netback (price), from 348 U.S. dollars per KCl tonne in 2010-11 to 426 U.S. dollars per KCl tonne in 2011-12 (from \$580 to \$693 per K₂O tonne).

Transfers from Government Entities

Transfers from Government entities were \$782 million in 2011-12, an increase of \$194 million from budget. The GRF received a \$120 million unbudgeted special dividend from the Crown Investments Corporation of Saskatchewan (CIC) to help offset costs associated with flooding throughout the Province.

General Revenue Fund Financial Statements

Revenue *(continued)*

In addition, Saskatchewan Liquor and Gaming Authority (SLGA) net income increased by \$44 million due to increases in both the gaming and liquor segments.

Transfers from other enterprises and funds increased \$30 million from budget, largely as a result of a \$25 million unbudgeted one-time dividend received from the Agricultural Credit Corporation of Saskatchewan (ACS) to return surplus funds.

Compared to 2010-11, transfers decreased \$183 million as the result of lower CIC dividends, partially offset by increased SLGA net income and the non-recurring ACS dividend in 2011-12.

Other Own-Source Revenue

Other own-source revenue was \$755 million in 2011-12, an increase of \$214 million from budget.

Commercial operations accounted for \$100 million of the increase from budget. Ministries with commercial operations are allowed to re-spend the revenue earned through these operations. Accordingly, the budget expense is shown net of revenue in the Estimates. In the Public Accounts, revenue and expense are reported on a gross basis to provide accountability for these operations. This results in variances between the budget and actual revenue being shown in the Public Accounts. However, including commercial revenue in the Public Accounts does not impact the GRF surplus because the equivalent, offsetting commercial expense is also reported in the GRF financial statements.

The remainder of the increase from budget was largely due to higher interest, premiums, discounts and exchange revenue due to unbudgeted gains on the sale of investments.

Compared to 2010-11, other own-source revenue decreased \$81 million primarily due to a decrease in refunds of prior-year expense, partially offset by higher interest, premiums, discounts and exchange earnings and motor vehicle fees revenue.

Transfers from the Federal Government

Federal transfers were \$1.73 billion in 2011-12, a \$158 million increase from budget. The increase is due to an increase in other cost-sharing transfers, primarily federal disaster assistance funding. Compared to 2010-11, federal transfers were \$126 million higher due to an increase in other cost-sharing transfers, primarily disaster assistance funding, as well as legislated increases in Canada Health Transfer and Canada Social Transfer funding.

General Revenue Fund Financial Statements

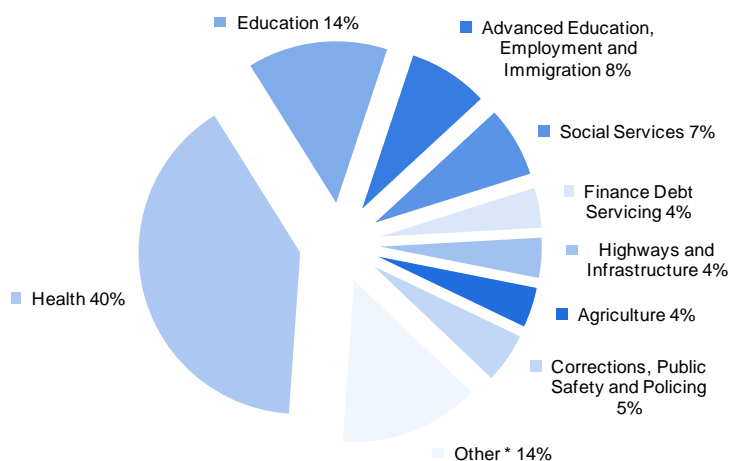

Expense

Expense is reported by ministry in the GRF Statement of Operations. Because the Government's expense budget for the GRF is organized by ministry, this best provides a comparison of actual to budget. Schedules to the GRF financial statements also disclose expense by theme and by object, which provide information on the purpose for which the expense has been incurred. These best allow for comparison from year to year as programs maintain the same theme and object when the Government undergoes reorganization of ministries.

Expense by Ministry

The GRF expense by ministry for 2011-12 was as follows:

2011-12 Expense by Ministry (\$11.07 billion)

* Key components of "other" include Municipal Affairs (3%), Finance (3%) and Environment (2%).

Comparison to Budget

Total expense was \$11.07 billion in 2011-12, \$386 million higher than budget, primarily due to costs associated with flood relief and assistance. Key changes in expense reported by ministries are explained below.

Ministry of Corrections, Public Safety and Policing expense was \$150 million higher than budgeted, primarily due to claims under the Provincial Disaster Assistance Program.

Ministry of Education expense was \$132 million higher than budgeted, primarily due to a net increase in teachers' salaries resulting from the new collective bargaining agreement, increased requirements for the Teachers' Superannuation Plan and an increase for school capital projects.

Commercial Operations accounted for \$99 million of the increase from budget. Ministries with commercial operations are allowed to re-spend the revenue earned through these operations. Accordingly, the budget expense is shown net of revenue in the Estimates. In the Public Accounts, revenue and expense are reported on a gross basis to provide accountability for these operations. This results in variances between the budget and actual expense being shown in the Public Accounts. However, including commercial expense in the Public Accounts does not impact the GRF surplus because the equivalent, offsetting commercial revenue is also reported in the GRF financial statements.

Ministry of Highways and Infrastructure expense was \$63 million higher than budgeted, primarily due to costs incurred to repair flood-damaged infrastructure.

Ministry of Agriculture expense was \$22 million higher than budgeted, primarily due to the provincial contribution to the Canada-Saskatchewan Excess Moisture Program, partially offset by lower AgriStability contributions.

General Revenue Fund Financial Statements

Expense (continued)

Ministry of Environment expense was \$20 million higher than budgeted, primarily due to an increase in transfers to the Saskatchewan Watershed Authority for flood relief and mitigation projects.

Ministry of Finance expense was \$18 million higher than budgeted, primarily due to higher-than-budgeted Research and Development Tax Credit claims.

Ministry of Health expense was \$62 million lower than budget, primarily due to lower-than-budgeted utilization in Physician Services and the Saskatchewan Prescription Drug Plan.

Ministry of Social Services expense was \$27 million lower than budgeted, primarily due to space development for individuals with intellectual disabilities, as well as children, occurring later than anticipated. In addition, some programs' caseloads and costs are lower than budgeted.

Ministry of Municipal Affairs expense was \$14 million lower than budgeted, primarily due to lower funding for federal-provincial-municipal infrastructure programs as a result of competitive pricing on tender bids and weather-related project delays.

Finance Debt Servicing expense was \$8 million lower than budgeted, primarily due to lower-than-anticipated requirements for general debt of Crown Corporations and lower-than-anticipated short-term interest rates.

Expense by Theme

The GRF expense by theme for 2011-12 was as follows:

2011-12 Expense by Theme (\$11.07 billion)

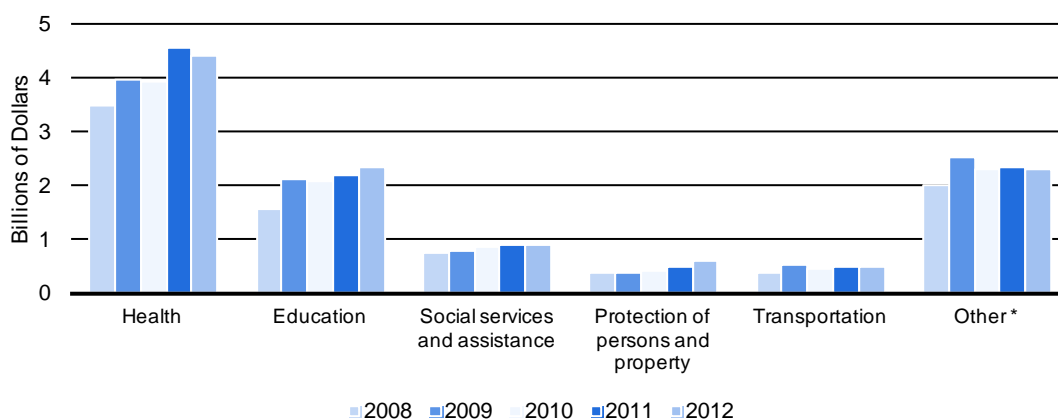

* Key components of "other" include community development (4%), agriculture (4%), debt servicing (4%), environment and natural resources (2%) and economic development (2%).

General Revenue Fund Financial Statements

Expense (continued)

In the last five fiscal years, the GRF expense by theme was as follows:

Expense by Theme - 5 Year Comparison

* Key components of "other" include community development (\$448 million), agriculture (\$440 million), debt servicing (\$412 million), environment and natural resources (\$210 million) and economic development (\$195 million).

Comparison to Previous Year

Total expense was \$100 million higher than in 2010-11. Key changes in expense reported by theme are explained below.

Protection of persons and property was \$135 million higher than the prior year mainly due to additional Provincial Disaster Assistance Program payments for spring flooding as well as an increase in the RCMP contract primarily to fund additional officers.

Education was \$134 million higher than in 2010-11, primarily due to increases in teachers' salaries, contributions to the Teachers' Superannuation Fund, and increased funding for universities and colleges. These increases are partially offset by a reduction in post-secondary capital funding.

Transportation increased by \$30 million over the prior year. This increase was largely due to increased highway work to repair damage from spring flooding. There was also an increase in funding for Global Transportation Hub infrastructure.

Health decreased by \$148 million over the prior year primarily due a reduction in capital funding. 2010-11 capital funding was higher due to funding for the Saskatchewan Children's Hospital, long-term care facilities, medical equipment replacements as well as facility repairs and capital for the Saskatchewan Surgical Initiative. These decreases are partially offset by increased funding to regional health authorities for increased surgical volumes, annual salary increments and inflation.

Agriculture was \$43 million lower than in 2010-11, primarily due to a decrease in AgriStability program costs resulting from higher producer income. This decrease is partially offset by an increase in Crop Insurance program premiums due to increased program uptake.

Economic development decreased by \$38 million largely due to a decrease in costs for the remediation of abandoned uranium mine sites.

General Revenue Fund Financial Statements

Expense (continued)

Expense by Object

The GRF expense by object for 2011-12 was as follows:

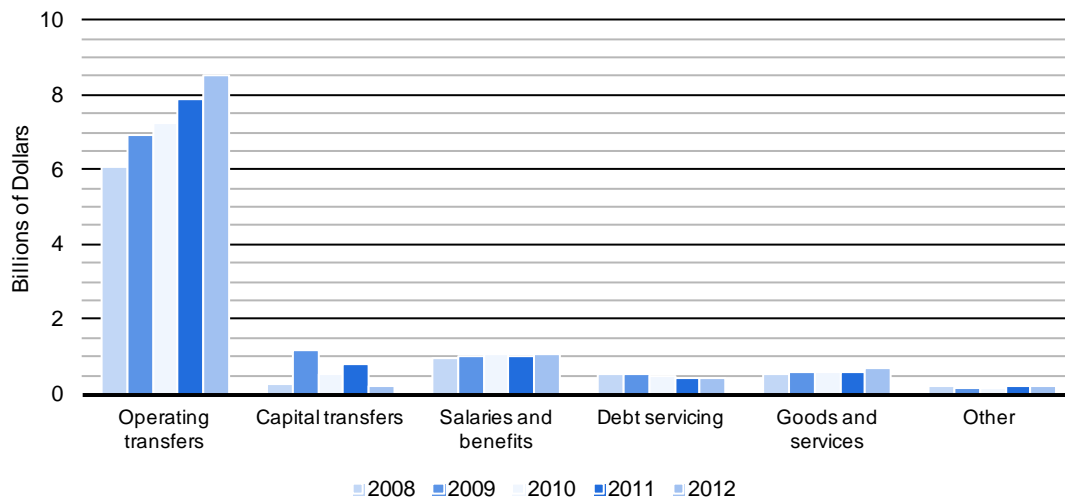

2011-12 Expense by Object (\$11.07 billion)

* The key component of "other" is amortization of tangible capital property.

In the last five fiscal years, the GRF expense by object was as follows:

Expense by Object - 5 Year Comparison

General Revenue Fund Financial Statements

Public Debt and Debt Servicing Costs

Public Debt

Public debt consists of gross debt net of sinking funds and includes:

- government general debt, which is debt issued by the GRF to fund government spending;
- Crown corporation general debt, which is debt issued by the GRF and subsequently loaned to a Crown corporation; and
- government business enterprise specific debt, which is debt of self-sufficient Crown corporations issued by the GRF specifically on their behalf. The Government expects to realize the receivables from the government business enterprises and settle the external debt simultaneously.

The Government has undertaken initiatives to significantly reduce the government general debt outstanding and the costs to service this debt. The Government's debt reduction strategy includes the following components:

- paying down existing debt;
- transferring debt borrowed for general government purposes to Crown corporations to meet their borrowing requirements; and
- increasing sinking fund contributions.

At March 31, 2012, government general debt was \$3.81 billion.

The GRF public debt for the past ten years was as follows:

Public Debt - 10 Year Trend

Since 2002-03, the government general debt reported on the GRF Statement of Financial Position has declined by \$4.01 billion from \$7.82 billion to \$3.81 billion.

Crown corporation general debt and government business enterprise specific debt have remained relatively constant since 2002-03 and at March 31, 2012 mainly include \$2.74 billion for Saskatchewan Power Corporation, \$928 million for SaskEnergy Incorporated and \$522 million for Saskatchewan Telecommunications Holding Corporation.

General Revenue Fund Financial Statements

Public Debt and Debt Servicing Costs (*continued*)

Debt Servicing Costs

The GRF incurs interest and other costs to service general debt. The amount of these costs is determined by the amount of general debt and the interest rate attached to that debt. The average effective interest rate on gross debt during 2011-12 was 6.2 per cent (2010-11 – 6.3 per cent).

The Government’s debt reduction strategy has resulted in a decrease in debt servicing costs and an increase in interest revenue. While paying down existing debt reduces the cost of debt servicing, contributing to sinking funds increases interest earnings.

Net interest cost is calculated as debt servicing costs less interest earnings. It is a measure of the positive impact on the Province’s operations from reducing general debt.

The GRF has reported the following debt servicing costs and net interest costs over the past ten years:

Debt Servicing & Net Interest Costs - 10 Year Trend

Since 2002-03, both the amount of general debt and the level of interest rates have declined. As a result, the debt servicing costs reported by the GRF have decreased from \$669 million in 2002-03 to \$412 million in 2011-12. At the same time, interest revenue has increased, resulting in a reduction in net interest costs from \$552 million in 2002-03 to \$171 million in 2011-12.

General Revenue Fund Financial Statements

Investment in Infrastructure

The Government invests in infrastructure in two ways:

- by providing grants to third parties for capital purposes. This includes grants for universities and hospitals; and
- by investing in government-owned capital, such as highways.

During 2011-12, \$612 million was invested in infrastructure. The Government's investment in infrastructure over the past five years is presented below.

Investment in Infrastructure - 5 Year Trend

* Capital transfers for 2009 include \$154 million which was subsequently permitted to be used by recipients for operations.

General Revenue Fund Financial Statements

Net Debt

Net debt is one measure of the amount of debt that has been left to future generations. It is the difference between the GRF liabilities and financial assets.

During 2011-12, net debt decreased by \$116 million. This decrease can be attributed to the GRF surplus of \$352 million, partially offset by amounts invested in tangible capital assets and other non-financial assets.

Since 2002-03, the net debt of the GRF has declined from \$7.01 billion to \$3.56 billion, as follows:

Net Debt - 10 Year Trend

A decreasing net debt is an indicator of increased flexibility over future spending.

Growth and Financial Security Fund

The Growth and Financial Security Fund (GFSF) was established during 2008-09 under *The Growth and Financial Security Act*. At that time, the balances in the Fiscal Stabilization Fund and the Saskatchewan Infrastructure Fund were transferred to the GFSF. *The Growth and Financial Security Act* requires:

- the Government to balance the GRF budget each fiscal year;
- the annual preparation of four-year financial plans and public debt management plans; and
- that 50 per cent of the annual surplus in the GRF be transferred to the GFSF.

The balance in the GFSF for the past five years was as follows:

Growth and Financial Security Fund Balance - 5 Year Trend

The balance in the GFSF at March 31, 2012 was \$708 million. This represents a \$298 million decrease from the previous year, which is the net result of:

- a transfer to the fund of \$27 million, representing 50 per cent of the GRF pre-transfer surplus; and
- a transfer from the fund of \$325 million for government debt reduction.

Growth and Financial Security Fund - Current Year Activity

(millions of dollars)

	2012
Opening balance	1,006
Transfer from the GRF (50 per cent of GRF pre-transfer surplus)	27
Transfer to the GRF	(325)
Closing balance	708

Summary Financial Statements

Financial Highlights

<i>(millions of dollars)</i>	2012	2011	Change from 2011
Revenue	12,817	12,328	489
Expense	13,711	13,311	401
Deficit from government service organizations	(894)	(983)	89
Income from government business enterprises	789	970	(181)
Deficit	(105)	(13)	(92)
Financial assets	9,102	10,270	(1,168)
Less: Liabilities	(13,646)	(14,053)	408
Net debt	(4,543)	(3,783)	(760)
Plus: Non-financial assets	7,161	6,744	416
Accumulated Surplus	2,617	2,961	(344)

Totals may not add due to rounding.

Reporting Entity

The Summary financial statements (SFS) include the financial activities of organizations controlled by the Government. These organizations are segregated into two classifications, government service organizations (GSOs) and government business enterprises (GBEs). GBEs are self-sufficient government organizations that have the financial and operating authority to sell goods and services to individuals and organizations outside the government reporting entity as their principal activity. All other organizations, including the General Revenue Fund, are GSOs. A complete listing of the organizations included in the government reporting entity is provided in schedule 18 of the SFS.

Deficit

Comparison to Previous Year

The deficit of \$105 million in 2011-12 was \$92 million larger than the \$13 million deficit reported in 2010-11. This was primarily due to a \$181 million reduction in income from GBEs. This decrease was mainly the result of above average insurance claims together with a decline in investment earnings.

This was partially offset by an \$89 million improvement in the net operating results of GSOs. Revenue from GSOs increased in 2011-12 by \$489 million, primarily due to increases in non-renewable resources (\$294 million), other own-source revenue (\$197 million) and transfers from the federal government (\$110 million). At the same time, expense for GSOs increased in 2011-12 by \$401 million, primarily in health (\$215 million), protection of persons and property (\$149 million) and social services and assistance (\$68 million).

Summary Financial Statements

Financial Highlights (*continued*)

Comparison to Budget

The Government prepares a Summary Financial Budget, which is based on the entities that are included in the SFS. In this budget, the categorization of organizations is aligned with the Cabinet Committee (CIC Board or Treasury Board) that examines an organization's budget. There is also a category for Not-for-Profit Insurance organizations, which are intended to be actuarially sound over the long term. As the categorization is different than that used for reporting purposes in the SFS, actual results are most easily compared to budget based on the annual surplus/deficit.

2011-12 Deficit - Comparison to Budget <i>(millions of dollars)</i>	2012		Change from Estimated
	Estimated¹	Actual¹	
Treasury Board Organizations			
General Revenue Fund	383	352	(30)
Growth and Financial Security Fund	(267)	(298)	(30)
Other Treasury Board Organizations	213	447	234
<i>Less: Dividends included in General Revenue Fund surplus</i>	(430)	(502)	(72)
Adjustment for pension liability accrual	(207)	(127)	80
	(309)	(127)	181
CIC Board Organizations			
	348	407	59
<i>Less: Dividends included in General Revenue Fund surplus</i>	(120)	(240)	(120)
	(81)	40	121
Not-for-Profit Insurance Organizations			
	135	(145)	(280)
(Deficit) Surplus	54	(105)	(159)

Totals may not add due to rounding.

¹ Presented on the basis of the Summary Financial Budget.

The 2011-12 SFS report a deficit of \$105 million, a \$159 million variance from the \$54 million budget surplus. This decline was largely due to budget-to-actual variances in the not-for-profit insurance organizations where above average insurance claims were experienced.

Credit Rating Upgrade

In May 2011, the Province received a credit rating upgrade from Standard & Poor's, moving it to the highest level possible. For the first time in Saskatchewan's history, the credit rating is at the AAA level. Standard & Poor's attributed the rating upgrade to Saskatchewan's low and declining debt burden, a rebounding economy, strong liquidity and only moderate reliance on support from the federal government.

Summary Financial Statements

Surplus/Deficit

The SFS have reported the following results over the past ten years:

Annual Surplus (Deficit) - 10 Year Trend

* Since 2003-04, tangible capital assets have been capitalized and expensed over their useful lives rather than being fully expensed in their year of acquisition.

Accumulated Surplus

The accumulated surplus represents the Government's reported net economic resources. An accumulated surplus indicates that a government has net resources that can be used to provide future services. The SFS accumulated surplus (deficit) for the past ten years was as follows:

Accumulated Surplus (Deficit) - 10 Year Trend

* Since 2003-04, tangible capital assets have been capitalized and expensed over their useful lives rather than being fully expensed in their year of acquisition.

** Includes a \$1.58 billion increase for the first-time inclusion of the Boards of Education.

Summary Financial Statements

Revenue

The SFS sources of revenue for 2011-12 were as follows:

2011-12 Revenue by Source (\$12.82 billion)

In the last five fiscal years, the SFS revenue was derived from the following sources:

Revenue by Source - 5 Year Comparison

* The increase in 2010 taxation revenue is primarily due to the impact of recording education property tax resulting from the first-time inclusion of Boards of Education.

Total revenue for the year was \$489 million higher than the previous year. Changes in taxation, non-renewable resources and transfers from the federal government are mainly attributable to the results of the General Revenue Fund. Detailed variance analysis of GRF revenue is provided in the GRF section beginning on page 13 of the Financial Statement Discussion and Analysis.

Summary Financial Statements

Expense

Expense by Theme

The SFS expense by theme for 2011-12 was as follows:

2011-12 Expense by Theme (\$13.71 billion)

* Key components of "other" include debt charges (5%), transportation (4%) and community development (4%).

The following is a five year comparison of expense by theme as a percentage of total expense:

Expense by Theme as a Percentage of Total Expense - 5 Year Comparison

* Key components of "other" include debt charges (5%), transportation (4%) and community development (4%).

Summary Financial Statements

Expense (continued)

In the last five fiscal years, the SFS expense by theme was as follows:

Expense by Theme - 5 Year Comparison

* Key components of "other" include debt charges (\$682 million), transportation (\$537 million) and community development (\$528 million).

Summary Financial Statements

Expense (continued)

Expense by Object

In addition to reporting expense by theme, the SFS also present expense by object, or major type of expense. The SFS expense by object for 2011-12 was as follows:

2011-12 Expense by Object (\$13.71 billion)

* The key component of "other" is amortization of tangible capital property.

In the last five fiscal years, the SFS expense by object was as follows:

Expense by Object - 5 Year Comparison

* The increase in 2010 salaries and benefits expense and corresponding decrease in transfers expense are primarily due to the impact of the first-time inclusion of Boards of Education.

Summary Financial Statements

Income from Government Business Enterprises

Government business enterprises are independently managed, profit-oriented organizations that are controlled by the Government. The SFS reported the following income from government business enterprises over the past ten years:

Income from Government Business Enterprises - 10 Year Trend

* Beginning in 2011-12, the financial statements of government business enterprises (GBEs) are prepared in accordance with International Financial Reporting Standards. Prior to this, the financial results of GBEs were presented on the basis of Canadian generally accepted accounting principles and have not been restated.

Income from GBEs decreased by \$181 million over the previous year mainly due to above average insurance claims and a reduction in investment earnings.

Since 2002-03, this income source has experienced an overall increase of \$336 million. One of the major contributing factors to this growth has been the increase in net income of the Liquor and Gaming Authority and the Saskatchewan Telecommunications Holding Corporation.

Summary Financial Statements

Public Debt and Debt Charges

Public Debt

Public debt consists of gross debt net of sinking funds and includes:

- general debt, which is:
 - debt issued by the GRF and other government service organizations; and
 - debt issued by government service organizations and subsequently loaned to government business enterprises; and
- government business enterprise specific debt, which is debt issued by the GRF specifically on behalf of government business enterprises where the Government expects to realize the receivables from the government business enterprises and settle the external debt simultaneously.

Public debt on the Summary Statement of Financial Position is presented net of government business enterprise specific debt. The SFS public debt for the past ten years was as follows:

Public Debt - 10 Year Trend

At March 31, 2012, the SFS report public debt of \$4.58 billion. Since 2002-03, public debt has declined \$4.01 billion, from \$8.59 billion to \$4.58 billion.

At March 31, 2012, government business enterprise specific debt was \$3.92 billion. Government business enterprise specific debt is included in the Investment in (or net assets of) Government Business Enterprises reported on the Summary Statement of Financial Position and disclosed in schedule 3 of the SFS. Since 2002-03, government business enterprise specific debt has increased from \$3.12 billion to \$3.92 billion.

Summary Financial Statements

Public Debt and Debt Charges (*continued*)

Debt Charges

The Government incurs interest and other costs to service its public debt. The amount of these costs is determined by the amount of public debt and the interest rate attached to that debt. The average effective interest rate on gross debt during 2011-12 was 6.2 per cent (2010-11 – 6.4 per cent).

Debt Charges - 10 Year Trend

Net Debt

Net debt is one measure of the amount of debt that has been left to future generations. It is the difference between the SFS liabilities and its financial assets.

During 2011-12, net debt increased by \$760 million. This increase can primarily be attributed to the SFS deficit of \$105 million plus \$416 million net investment in tangible capital assets and other non-financial assets.

Since 2002-03, the net debt of the SFS has declined from \$9.28 billion to \$4.54 billion, as follows:

Net Debt - 10 Year Trend

Lower levels of net debt indicate increased flexibility over future spending.

Summary Financial Statements

Financial Assets

Financial assets represent the amount of resources that are available to the Government that can be converted to cash to meet obligations or fund operations. In the past five years, the SFS financial assets were as follows:

Financial Assets - 5 Year Trend

* In 2011-12, primarily accounts receivable (\$1.58 billion) and other investments (\$.99 billion).

Liabilities

Liabilities represent the obligations that the Government has to others arising from past transactions or events. In the past five years, the SFS liabilities were as follows:

Liabilities - 5 Year Trend

* In 2011-12, primarily accounts payable (\$2.07 billion).

From 2007-08 to 2011-12, liabilities decreased by \$1.20 billion. This is the net result of a \$2.84 billion decrease in public debt, partially offset by a \$1.26 billion increase in pension liabilities. Information relating to public debt can be found in more detail in the public debt and debt charges section found on page 34.

The total pension liability has increased from \$5.06 billion in 2007-08 to \$6.32 billion in 2011-12. The increase is due to pension costs, including interest on the pension liabilities and amortization of actuarial losses, exceeding payments to the pension plans and retirees.

Summary Financial Statements

Non-financial Assets

Non-financial assets typically represent resources that the Government can use to provide services in the future. Non-financial assets primarily consist of tangible capital assets but also include inventories held for consumption and prepaid expenses.

Tangible Capital Assets

The Statement of Financial Position reports the net book value of tangible capital assets held by government service organizations and does not include the capital assets held by government business enterprises. Capital assets held by government business enterprises is \$8.22 billion at March 31 and are included in the Investment in (or net assets of) Government Business Enterprises reported on the Statement of Financial Position and disclosed in schedule 3 of the SFS. The net book value of capital assets of government service organizations in the past five years is as follows:

Net Book Value of Tangible Capital Assets - 5 Year Trend

* The increase in net book value of tangible capital assets in 2010 is primarily due to the impact of the first-time inclusion of Boards of Education.

The net book value represents the original cost of capital assets net of accumulated amortization and write-downs in value. The net book value of capital assets held by the Government has steadily increased over the last five years illustrating how the Government is acquiring new or replacing existing tangible capital assets faster than these same assets are wearing out or becoming obsolete.

Acquisition of tangible capital assets in 2011-12 was \$900 million. These capital additions were mainly for infrastructure (\$343.1 million), buildings and improvements (\$327.7 million) and office and information technology (\$109.5 million) made primarily in the transportation, education and health sectors.

Summary Financial Statements

Credit Rating

The improvement in the Government's finances has led to a series of upgrades in its credit ratings. One of the world's leading credit rating agencies is Standard & Poor's. Its credit rating for the Province of Saskatchewan at March 31, each fiscal year since 2002-03 is shown below.

Standard & Poor's Credit Rating from 2002-03 to 2011-12

At March 31, 2012, the credit ratings for Saskatchewan and each of the other jurisdictions are shown below. In May 2011, Standard & Poor's upgraded Saskatchewan's credit rating from AA+ to AAA. Saskatchewan was the only jurisdiction to receive a credit rating upgrade at that time.

Credit Ratings - March 2012

Jurisdiction	Rating Agency ¹		
	Moody's Investors Service Inc.	Standard & Poor's	Dominion Bond Rating Service
Alberta	Aaa	AAA	AAA
British Columbia	Aaa	AAA	AA(high)
Saskatchewan	Aa1	AAA	AA
Manitoba	Aa1	AA	A(high)
Ontario	Aa1*	AA-	AA (low)
Quebec	Aa2	A+	A(high)
New Brunswick	Aa2	AA-*	A(high)
Nova Scotia	Aa2	A+	A
Newfoundland & Labrador	Aa2	A+	A
Prince Edward Island	Aa2	A	A(low)

¹ The rating agencies assign letter ratings to borrowers. The major A bracket categories, in descending order of credit quality, are: AAA/Aaa; AA/Aa; A. The '1', '2', '3', 'high', 'low', '-', and '+' modifiers show relative standing within the major categories. For example, AAA exceeds AA, Aa1 exceeds Aa2 and AA exceeds AA-.

* negative outlook or trend.

Summary Financial Statements

Assessment of Financial Condition

Financial condition describes a government's financial health or its ability to meet its existing financial obligations, both with respect to its service commitments to the public and its financial commitments to creditors, employees and others. The following assessment of the Government's financial condition considers three elements: sustainability, flexibility and vulnerability.

Sustainability

Sustainability is the degree to which a government can maintain its existing service commitments and meet its existing financial obligations without increasing its debt or tax burden relative to the economy within which it operates.

Net Debt to the Province's Gross Domestic Product

Gross domestic product (GDP) is a measure of the value of the goods and services produced during a year, indicating the size of the provincial economy. Net debt is the difference between a government's liabilities and financial assets and represents the future revenue that is required to pay for past transactions and events. Net debt as a percentage of the Province's GDP provides a measure of the level of financial demands placed on the economy by the Government's spending and taxation policies. A higher ratio means the net debt of the Government is more onerous on the economy, which may not be sustainable. Therefore, a lower net debt to GDP ratio is desired and indicates higher sustainability.

Net Debt as a Percentage of the Province's Gross Domestic Product - 10 Year Comparison

The overall downward trend illustrated by this ratio is a result of growth in the provincial economy together with a declining net debt over the ten-year period.

Summary Financial Statements

Assessment of Financial Condition *(continued)*

Net Debt to Total Revenue

Another measure of a government's sustainability is net debt as a percentage of total revenue. Net debt provides a measure of the future revenue that is required to pay for past transactions and events. A lower net debt to revenue ratio indicates higher sustainability, as less time is required to eliminate net debt.

Net Debt as a Percentage of Total Revenue - 10 Year Comparison

When expressed as a percentage of total revenue, the Government's net debt has declined from 132.1 per cent to 35.4 per cent of total revenue since 2002-03. The reduction in this ratio indicates that the Government's annual revenue has been sufficient not only to pay for current transactions and events, but also to pay off a portion of past deficits.

Summary Financial Statements

Assessment of Financial Condition *(continued)*

Flexibility

Flexibility is the degree to which a government can change its debt or tax burden and still meet its existing service commitments and financial obligations.

Debt Charges to Total Revenue

A debt charges to revenue ratio, often referred to as the interest bite, indicates the proportion of provincial revenue that is required to pay interest charges on public debt and therefore, is not available to pay for essential public services and programs. A lower ratio means that there is more money available to provide government services.

Debt Charges as a Percentage of Total Revenue - 10 Year Comparison

Over the last ten years, the interest bite has decreased due to both increased revenue and decreased interest costs. In 2011-12, the Government spent approximately 5.3 cents of each dollar of revenue on debt charges on public debt, compared to 12.8 cents in 2002-03. This reduction leaves more resources available to the Government to provide services without increasing its revenue.

Summary Financial Statements

Assessment of Financial Condition *(continued)*

Own-source Revenue to the Province's Gross Domestic Product

This ratio measures the extent to which the Government is taking income out of the provincial economy, either through taxation or user fees. An increase in this ratio indicates that the Government's own-source revenue is growing faster than the economy, reducing the Government's flexibility to increase revenue without slowing the growth of the provincial economy.

Own-source Revenue as a Percentage of the Province's Gross Domestic Product - 10 Year Comparison

Own-source revenue as a percentage of GDP has remained relatively stable over the last ten years meaning that the Government has not significantly changed its demands on the provincial economy over this time. This indicates that the Government's flexibility is largely unchanged over the last ten years.

Summary Financial Statements

Assessment of Financial Condition (*continued*)

Vulnerability

Vulnerability is the degree to which a government is dependent on sources of funding outside of its control or is exposed to risks that could impair its ability to meet its existing service commitments and financial obligations.

Transfers from the Federal Government to Total Revenue

The Government has no control over the amount of federal transfers that it receives each year. Transfers from the federal government as a percentage of total revenue is therefore an indicator of the degree of vulnerability the Government has as a result of reliance on the federal government for revenue. Generally, a decreasing ratio indicates that a government is less reliant on federal transfers to fund its programs, making it less vulnerable.

For the past ten years, the percentage of total revenue attributable to transfers from the federal government was as follows:

Transfers from the Federal Government as a Percentage of Total Revenue - 10 Year Comparison

In 2011-12, 17.3 per cent of the Government's revenue came from transfers from the federal government with the remainder coming from Saskatchewan sources. The Government's ability to fund essential programs and services from own-source revenue has remained fairly stable over the past several years.

Risks and Uncertainties

The Government is subject to risks and uncertainties that arise from variables which the Government can not directly control. These risks and uncertainties include:

- changes in economic factors such as economic growth, commodity and non-renewable resource prices, inflation, interest rates, population growth, personal income and retail sales;
- financial risks including interest rate risk, foreign exchange rate risk, credit risk and liquidity risk;
- changes in transfers from the federal government;
- utilization of Government services, such as crop insurance, health care and social services;
- other unforeseen developments including natural and other disasters, changes in environmental liabilities and legal obligations; and
- changes in accounting standards.

The Government has implemented strategies that limit its exposure to such risks and uncertainties. The key component of this fiscal management plan is *The Growth and Financial Security Act* (the Act), legislation that provides a fiscal framework to ensure balanced GRF budgets and the appropriate use of surplus revenue.

The Act imposes discipline into the budgetary process and reduces risk to external events by requiring annual program reviews and the tabling of balanced budgets and debt management plans, yet the fiscal framework has the flexibility to respond to sudden and rapid changes in factors beyond Government's influence or control. Specifically, the Act:

- requires a four-year financial plan with balanced budgets to be prepared annually;
- requires a four-year debt management plan to be prepared annually;
- requires actual revenue in each fiscal year to be greater than actual expense;
- requires deficits to be fully offset in the following fiscal year;
- establishes the Growth and Financial Security Fund to assist in providing for financial security from year to year and to provide a source of funds available for use for promoting or enhancing the economic development of Saskatchewan;
- requires 50 per cent of any GRF pre-transfer surplus to be transferred to the Growth and Financial Security Fund;
- requires the remaining 50 per cent of any GRF pre-transfer surplus to be applied to the Debt Retirement Fund; and
- contains provisions for extraordinary events, such as natural or other disasters, that lead to unanticipated spending or reduced revenue.

In addition, recognizing that Saskatchewan is heavily reliant on non-renewable resources and external events, the Government takes a prudent approach in developing its budget assumptions for macroeconomic variables and non-renewable resource prices. Government makes use of a number of forecasts from national forecasting agencies and banks, private industry and private sector analysts when developing the underlying assumptions to fiscal forecasts both at budget and throughout the fiscal year.

The fiscal impact of changes in the underlying economic assumptions, including non-renewable resource prices, are estimated on a regular basis in order to quantify the risk associated with each forecast assumption. By understanding the size of the risk inherent in the fiscal projections, Government is better able to make sound financial decisions.

Finally, the Government requires regular fiscal updates during the fiscal year. These updates are based on the continual monitoring of monthly financial results and current economic conditions, as well as the early identification of potential spending pressures. The Government publishes quarterly reports that contain revised fiscal and economic forecasts so that Saskatchewan residents are well-informed as to the Government's current fiscal position and the risks and uncertainties associated with the Government's fiscal plan.

Risk management specific to public debt is discussed in note 4 of the GRF financial statements and note 4 of the SFS.

General Revenue Fund Financial Statements

Responsibility for the General Revenue Fund Financial Statements

The Government is responsible for the General Revenue Fund Financial Statements. The Government maintains a system of accounting and administrative controls to ensure that accurate and reliable financial statements are prepared and to obtain reasonable assurance that transactions are authorized, assets are safeguarded, and financial records are maintained.

The Provincial Comptroller prepares these statements in accordance with the Government's stated accounting policies, using the Government's best estimates and judgement when appropriate.

The Provincial Auditor expresses an independent opinion on these statements. Her report, which appears on the following page, provides the scope of her audit and states her opinion.

Treasury Board approves the General Revenue Fund Financial Statements. The statements are tabled in the Legislative Assembly as part of the Public Accounts and referred to the Standing Committee on Public Accounts for review.

On behalf of the Government of the Province of Saskatchewan.

KEN KRAWETZ
Deputy Premier
Minister of Finance

CLARE ISMAN
Deputy Minister of Finance

TERRY PATON
Provincial Comptroller

Regina, Saskatchewan
June 2012

Independent Auditor's Report

To the Members of the Legislative Assembly of Saskatchewan

I have audited the accompanying financial statements of the General Revenue Fund, which comprise the statement of financial position as at March 31, 2012, and the statements of operations, accumulated deficit, change in net debt, and cash flow for the year then ended, and a summary of significant accounting policies and other explanatory information. These financial statements are prepared to assist Treasury Board in meeting its reporting requirements included in Section 15 of *The Financial Administration Act, 1993*.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian public sector accounting standards for Treasury Board's approval, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Basis for Qualified Opinion

1. The Government through the General Revenue Fund is responsible for the liabilities of several pension plans and a disability benefit plan. Notes 1 and 5 state that the pension liabilities and a disability benefit liability are not recorded in these financial statements. Canadian public sector accounting principles require that the pension and disability benefit liabilities be recorded in the financial statements. Had the pension and disability benefit liabilities been recorded, liabilities and accumulated deficit would increase by \$6,124 million (2011 - \$6,024 million) as at March 31, 2012 and, for the year, expenses would increase by \$100 million (2011 - \$241 million), and the surplus would decrease by the same amount.

2. The Government records transactions between the General Revenue Fund and the Growth and Financial Security Fund (GFSF) as revenue or expense of the General Revenue Fund. The substance of the transactions between the General Revenue Fund and the GFSF is that the amounts the General Revenue Fund owes the GFSF must be repaid by the GFSF to the General Revenue Fund. Canadian public sector accounting principles do not allow the General Revenue Fund to record changes in the amount due to the GFSF as revenue or expense of the General Revenue Fund.

The financial statements show an expense (as a Transfer to the GFSF) of \$27 million (2011 - \$48 million) and a revenue (as a Transfer from the GFSF) of \$325 million (2011 - \$0). It is not appropriate to record an expense because the GFSF must return all amounts due to the General Revenue Fund. Likewise, it is not appropriate to record revenue for the amount the GFSF has returned to the General Revenue Fund in the year. Instead of recording an expense or revenue, the financial statements should record an asset equal to the amount it owed or paid to the GFSF. Had the Government properly recorded the transactions, total financial assets would increase by \$708 million (2011 - \$1,006 million) and accumulated deficit would decrease by the same amount as at March 31, 2012, and surplus for the year would decrease by \$298 million (2011 - increase by \$48 million).

Qualified Opinion

In my opinion, except for the effects of not recording pension and disability benefit liabilities, and the incorrect recording of transactions between the General Revenue Fund and the GFSF, as described in the preceding paragraphs, the financial statements present fairly, in all material respects, the financial position of the General Revenue Fund as at March 31, 2012, and the results of its operations, the changes in its net debt, and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

Usefulness of these Financial Statements is Limited

These financial statements contain qualifications from Canadian public sector accounting standards and only report transactions and events of the General Revenue Fund, a component of the Summary Financial Statements. Therefore, readers should not use the General Revenue Fund financial statements to understand and assess the Government's overall management of public financial affairs and provincial resources. Rather, they should use the Summary Financial Statements of the Government of Saskatchewan.

The Government is comprised of over 270 different entities other than the General Revenue Fund. The extent of the Government's controlled financial activities outside of this Fund is significant. Consideration of the financial activities of these entities and adjusting for the qualifications to the General Revenue Fund has the following impact: total financial assets increase by \$6,105 million (2011 - \$7,188 million); total liabilities increase by \$7,088 million (2011 - \$7,295 million); net debt increases by \$983 million (2011 - \$107 million); total non-financial assets increase by \$3,747 million (2011 - \$3,567 million); accumulated deficit decreases by \$2,764 million (2011 - \$3,460 million); total revenue including net income from government business enterprises increases by \$2,161 million (2011 - \$2,237 million); total expense increases by \$2,618 million (2011 - \$2,298 million); and the annual surplus decreases by \$457 million (2011 - \$61 million).

Only the Summary Financial Statements report the full nature and extent of the overall financial affairs and resources of the Government of the Province of Saskatchewan.

Basis of Accounting and Restriction on Use

Without modifying our opinion, we draw attention to Note 1 of the financial statements which describes the basis of accounting and the exceptions approved by Treasury Board to Canadian public sector accounting standards. The primary purpose of the General Revenue Fund financial statements is to report the performance of the Fund against the Estimates. As a result, the financial statements may not be suitable for another purpose.

BONNIE LYSYK, MBA, CA

Provincial Auditor

Regina, Saskatchewan

Cash and Temporary Investments, End of Year	241,429	457,912

The accompanying notes and schedules are an integral part of these financial statements.

Notes to the Financial Statements

As at March 31, 2012

1. Significant Accounting Policies

Basis of accounting

These financial statements are prepared in accordance with Canadian public sector accounting standards, with the following exceptions:

- transfers to and from the Growth and Financial Security Fund are included in the determination of surplus for the year; and
- pension liabilities and a disability benefit liability are not recorded in the financial statements. The General Revenue Fund accounts for defined benefit pension plans and a disability benefit plan on a cash basis.

Reporting entity

The General Revenue Fund is the general fund, which receives all revenues unless otherwise specified by law. Spending from the General Revenue Fund is appropriated by the Legislative Assembly.

Other government entities such as revolving funds, special purpose funds, government business enterprises and other Crown corporations and agencies report separately in other financial statements. Only financial transactions to or from these other entities are included in the General Revenue Fund.

Government business enterprises are self-sufficient government organizations that have the financial and operating authority to sell goods and services to individuals and organizations outside the government reporting entity as their principal activity.

The Government's Summary financial statements, which include the financial activities of the General Revenue Fund and other government entities, are provided separately.

Specific accounting policies

Financial assets

Financial assets are assets that could be used to discharge existing liabilities or finance future operations and are not for consumption in the normal course of operations.

Temporary investments are recorded at the lower of cost or market.

Deferred charges include issue costs and net discounts or premiums incurred on the issue of general debt and related derivative instruments. They are recorded at cost and amortized on a straight-line basis over the remaining life of the debt issue.

Loans to Crown corporations and *Other loans* generally have fixed repayment terms and are interest bearing. Promissory notes issued by Crown corporations are recorded at par; all other loans are recorded at cost. Loans to Crown corporations are presented net of amounts Crown corporations have contributed to sinking funds and net of government business enterprise specific debt.

Equity investment in Crown Investments Corporation of Saskatchewan is an advance to the corporation to form its equity capitalization and is recorded at cost.

Where there has been a loss in value that is other than a temporary decline, loans and equity investments are written down to recognize the loss.

Liabilities

Liabilities are present obligations to individuals and organizations outside of the General Revenue Fund as a result of transactions and events occurring prior to year-end, which will be satisfied in the future through the transfer or use of assets or another form of economic settlement. They consist of obligations to provide authorized transfers where eligibility criteria are met, to repay borrowings, to pay for goods and services acquired prior to year-end and to deliver goods or services in the future where payment has been received. Liabilities include contingencies when it is likely that a liability exists and the amount can be reasonably estimated.

Unearned revenue consists mainly of revenue for Crown mineral leases and motor vehicle fees that will be earned in a subsequent fiscal year.

Notes to the Financial Statements

1. Significant Accounting Policies *(continued)*

Public debt is recorded at par, and is comprised of:

- *government general debt*, which is debt issued by the General Revenue Fund to fund government spending;
- *Crown corporation general debt*, which is debt issued by the General Revenue Fund and subsequently loaned to a Crown corporation; and
- *government business enterprise specific debt*, which is debt issued by the General Revenue Fund specifically on behalf of government business enterprises, where the government expects to realize the receivables from the government business enterprises and settle the external debt simultaneously. Government business enterprises for which the government issues debt specifically are listed in schedule 6.

On the Statement of Financial Position, public debt is presented net of loans to Crown corporations for government business enterprise specific debt. Debt servicing costs on the Statement of Operations are presented net of reimbursements of interest for government business enterprise specific debt.

Certain debenture issues require contributions to a sinking fund. These obligations are recorded at principal less sinking fund balances where applicable. The General Revenue Fund is reimbursed by Crown corporations for all sinking fund contributions made for debt incurred on their behalf. Premiums and discounts on long-term investments within these sinking funds are amortized on a constant yield basis.

Debt issues and sinking fund investments held in foreign currencies are converted to the Canadian dollar equivalent at the exchange rate in effect at March 31.

Premiums, discounts and issue costs incurred on general debt are recorded as deferred charges. Premiums, discounts and commissions on government business enterprise specific debt are netted against reimbursements by these entities.

Unamortized foreign exchange gain or loss includes unrealized foreign exchange gains and losses resulting from conversion of general debt and sinking fund investments held in a foreign currency to the Canadian dollar equivalent at the exchange rate in effect at March 31. Unrealized foreign exchange gains and losses are amortized on a straight-line basis over the remaining life of the debt issue. Realized foreign exchange gains and losses resulting from general debt transactions are included in debt servicing costs.

Guaranteed debt includes guarantees by the Minister of Finance made through specific agreements or legislation to pay all or part of the principal and/or interest on a debt obligation in the event of default by the borrower. Loss provisions on guaranteed debt are recorded as a liability and an expense when it is likely that a loss will occur. The amount of the loss provision represents the best estimate of future payments net of recoveries.

Non-financial assets

Non-financial assets are acquired, constructed or developed assets that do not normally provide resources to discharge existing liabilities, but instead are normally employed to deliver government services, may be consumed in the normal course of operations and are not for sale in the normal course of operations.

Inventories held for consumption are recorded at cost and are expensed as they are consumed.

Tangible capital assets are recorded at cost and include all amounts directly attributable to the acquisition, construction, development or betterment of the asset but does not include interest. Tangible capital assets are generally amortized on a straight-line basis over the estimated useful life of each asset.

Revenue

Revenues are recorded on the accrual basis. For corporate and individual income taxes, cash received from the federal government is used as the basis for estimating the tax revenue. Government transfers are recognized as revenue in the period during which the transfer is authorized and eligibility criteria are met.

Expense

Expenses are recorded on the accrual basis, except for costs related to defined benefit pension plans and a disability benefit plan, which are recorded on the cash basis. Government transfers are recognized as expenses in the period during which the transfer is authorized and eligibility criteria are met.

Notes to the Financial Statements

2. Measurement Uncertainty

Uncertainty in the determination of the amount at which an item is recognized or disclosed in financial statements is known as measurement uncertainty. Such uncertainty exists when there is a variance between the recognized or disclosed amount and another reasonably possible amount.

Measurement uncertainty that may be material to these financial statements exists:

- in corporate and individual income tax revenue of \$2,691.2 million (2011 - \$2,951.1 million) because final tax assessments may differ from initial estimates on which cash payments are based;
- in oil and natural gas non-renewable resource revenue of \$1,546.2 million (2011 - \$1,303.8 million) because of price and production sensitivities in the royalty revenue structures;
- in resource surcharge non-renewable resource revenue of \$452.8 million (2011 - \$360.8 million) because the final valuation of resource sales may differ from initial estimates on which installments are based;
- in potash non-renewable resource revenue of \$438.4 million (2011 - \$262.5 million) because actual operating profits may differ from initial estimates;
- in the Canada Health Transfer and Canada Social Transfer revenue of \$1,199.2 million (2011 - \$1,138.0 million) because of changes in the economic and demographic conditions in the Province and the country;
- in agricultural income stability programs expense of \$83.4 million (2011 - \$141.2 million) because actual program uptake may differ from initial estimates which are based on farm income forecasts; and
- in the disclosure of liabilities for defined benefit pension plans of \$6,114.4 million (2011 - \$6,004.6 million) because actual experience may differ from actuarial estimations and assumptions.

While best estimates are used for reporting items subject to measurement uncertainty, it is reasonably possible that changes in future conditions, occurring within one fiscal year, could require a material change in the amounts recognized or disclosed.

3. Cash and Temporary Investments

Temporary investments are recorded at \$110.8 million (2011 - \$459.8 million), consist of investment grade money market securities and are generally for less than 30 days. Due to their short-term nature, market value approximates cost.

4. Risk Management of Public Debt

Funds are borrowed in both domestic and foreign capital markets by issuing Government of Saskatchewan securities. This borrowing activity finances government operations and the activities of Crown corporations. These transactions result in exposure to four types of risk: interest rate risk, foreign exchange rate risk, credit risk and liquidity risk.

To manage these risks, a preference for fixed rate Canadian dollar denominated debt is maintained. Where market conditions dictate that other forms of debt are more attractive, opportunities are sought to use derivative financial instruments to reduce these risks. A derivative financial instrument is a contract, the value of which is based on the value of another asset or index.

Interest rate risk is the risk that debt servicing costs will increase due to changes in interest rates. This risk is managed by issuing debt securities at predominantly fixed rates of interest rather than at floating rates of interest.

Floating rate debt is defined as the sum of floating rate debentures, short-term promissory notes, fixed rate debt maturing within one year and Saskatchewan Savings Bonds. Opportunities are sought to effectively convert floating rate debt into fixed rate debt through the use of interest rate swaps. There are interest rate swaps on a notional value of debt of \$66.0 million (2011 - \$66.0 million). At March 31, 2012, 83.0 per cent (2011 - 90.3 per cent) of the gross debt effectively carried a rate of interest that was fixed for greater than a one-year period.

Gross debt includes floating rate debt of \$1,854.1 million (2011 - \$1,027.1 million). A one percentage point increase in interest rates would decrease the surplus by \$13.8 million in 2011-12.

Foreign exchange rate risk is the risk that debt servicing costs will increase due to a decline in the value of the Canadian dollar relative to other currencies. This risk is managed by maintaining a preference for issuing debt that is denominated in Canadian dollars. Where debt has been issued in foreign currencies, opportunities are sought to effectively convert it into Canadian dollar debt through the use of cross currency swaps. At March 31, 2012, 97.5 per cent (2011 - 97.5 per cent) of the gross debt is effectively denominated in Canadian dollars. A one cent change in the value of the U.S. dollar compared to the Canadian dollar from the March 31, 2012 level would have an insignificant effect on debt and debt servicing costs.

Notes to the Financial Statements

4. Risk Management of Public Debt *(continued)*

The following foreign denominated items have been hedged to Canadian dollars using cross currency swaps:

- debentures totalling 1,225.0 million U.S. dollars (2011 - 1,225.0 million) fully hedged to \$1,619.3 million Canadian (2011 - \$1,619.3 million);
- debentures totalling 300.0 million Swiss francs (2011 - 300.0 million) fully hedged to \$274.7 million Canadian (2011 - \$274.7 million); and
- interest payments on debentures of 275.0 million U.S. dollars (2011 - 275.0 million) hedged to Canadian dollars at an exchange rate of 1.2325 (2011 - 1.2325).

In total, there are cross currency swaps on a notional value of debt of \$2,507.5 million (2011 - \$2,507.5 million). The effectiveness of these hedges is assessed on an ongoing basis by monitoring the credit ratings of the counterparties to the hedges.

Credit risk is the risk that a loss may occur from the failure of another party to meet its obligations under a derivative financial instrument contract. This risk is managed by dealing only with counterparties that have good credit ratings and by establishing limits on individual counterparty exposures and monitoring those exposures on a regular basis. At March 31, 2012, 100 per cent (2011 - 100 per cent) of counterparties held a Standard and Poor's credit rating of A or higher.

Liquidity risk is a risk that financial commitments will not be met over the short term. This risk is managed by distributing debt maturities over many years, maintaining sinking funds on long-term debt issues and maintaining adequate cash reserves and short-term borrowing programs as contingent sources of liquidity.

5. Employee Future Benefits

Pension Plans

The Government sponsors several defined benefit pension plans and a defined contribution pension plan.

Pension fund assets of government sponsored defined benefit and defined contribution pension plans are invested in fixed income securities, equities, real estate and short-term monetary items. The investment in Government of Saskatchewan securities is insignificant for all plans.

Defined benefit plans

Defined benefit plans provide benefits based on length of service and pensionable earnings. A typical defined benefit plan provides pensions equal to 2.0 per cent of a member's average five years highest salary, multiplied by the years of service to a maximum of 35 years. Members contribute a percentage of salary, which may vary based on age, to their plan. Pensions and contribution rates are integrated with the Canada Pension Plan.

The two main plans are the Teachers' Superannuation Plan (TSP) and the Public Service Superannuation Plan (PSSP). Other plans include Judges of the Provincial Court Superannuation Plan (Judges), Saskatchewan Transportation Company Employees Superannuation Plan (STC), Anti-TB League Employees Superannuation Plan (ATB) and the Saskatchewan Pension Annuity Fund, an annuity underwriting operation. Obligations for allowances payable to members of the former Members of the Legislative Assembly Superannuation Fund (MLA) are part of the General Revenue Fund.

Actuarial valuations are performed at least triennially. An actuary extrapolates these valuations when a valuation is not done in the current fiscal year. Valuations are based on a number of assumptions about future events, such as inflation rates, interest rates, wage and salary increases and employee turnover and mortality. These assumptions reflect estimates of expected long-term rates and short-term forecasts. Estimates vary based on the individual plan.

The accrued benefit obligation is determined using the projected benefit method prorated on services. Pension fund assets are valued at market related values based on actual market values averaged over a four-year period. In the periods between valuations, the actuary estimates the market related value of pension fund assets using expected long-term rates of return for the individual plans.

The Government is required to match member current service contributions for all plans except the PSSP and Judges. Separate pension funds are maintained for all plans except the PSSP and the MLA. The PSSP member contributions are deposited into the General Revenue Fund. All pension obligations arising under the PSSP and the MLA are paid from the General Revenue Fund.

Notes to the Financial Statements

5. Employee Future Benefits (continued)

Information on the defined benefit plans is as follows:

	2012			2011	
	TSP	PSSP	Others	Total	
Plan status	closed	closed	closed ¹	n/a	n/a
Member contribution rate (percentage of salary)	7.85	7.00-9.00 ²	5.00-9.00 ²	n/a	n/a
Number of active members	1,211	447	54	1,712	2,177
Average age of active members (years)	58.0	58.0	58.4	58.0	56.6
Number of former members entitled to deferred pension benefits	4,410	88	9	4,507	4,687
Number of superannuates and surviving spouses	11,407	5,718	2,259	19,384	19,227
Actuarial valuation date	June 30/11	Dec. 31/11	Various	n/a	n/a
Long-term assumptions used					
Rate of compensation increase (percentage)	3.50	3.50	3.50	n/a	n/a
Expected rate of return on plan assets (percentage)	5.00	n/a	5.50-5.85	n/a	n/a
Discount rate (percentage)	3.50	3.60	3.30-4.00	n/a	n/a
Inflation rate (percentage)	2.50	2.50	2.50	n/a	n/a
Expected average remaining service life (years)	3.5	0.3	0.9-7.1	n/a	n/a
Post-retirement index (percentage of annual increase in Consumer Price Index)	80	70	70-75	n/a	n/a

¹ Judges is open to new membership; all other plans are closed.

² Contribution rate varies based on age upon joining the plan.

Based on the latest actuarial valuations, extrapolated to March 31, 2012, the present value of accrued pension benefits and the market related value of pension fund assets are shown in the table below:

(thousands of dollars)	2012			2011	
	TSP ¹	PSSP	Others	Total	
Accrued benefit obligation, beginning of year	5,118,905	1,910,768	331,728	7,361,401	7,373,859
Current period benefit cost	28,818	5,002	5,435	39,255	49,179
Interest cost	241,003	87,047	14,968	343,018	361,062
Actuarial losses	741,338	209,136	43,804	994,278	44,766
Benefit payments	(333,480)	(126,456)	(22,764)	(482,700)	(467,465)
Accrued Benefit Obligation, End of Year	5,796,584	2,085,497	373,171	8,255,252	7,361,401
Plan assets, beginning of year	1,018,566	-	198,814	1,217,380	1,369,418
Employer contributions	142,367	125,311	6,151	273,829	214,467
Employee contributions	6,692	1,145	550	8,387	11,508
Return on plan assets	56,789	-	24,279	81,068	83,238
Actuarial (losses) gains	(139,770)	-	9,470	(130,300)	6,214
Benefit payments	(333,480)	(126,456)	(22,764)	(482,700)	(467,465)
Plan Assets, End of Year ²	751,164	-	216,500	967,664	1,217,380
	5,045,420	2,085,497	156,671	7,287,588	6,144,021
Unamortized estimation adjustments ³	(930,097)	(220,437)	(22,609)	(1,173,143)	(139,462)
Total Pension Liabilities ⁴	4,115,323	1,865,060	134,062	6,114,445	6,004,559

¹ The TSP had an actual rate of return on plan assets of 1.7 per cent (2011 - 10.8 per cent).

² At March 31, 2012, the market value of plan investments was \$962.3 million (2011 - \$1,114.3 million). Of this amount 44.6 per cent (2011 - 42.7 per cent) was invested in fixed income securities and 42.1 per cent (2011 - 44.9 per cent) in equity investments.

³ Unamortized estimation adjustments are amortized against the net obligation over periods ranging from 3.5 to 4.0 years for the TSP, from 0.3 to 1.5 years for the PSSP and from 0.9 to 10 years for the other plans. These represent the expected average remaining service life of active plan members at the time the estimation adjustments arose.

⁴ Changes in assumptions can result in significantly higher or lower estimates of pension liabilities. A one percentage point decrease in the discount rate would result in a \$697.5 million and \$258.0 million increase in the pension liabilities for the TSP and the PSSP respectively, and a one percentage point increase would result in a \$571.7 million and \$213.1 million decrease in the pension liabilities for the TSP and the PSSP respectively.

Notes to the Financial Statements

5. Employee Future Benefits *(continued)*

Defined contribution plans

Defined contribution plans provide pensions based on accumulated contributions and investment earnings. Employees contribute a percentage of salary.

The Government sponsors the Public Employees Pension Plan (PEPP), a multi-employer defined contribution plan. Employers are required to provide contributions at specified rates for employee current service. The General Revenue Fund has fully funded its share of contributions. The General Revenue Fund also contributes to the Saskatchewan Teachers' Retirement Plan (STRP), sponsored by the Saskatchewan Teachers' Federation.

Information on the defined contribution plans to which the General Revenue Fund contributes is as follows:

	2012			2011
	PEPP	STRP ¹	Total	Total
Plan status	open	n/a	n/a	n/a
Member contribution rate <i>(percentage of salary)</i>	5.00-9.00 ²	n/a	n/a	n/a
Government contribution rate <i>(percentage of salary)</i>	6.00-9.00 ²	n/a	n/a	n/a
Number of active members, all employers	25,454	n/a	25,454	25,382
General Revenue Fund participation				
Number of active members	11,854	n/a	11,854	11,956
Member contributions <i>(thousands of dollars)</i>	54,776	n/a	54,776	52,784
Government contributions <i>(thousands of dollars)</i>	57,503	67,483	124,986	118,038

¹ The STRP is a contributory defined benefit pension plan. The Government contributes an amount which is set through provincial negotiations.

² Contribution rate varies based on employee group.

Pension expense

Pensions are accounted for on a cash basis. The pension liabilities are not recorded in the financial statements.

<i>(thousands of dollars)</i>	2012	2011
Defined benefit plans	273,829	214,467
Defined contribution plans	124,986	118,038
Total Pension Expense	398,815	332,505

Other Employee Future Benefits

The Government provides long-term disability benefits to members of the TSP. The disability benefit plan liability of \$9.6 million (2011 - \$19.2 million) is not recorded in the financial statements. The benefit expense on a cash basis is \$3.7 million (2011 - \$4.6 million).

6. Contingencies

Guaranteed debt

The Minister of Finance has guaranteed the debt of others of \$93.9 million (2011 - \$35.4 million). Schedule 8 provides a listing of guaranteed debt.

Lawsuits

The Government is involved in various legal actions, the outcome of which is not determinable. Up to \$392.6 million may be paid depending on the outcome of lawsuits in progress. The lawsuits in progress include aboriginal land claims, claims for damages to persons and property, disputes of taxes and funding and various other legal actions.

Notes to the Financial Statements

7. Contractual Obligations

Operating and capital lease obligations are as follows:

<i>(thousands of dollars)</i>	Operating	Capital
Future minimum lease payments		
2012-13	43,753	5,749
2013-14	38,486	3,764
2014-15	32,593	3,268
2015-16	24,154	2,956
2016-17	17,589	2,510
Thereafter	70,035	31,681
	226,610	49,928
Interest and executory costs	-	(27,705)
Total Lease Obligations	226,610	22,223

Significant other contractual obligations include:

- contracts for the construction and acquisition of tangible capital assets of \$401.3 million over the next four years;
- computer and satellite service agreements of \$122.6 million over the next six years;
- research and development projects for agriculture technology and opportunities in the agri-food industry of \$27.7 million over the next five years;
- beverage container collection and recycling programs of \$87.8 million over the next four years; and
- rural municipality and school division tax loss compensation of approximately \$12.6 million as land achieves reserve status over the course of the agreements.

8. Related Party Transactions

Included in these financial statements are transactions with various Saskatchewan Crown corporations, agencies, boards, and commissions related to the General Revenue Fund by virtue of common control by the Government of Saskatchewan.

Transactions include transfers to related parties of \$5,152.6 million (2011 - \$5,272.4 million).

Routine operating transactions with related parties are recorded at the rates charged by those organizations and are settled on normal trade terms. These transactions include:

- payments to Saskatchewan Telecommunications Holding Corporation of approximately \$24.8 million (2011 - \$23.8 million);
- payments to Saskatchewan Research Council of approximately \$32.7 million (2011 - \$11.5 million) for environmental remediation costs; and
- taxation and non-renewable resource revenue received from related parties during 2011-12 of approximately \$113.8 million (2010-11 - \$105.2 million). In addition, Saskatchewan Provincial Sales Tax and Fuel Tax are received from related parties on all taxable purchases.

Amounts due to or from related parties are described separately in these financial statements.

9. Trust Funds

The General Revenue Fund has no equity in trust fund assets. Trust fund assets held and administered but not owned by the General Revenue Fund are as follows:

<i>(thousands of dollars)</i>	2012	2011
Pension plans	7,809,106	7,788,957
Public Guardian and Trustee of Saskatchewan	163,730	158,830
Other	81,900	65,468
Total Trust Fund Assets¹	8,054,736	8,013,255

¹ Amounts are based on the latest financial statements of the funds closest to March 31, 2012, where available.

Notes to the Financial Statements

10. Debt Retirement Fund

This fund was established pursuant to *The Growth and Financial Security Act* and is an accounting of the surpluses of the General Revenue Fund commencing April 1, 2008. This Fund has no underlying assets.

<i>(thousands of dollars)</i>	Budget	Actual
Debt Retirement Fund, beginning of year	2,861,032	2,861,032
Surplus for the year	382,517	352,334
Debt Retirement Fund, End of Year	3,243,549	3,213,366

11. Comparative Figures

Certain 2011 comparative figures have been reclassified to conform with the current year's presentation. With regard to expenses, the figures are reported on the same basis as the Estimates for the prior year.

Accounts Receivable**Schedule 1**

As at March 31, 2012

(thousands of dollars)

¹ General debt and government business enterprise specific debt are net of sinking funds.

² On the Statement of Financial Position, public debt is presented net of loans to Crown corporations for government business enterprise specific debt of \$3,905.4 million (2011 - \$3,373.8 million).

³ Public debt repayable in U.S. dollars of 23.9 million (2011 - 38.3 million) has been restated to Canadian dollars at the exchange rate in effect at March 31, 2012 of 0.9991 (2011 - 0.9718).

Public debt is comprised of gross debt net of sinking funds as follows:

	2012		Public Debt
	Gross Debt ^a	Sinking Funds (schedule 7)	
Government	5,906,884	(2,099,294)	3,807,590
Crown Corporation			
Information Services Corporation of Saskatchewan	9,935	-	9,935
Municipal Financing Corporation of Saskatchewan	137,746	(2,097)	135,649
Saskatchewan Gaming Corporation	6,000	-	6,000

Public Debt	10,910,819	(2,641,070)	8,269,749

^a The average effective interest rate on gross debt during 2011-12 was 6.2 per cent (2010-11 - 6.3 per cent), and includes the impact of foreign exchange and the amortization of any premiums and discounts associated with the debentures. The average term to maturity of gross debt is 11.6 years (2011 - 11.6 years).

Public Debt *(continued)*

Schedule 6

⁴ Debt principal payment requirements in each of the next five years and thereafter are as follows:

	2012	2011
Year of Maturity		
Short-term promissory notes	692,657	586,293
2011-12	-	259,014
2012-13	1,157,076	1,159,159
2013-14	789,647	788,564
2014-15	946,427	946,684
2015-16	491,870	491,870
2016-17	390,601	-
6-10 years	1,628,230	1,735,518
Thereafter	4,814,311	4,582,781
Gross debt ^a	10,910,819	10,549,883
Sinking funds	(2,641,070)	(2,431,821)
Public Debt	8,269,749	8,118,062

^a Gross debt includes Canada Pension Plan debentures of \$745.1 million (2011 - \$745.1 million). These debentures are callable in whole or in part before maturity at the option of the Minister of Finance of Saskatchewan.

Sinking Funds

As at March 31, 2012
(thousands of dollars)

Schedule 7

	2011		2012			Sinking Funds
	Sinking Funds	Contributions ¹	Earnings ²	Redemptions ³	Currency Adjustment	
Government	1,976,416	46,718	166,510	(96,992)	6,642	2,099,294
Crown Corporation						
Municipal Financing Corporation of Saskatchewan	1,574	362	161	-	-	2,097

Total Sinking Funds⁴	2,431,821	89,909	209,690	(96,992)	6,642	2,641,070

¹ Annual contributions, established by Order in Council, are set at not less than one per cent of debentures outstanding. The aggregate amount of contributions estimated to be required in each of the next five years and thereafter to meet sinking fund requirements by debt classification are as follows:

	2013	2014	2015	2016	2017	Thereafter	Total
Government general debt ^a	47,507	47,507	41,121	31,783	27,586	301,878	497,382
Crown corporation general debt	3,974	3,974	3,474	3,474	3,426	56,270	74,592
Government business enterprise specific debt	38,394	38,394	37,372	36,872	36,322	520,328	707,682
Total Sinking Fund Contributions	89,875	89,875	81,967	72,129	67,334	878,476	1,279,656

^a Each year until 2015 includes contributions of 1.0 million U.S. dollars.

² Includes gains on investment sales of \$128.2 million (2011 - \$71.6 million).

³ The redemption value is based on the market value of the sinking fund units at the date of redemption.

⁴ The market value of total sinking funds is \$2,683.1 million (2011 - \$2,415.6 million).

Total sinking funds by debt classification are as follows:

	2011		2012			Sinking Funds
	Sinking Funds	Contributions	Earnings	Redemptions	Currency Adjustment	
Government general debt	1,976,416	46,718	166,510	(96,992)	6,642	2,099,294
Crown corporation general debt	34,352	5,828	3,379	-	-	43,559
Total sinking funds of general debt	2,010,768	52,546	169,889	(96,992)	6,642	2,142,853
Government business enterprise specific debt	421,053	37,363	39,801	-	-	498,217
Total Sinking Funds	2,431,821	89,909	209,690	(96,992)	6,642	2,641,070

Sinking fund assets have been invested as follows:

	2012	2011
Long-term investments in securities of:		
Government of other provinces (coupon interest range 0.0% to 9.6%; maturing in 1.9 to 31.7 years)	1,292,057	1,257,328
Government of Saskatchewan (coupon interest range 0.0% to 10.3%; maturing in 1.2 to 29.8 years)	555,455	382,781
Government of Canada (coupon interest range 2.8% to 4.0%; maturing in 4.2 to 29.2 years)	54,566	128,655
Government of the United States (coupon interest 2.0%; maturing in 9.9 years)	4,951	6,954
Corporations	-	10,499
Cash, short-term investments and accrued interest ^a	734,041	645,604
Total Sinking Funds^b	2,641,070	2,431,821

^a Cash, short-term investments and accrued interest are disclosed net of \$0.3 million (2011 - \$0.5 million) in liabilities.

^b Includes U.S. dollar cash, investments and accrued interest converted to \$250.9 million Canadian (2011 - \$230.1 million) at the exchange rate in effect at March 31, 2012 of 0.9991 (2011 - 0.9718).

Guaranteed Debt

As at March 31, 2012

*(thousands of dollars)***Schedule 8**

	2012	2011
Crown Corporation		
<i>The Crown Corporations Act, 1993</i>		
Federal immigrant investor loans	76,722	18,529
<i>The Power Corporation Act</i>		
Saskatchewan Power savings bonds		
Series I - series VII (matured)	-	18
Total Crown Corporation	76,722	18,547
Other		
<i>The Farm Financial Stability Act</i>		
Breeder associations loan guarantees	9,481	8,830

<i>The Student Assistance and Student Aid Fund Act</i>	21	31
Total Other	17,132	16,881
Total Guaranteed Debt¹	93,854	35,428

¹ In addition to the amount shown, there is a contingent liability for interest accrued on certain of these items.

Total guaranteed debt is net of a loss provision of \$0.7 million (2011 - \$0.1 million).

Federal Immigrant Investor Loans

The Minister of Finance provides a guarantee to the federal government with respect to the Province's participation in the federal Immigrant Investor Program (IIP). Under this program, the federal government provides low interest loans to a Saskatchewan Crown corporation (the Saskatchewan Immigrant Investor Fund Inc.) that was established to administer the Province's participation in the IIP. A condition of the agreement between the Province and the federal government is that the Minister of Finance must guarantee that the Saskatchewan Immigrant Investor Fund Inc. will repay the IIP loans to the federal government.

Breeder and Feeder Associations

The Minister of Finance provides guarantees to lenders who make loans to production associations. The Minister of Finance guarantees the repayment of 25 per cent of the outstanding loan balance at the time of a first default on any advance, plus accrued interest as of the time that payment is to be made on the guarantee. Guarantees for each cattle association are limited to \$6 million under the breeder option. Guarantees for each bison and sheep association are limited to \$6 million and \$4 million respectively, under both the breeder and feeder options.

Tangible Capital Assets

Summary Financial Statements

Responsibility for the Summary Financial Statements

The Government is responsible for the Summary Financial Statements. The Government maintains a system of accounting and administrative controls to ensure that accurate and reliable financial statements are prepared and to obtain reasonable assurance that transactions are authorized, assets are safeguarded, and financial records are maintained.

The Provincial Comptroller prepares these statements in accordance with generally accepted accounting principles for the public sector, using the Government's best estimates and judgement when appropriate. He uses information from the accounts of the General Revenue Fund, Crown corporations and other government organizations to prepare these statements.

The Provincial Auditor expresses an independent opinion on these statements. Her report, which appears on the following page, provides the scope of her audit and states her opinion.

Treasury Board approves the Summary Financial Statements. The statements are tabled in the Legislative Assembly as part of the Public Accounts and referred to the Standing Committee on Public Accounts for review.

On behalf of the Government of the Province of Saskatchewan.

KEN KRAWETZ
Deputy Premier
Minister of Finance

CLARE ISMAN
Deputy Minister of Finance

TERRY PATON
Provincial Comptroller

Regina, Saskatchewan
June 2012

Independent Auditor's Report

To the Members of the Legislative Assembly of Saskatchewan

I have audited the accompanying financial statements of the Government of Saskatchewan, which comprise the summary statement of financial position as at March 31, 2012, and the summary statements of operations, accumulated surplus, change in net debt, and cash flow for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian public sector accounting standards for Treasury Board's approval, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my audit opinion.

Opinion

In my opinion, the financial statements present fairly, in all material respects, the financial position of the Government of Saskatchewan as at March 31, 2012, and the results of its operations, the changes in its net debt, and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

BONNIE LYSYK, MBA, CA

Provincial Auditor

Regina, Saskatchewan

June 14, 2012

The accompanying notes and schedules are an integral part of these financial statements.

Notes to the Summary Financial Statements

As at March 31, 2012

1. Significant Accounting Policies

Basis of accounting

These Summary financial statements are prepared in accordance with Canadian public sector accounting standards.

Government reporting entity

The government reporting entity consists of organizations controlled by the Government. These government entities are segregated into two classifications. Entities that are self-sufficient and have the financial and operating authority to sell goods and services to individuals and organizations outside the government reporting entity as their principal activity are classified as *government business enterprises*. All other government entities are *government service organizations*.

A listing of the organizations included in the government reporting entity is provided in schedule 18. Unless otherwise noted, the financial activities of all subsidiaries of these organizations have also been included.

Government partnerships

The Government has entered into various partnerships where there is a contractual arrangement between the Government and one or more partners outside the government reporting entity and where these partners share, on an equitable basis, the significant risks and benefits associated with operating the partnership.

Trust funds

Trust funds are administered but not controlled by the Government and, therefore, are excluded from the government reporting entity.

Method of consolidation

Government service organizations are consolidated after adjustment to a basis consistent with the accounting policies described in this note. Significant inter-organization balances and transactions are eliminated. Government service organizations in which a non-controlling interest exists are proportionately consolidated.

Government business enterprises are accounted for by the modified equity method. Using this method, the Government's investment in government business enterprises, which is initially recorded at cost, is adjusted annually to include the Government's proportionate share of net earnings or losses and certain other net equity changes of the enterprise without adjustment to conform with the accounting policies described in this note. With the exception of dividends declared by March 31, inter-organization balances and transactions are not eliminated.

Government partnerships are proportionately consolidated after adjustment to a basis consistent with the accounting policies described in this note and are disclosed in note 8. Significant inter-organization balances and transactions are eliminated.

Financial results of government organizations with fiscal year-ends other than March 31 are adjusted for transactions having a significant impact on these financial statements.

Specific accounting policies

Financial assets

Financial assets are assets that could be used to discharge existing liabilities or finance future operations and are not for consumption in the normal course of operations.

Temporary investments are recorded at the lower of cost or market.

Inventories held for resale are valued at the lower of cost and net realizable value.

Deferred charges include issue costs and net discounts or premiums incurred on the issue of debt and related derivative instruments. They are recorded at cost and amortized on a straight-line basis over the remaining life of the debt issue.

Notes to the Summary Financial Statements

1. Significant Accounting Policies *(continued)*

Loans receivable are initially recorded at cost. Where there has been a loss in value that is other than a temporary decline, the loan is written down to recognize the loss. Interest is recognized on the accrual basis; when collection is uncertain, it is recorded on the cash basis.

Other investments are accounted for by various methods as described below and are written down to their market value when there is evidence of a permanent decline in value.

Equities are investments in shares of private or public companies. Investments that are subject to significant influence but in which the Government has less than a controlling interest are accounted for by the modified equity method. Using this method, the Government's investment, which is initially recorded at cost, is adjusted annually for the Government's share of the investees' net earnings or losses and is reduced by dividends and partnership distributions received from these investments. Investments that are not subject to significant influence are recorded at cost; dividends from these shares are recorded as income when receivable.

Pooled investment funds are recorded at market value.

All other investments are recorded at amortized cost.

Liabilities

Liabilities are present obligations to individuals and organizations outside the government reporting entity as a result of transactions and events occurring prior to year-end, which will be satisfied in the future through the transfer or use of assets or another form of economic settlement. They consist of obligations to provide retirement benefits to employees, to repay borrowings, to provide authorized transfers where eligibility criteria are met, to pay for goods and services acquired prior to year-end and to deliver goods or services in the future where payment has been received. Liabilities include contingencies when it is likely that a liability exists and the amount can be reasonably estimated.

Unearned revenue includes externally restricted funding from the federal government and other organizations and individuals.

Public debt is recorded at par, and is comprised of:

- *general debt*, which is debt issued by government service organizations and includes issued amounts subsequently transferred to government business enterprises; and
- *government business enterprise specific debt*, which is debt issued by, or specifically on behalf of, government business enterprises.

On the Statement of Financial Position public debt includes only general debt. Government business enterprise specific debt is listed separately on schedule 8.

Certain debenture issues require contributions to a sinking fund. These obligations are recorded at principal less sinking fund balances where applicable. Premiums and discounts on long-term investments within these sinking funds are amortized on a constant yield basis.

Debt issues and sinking fund investments held in foreign currencies are converted to the Canadian dollar equivalent at the exchange rate in effect at March 31.

Premiums, discounts and issue costs are recorded as deferred charges.

Unamortized foreign exchange gain or loss includes unrealized foreign exchange gains and losses resulting from the conversion of debentures due and sinking funds held in a foreign currency to the Canadian dollar equivalent at the exchange rate in effect at March 31. Unrealized foreign exchange gains and losses are amortized on a straight-line basis over the remaining life of the debt issue. Realized foreign exchange gains and losses are included in the surplus or deficit.

Pension liabilities are calculated using the projected benefit method prorated on services, except as otherwise disclosed in note 5. Pension fund assets are valued at market-related values. Changes in the pension liabilities that result from estimation adjustments due to experience gains and losses and changes in actuarial assumptions are amortized on a straight-line basis over the expected average remaining service life of the related employee group. Gains or losses resulting from plan amendments are recognized in the period of the plan amendment.

Guaranteed debt includes guarantees of the Government made through specific agreements or legislation to pay all or part of the principal or interest on a debt obligation in the event of default by the borrower. Loss provisions on guaranteed debt are recorded as a liability and an expense when it is likely that a loss will occur. The amount of the loss provision represents the Government's best estimate of future payments net of recoveries.

Notes to the Summary Financial Statements

1. Significant Accounting Policies *(continued)*

Non-financial assets

Non-financial assets are acquired, constructed or developed assets that do not normally provide resources to discharge existing liabilities, but instead are normally employed to deliver government services, may be consumed and are not for sale in the normal course of operations.

Inventories held for consumption are recorded at cost and are expensed as they are consumed.

Tangible capital assets are recorded at cost and include all amounts directly attributable to the acquisition, construction, development or betterment of the asset. Tangible capital assets are generally amortized on a straight-line basis over the estimated useful life of each asset.

Revenue

Revenues are recorded on the accrual basis. For corporate and individual income taxes, cash received from the federal government is used as the basis for estimating the tax revenue. Government transfers are recognized as revenue in the period during which the transfer is authorized and eligibility criteria are met.

Expense

Expenses are recorded on the accrual basis. Government transfers are recognized as expenses in the period during which the transfer is authorized and eligibility criteria are met.

2. Measurement Uncertainty

Uncertainty in the determination of the amount at which an item is recognized or disclosed in financial statements is known as measurement uncertainty. Such uncertainty exists when there is a variance between the recognized or disclosed amount and another reasonably possible amount.

Measurement uncertainty, disclosed in aggregate for government service organizations and government business enterprises, that may be material to these financial statements exists:

- in pension obligations of \$6,846.2 million (2011 - \$6,094.7 million), insurance claim obligations of \$2,737.4 million (2011 - \$2,720.9 million) and environmental obligations of \$258.1 million (2011 - \$307.2 million) because actual experience may differ significantly from actuarial or historical estimations and assumptions;
- in corporate and individual income taxation revenue of \$2,691.2 million (2011 - \$2,951.1 million) because final tax assessments may differ from initial estimates on which cash payments are based;
- in oil and natural gas non-renewable resource revenue of \$1,558.2 million (2011 - \$1,303.8 million) because of price and production sensitivities in the royalty revenue structures;
- in resource surcharge non-renewable resource revenue of \$452.8 million (2011 - \$360.8 million) because the final valuation of resource sales may differ from initial estimates on which installments are based;
- in potash non-renewable resource revenue of \$438.4 million (2011 - \$262.5 million) because actual operating profits may differ from initial estimates;
- in the Canada Health Transfer and Canada Social Transfer revenue of \$1,199.2 million (2011 - \$1,138.0 million) because of changes in economic and demographic conditions in the Province and the country;
- in unbilled utility revenue of \$111.0 million (2011 - \$128.4 million) because actual usage may differ from estimated usage; and
- in agricultural income stability programs expense of \$132.1 million (2011 - \$176.2 million) because actual program uptake may differ from initial estimates which are based on farm income forecasts.

While best estimates are used for reporting items subject to measurement uncertainty, it is reasonably possible that changes in future conditions, occurring within one fiscal year, could require a material change in the amounts recognized or disclosed.

Notes to the Summary Financial Statements

3. Cash and Temporary Investments

Temporary investments are \$1,069.3 million (2011 - \$1,800.1 million) and mature in less than one year. Due to the short-term nature of these investments, market value approximates cost. Cash and temporary investments includes \$119.6 million (2011 - \$76.2 million) restricted as a result of agreements with external parties.

4. Risk Management of Public Debt

The Government borrows funds in both domestic and foreign capital markets by issuing Government of Saskatchewan securities. As a result, the Government is exposed to four types of risk: interest rate risk, foreign exchange rate risk, credit risk and liquidity risk.

To manage these risks, the Government maintains a preference for fixed rate Canadian dollar denominated debt. Where market conditions dictate that other forms of debt are more attractive, the Government seeks opportunities to use derivative financial instruments to reduce these risks. A derivative financial instrument is a contract, the value of which is based on the value of another asset or index.

Interest rate risk is the risk that the Government's debt charges will increase due to changes in interest rates. This risk is managed by issuing debt securities at predominantly fixed rates of interest rather than at floating rates of interest.

Floating rate debt is defined as the sum of floating rate debentures, short-term promissory notes, fixed rate debt maturing within one year and Saskatchewan Savings Bonds. The Government seeks opportunities to effectively convert floating rate debt into fixed rate debt through the use of interest rate swaps. The Government has interest rate swaps on a notional value of debt of \$76.0 million (2011 - \$77.7 million). At March 31, 2012, 83.0 per cent (2011 - 90.3 per cent) of the Government's gross debt effectively carried a rate of interest that was fixed for greater than a one-year period.

Public debt includes floating rate debt of \$1,872.7 million (2011 - \$1,040.6 million). A one percentage point increase in interest rates would have increased the deficit by \$18.7 million.

Foreign exchange rate risk is the risk that the Government's debt charges will increase due to a decline in the value of the Canadian dollar relative to other currencies. This risk is managed by maintaining a preference for issuing debt that is denominated in Canadian dollars. Where debt has been issued in foreign currencies, the Government seeks opportunities to effectively convert it into Canadian dollar debt through the use of cross currency swaps. At March 31, 2012, 97.5 per cent (2011 - 97.4 per cent) of the Government's gross debt is effectively denominated in Canadian dollars. A one cent change in the value of the U.S. dollar compared to the Canadian dollar from the March 31, 2012 level would have an insignificant effect on debt and debt servicing costs.

The following foreign denominated items have been hedged to Canadian dollars using cross currency swaps:

- debentures totalling 1,225.0 million U.S. dollars (2011 - 1,225.0 million) fully hedged to \$1,619.3 million Canadian (2011 - \$1,619.3 million);
- debentures totalling 300.0 million Swiss francs (2011 - 300.0 million) fully hedged to \$274.7 million Canadian (2011 - \$274.7 million); and
- interest payments on debentures of 275.0 million U.S. dollars (2011 - 275.0 million) hedged to Canadian dollars at an exchange rate of 1.2325 (2011 - 1.2325).

In total, the Government has cross currency swaps on a notional value of debt of \$2,507.5 million (2011 - \$2,507.5 million). The effectiveness of these hedges is assessed on an ongoing basis by monitoring the credit ratings of the counterparties to the hedges.

Credit risk is the risk that a loss may occur from the failure of another party to meet its obligations under a derivative financial instrument contract. This risk is managed by dealing only with counterparties that have good credit ratings and by establishing limits on individual counterparty exposures and monitoring those exposures on a regular basis. At March 31, 2012, 100 per cent (2011 - 100 per cent) of the Government's counterparties held a Standard and Poor's credit rating of A or better.

Liquidity risk is the risk that the Government will not be able to meet its financial commitments over the short term. This risk is managed by distributing debt maturities over many years, maintaining sinking funds on long-term debt issues and maintaining adequate cash reserves and short-term borrowing programs as contingent sources of liquidity.

Notes to the Summary Financial Statements

5. Employee Future Benefits

Pension plans

The Government sponsors several defined benefit and defined contribution pension plans. The Government also participates in a joint defined benefit pension plan.

Defined benefit plans provide benefits based on length of service and pensionable earnings. A typical defined benefit plan provides pensions equal to 2.0 per cent of a member's average five years highest salary, multiplied by the years of service to a maximum of 35 years. Members contribute a percentage of salary, which may vary based on age, to their plan. Pensions and contribution rates are integrated with the Canada Pension Plan.

Actuarial valuations are performed at least triennially. An actuary extrapolates these valuations when a valuation is not done in the current fiscal year. Valuations are based on a number of assumptions about future events, such as inflation rates, interest rates, wage and salary increases and employee turnover and mortality. These assumptions reflect estimates of expected long-term rates and short-term forecasts. Estimates vary based on the individual plan.

The accrued benefit obligation is determined using the projected benefit method prorated on services. Pension fund assets are valued at market related values based on the actual market values averaged over a four-year period. In the periods between valuations, the actuary estimates the market related value of pension fund assets using expected long-term rates of return for the individual plans.

Joint defined benefit plans are governed by a formal agreement between the joint sponsors (i.e., employer and plan members), which establishes that the joint sponsors have shared control over the plan. Funding contributions are shared mutually between the employer and plan members. The sponsors share, on an equitable basis, the significant risks of each plan. Accordingly, the Government accounts for only its portion of the plan. Plan assets and surpluses are restricted for member benefits or certain other purposes set out in the agreement. Plan benefits are determined on the same basis as defined benefit plans.

The accrued benefit obligation is determined using the projected accrued benefit actuarial cost method. Pension fund assets are valued at market related values by averaging the difference between the net investment income on a market value basis and the expected investment income determined by the actuary, over a five-year period.

Defined contribution plans provide pensions based on accumulated contributions and investment earnings. Employees contribute a percentage of salary. The Government provides contributions at specified rates for employee current service.

Pension fund assets of government sponsored defined benefit and defined contribution plans are invested in fixed income securities, equities, real estate and short-term monetary items. The investment in Government of Saskatchewan securities is insignificant for all plans.

Government service organizations

a) Defined benefit plans and joint defined benefit plan

The two main defined benefit plans are the Teachers' Superannuation Plan (TSP) and the Public Service Superannuation Plan (PSSP). Other plans include Judges of the Provincial Court Superannuation Plan (Judges), Saskatchewan Transportation Company Employees Superannuation Plan (STC), Anti-TB League Employees Superannuation Plan (ATB), Pension Plan for the Non-Teaching Employees of the Saskatoon School Division No. 13 (PPNTE), and the Saskatchewan Pension Annuity Fund, an annuity underwriting operation. Defined benefits are also payable to members of the former Members of the Legislative Assembly Superannuation Fund (MLA).

The Government is required to match member current service contributions for all plans except the PSSP, Judges and PPNTE. Funding contributions are required for the PPNTE. Separate pension funds are maintained for all plans except the PSSP and the MLA, for which member contributions are received and pension obligations are paid directly by the Government.

The Government also participates in the Saskatchewan Healthcare Employees' Pension Plan (SHEPP), a joint defined benefit plan for employees of the Regional Health Authorities. The Government contributes to the plan at the ratio of 1.12 to 1 of employee contributions. Any actuarially determined deficiency is the responsibility of participating employers and employees in the ratio of 1.12 to 1. The Government's participating employer contributions for the SHEPP represents approximately 90 per cent of the total employer contributions to the plan.

Notes to the Summary Financial Statements

5. Employee Future Benefits *(continued)*

Information on the defined benefit plans and the joint defined benefit plan of government service organizations is as follows:

	2012					2011

Post-retirement index <i>(percentage of annual increase in Consumer Price Index)</i>	80	70	70-75	Ad hoc	n/a	n/a

¹ Judges and PPNT are open to new membership; all other plans are closed.

² Contribution rate varies based on age upon joining the plan.

b) Defined contribution plans

The two main multi-employer defined contribution plans sponsored by the Government are the Public Employees Pension Plan (PEPP) and the Capital Pension Plan (Capital). The Government provides contributions to the plans at specified rates for employee current service. The Government also contributes to the Saskatchewan Teachers' Retirement Plan (STRP), sponsored by the Saskatchewan Teachers' Federation, the Municipal Employees' Pension Plan (MEPP) and the Regina Civic Employees' Superannuation and Benefit Plan (RCESP). The Government has fully funded its share of contributions to the defined contribution plans.

Information on the defined contribution plans of government service organizations is as follows:

	2012					2011	
	Government Sponsored		STRP ¹	MEPP ²	RCESP ³	Total	Total
	PEPP	Capital					
Plan status	open	open	open	open	open	n/a	n/a
Member contribution rate <i>(percentage of salary)</i>	5.00-9.00 ⁴	5.00-7.50 ⁴	7.80-10.00	7.40	8.42-13.96	n/a	n/a
Government contribution rate <i>(percentage of salary)</i>	5.00-9.00 ⁴	5.50-8.00 ⁴	7.00-9.00	7.40	8.42-13.96	n/a	n/a
Government service organization participation							
Number of active members	15,638	733	14,028	9,575	2,158	42,132	41,016
Member contributions <i>(thousands of dollars)</i>	69,445	2,776	63,373	17,922	12,275	165,791	155,479
Government contributions <i>(thousands of dollars)</i>	72,499	3,509	67,483	17,922	12,491	173,904	163,187

¹ Teachers employed by Boards of Education after July 1, 1980 participate in the STRP, a contributory defined benefit pension plan. The Government contributes an amount which is set through provincial negotiations.

² Certain employees of Boards of Education and Regional Colleges participate in the MEPP, a multi-employer defined benefit plan. All costs, including costs of any actuarially determined deficiency, are equally shared by the employees and employers. At December 31, 2011, audited financial statements for the MEPP reported an accrued benefit obligation of \$1,599.7 million (2010 - \$1,353.3 million) and pension fund assets at market value of \$1,366.9 million (2010 - \$1,371.5 million).

³ Certain employees of a Regional Health Authority and a Board of Education participate in the RCESP, a multi-employer defined benefit plan. All costs, including costs of any actuarially determined deficiency, are equally shared by the employees and employers. At December 31, 2011, audited financial statements for the RCESP reported an accrued benefit obligation of \$1,182.5 million (2010 - \$1,084.7 million) and pension fund assets at market value of \$889.5 million (2010 - \$875.7 million).

⁴ Contribution rate varies based on employee group.

Notes to the Summary Financial Statements

5. Employee Future Benefits *(continued)*

c) Pension expense

Pension expense for government service organizations is primarily allocated to education expense, health expense and other expense. Pension interest expense is included in debt charges. The total pension expense of government service organizations includes the following:

<i>(thousands of dollars)</i>	2012	2011
Defined benefit plans		
Current period benefit cost	43,600	53,445
Amortization of estimation adjustments	91,347	143,047
Employee contributions	(9,804)	(12,899)
Cost of financing unfunded pension obligation (pension interest expense)	262,270	277,991
Pension expense, defined benefit plans	387,413	461,584
Other plans		
Pension expense, joint defined benefit plan	161,026	168,671
Pension expense, defined contribution plans	173,904	163,187
Total Pension Expense	722,343	793,442

Government business enterprises

a) Defined benefit plans

There are additional employee pension plans of government business enterprises which are accounted for in the investment in government business enterprises. The two main defined benefit plans of government business enterprises are the Power Corporation Superannuation Plan (SaskPower) and the Saskatchewan Telecommunications Pension Plan (SaskTel). Other plans include the Saskatchewan Government Insurance Superannuation Plan, the Liquor Board Superannuation Plan, and the Pension Plan for the Employees of the Saskatchewan Workers' Compensation Board (WCB).

The Government contributes the amount necessary to fund the payment of pension benefits.

Information on the defined benefit plans of government business enterprises is as follows:

	2012				2011
	SaskPower	SaskTel	Others	Total	Total
Plan status	closed	closed	closed	n/a	n/a
Number of active members	208	90	32	330	452

Post-retirement index <i>(percentage of annual increase in Consumer Price Index)</i>	70	100	50-70	n/a	n/a

Notes to the Summary Financial Statements

5. Employee Future Benefits *(continued)*

Based on the latest actuarial valuations with extrapolations to December 31, 2011, the present value of accrued pension benefits and the market value of pension fund assets are shown in the table below:

<i>(thousands of dollars)</i>	2012				2011
	SaskPower	SaskTel	Others	Total ³	Total ³ <i>(note 12)</i>
Accrued benefit obligation	988,379	1,130,310	135,626	2,254,315	2,096,338
Fair value of plan assets ¹	726,561	914,283	77,839	1,718,683	1,761,474
Plan deficit	261,818	216,027	57,787	535,632	334,864
Unamortized amounts ²	-	-	(6,397)	(6,397)	(415,932)
Pension Liabilities (Assets)	261,818	216,027	51,390	529,235	(81,068)

¹ At December 31, 2011, 32.2 per cent (2010 - 29.9 per cent) of pension plan assets were invested in fixed income securities and 51.8 per cent (2010 - 57.0 per cent) in equity investments.

² Beginning in 2011-12, all plans except WCB recognize actuarial gains and losses arising from employee future benefit plans directly in other comprehensive income in the year of occurrence. For WCB, amounts are amortized over the average remaining service life of active employees.

³ In 2011-12, government business enterprises adopted International Financial Reporting Standards. Comparative figures were prepared on the basis of Canadian generally accepted accounting principles and have not been restated.

b) Defined contribution plans

Information on the defined contribution plans of government business enterprises is as follows:

	2012			2011
	PEPP	Capital	Total	Total
Plan status	open	open	n/a	n/a
Member contribution rate <i>(percentage of salary)</i> ¹	4.00-7.25	4.00-5.50	n/a	n/a
Government contribution rate <i>(percentage of salary)</i> ¹	6.00-7.25	5.50-6.00	n/a	n/a
Government business enterprise participation				
Number of active members	9,129	2,723	11,852	11,843
Government contributions <i>(thousands of dollars)</i>	41,678	8,053	49,731	47,335

¹ Contribution rate varies based on employee group.

c) Pension expense

Pension expense and pension interest expense for government business enterprises are included in income from government business enterprises. The pension income is \$7.1 million (2011 - \$55.0 million expense) for the defined benefit plans and \$49.7 million expense (2011 - \$47.3 million) for the defined contribution plans. The total actuarial losses recognized in other comprehensive loss were \$283.8 million.

Other employee future benefits

Government service organizations

Other employee future benefits of government service organizations include long-term disability benefit plans, a group life insurance plan providing waiver of premiums during disability and other benefits. The benefit liability of \$44.5 million (2011 - \$56.4 million) is recorded in accounts payable and accrued liabilities, and the benefit expense of \$15.2 million (2011 - \$23.6 million) is recorded in education expense and health expense.

Government business enterprises

Other employee future benefits of government business enterprises include a defined benefit severance plan, a supplementary superannuation plan, two defined benefit service recognition plans, a defined benefit retiring allowance plan and a voluntary early retirement plan. The accrued benefit liability is \$106.9 million (2011 - \$89.2 million) and the benefit expense is \$13.6 million (2011 - \$18.1 million).

Notes to the Summary Financial Statements

6. Contingencies

Guaranteed debt

The Government has guaranteed the debt of others of \$28.4 million (2011 - \$29.1 million).

Significant guarantees include \$15.8 million (2011 - \$14.8 million) provided to lenders who make loans to breeder and feeder production associations under *The Farm Financial Stability Act*. The Government guarantees the repayment of 25 per cent of the outstanding loan balance at the time of a first default on any advance, plus accrued interest as of the time that payment is to be made on the guarantee. Guarantees for each cattle association are limited to \$6 million under the breeder option. Guarantees for each bison and sheep association are limited to \$6 million and \$4 million respectively, under both the breeder and feeder options. These guarantees are net of a recorded loss provision of \$0.7 million (2011 - \$0.1 million).

Lawsuits

The Government is involved in various legal actions, the outcome of which is not determinable. Up to \$425.2 million may be paid depending on the outcome of lawsuits in progress. The lawsuits in progress include aboriginal land claims, claims for damages to persons and property, disputes of taxes and funding and various other legal actions.

7. Contractual Obligations

The Government has operating and capital lease obligations as follows:

<i>(thousands of dollars)</i>	Operating ¹	Capital ²
Future minimum lease payments		
2012-13	161,043	130,561
2013-14	117,830	83,914
2014-15	60,488	82,751
2015-16	47,267	82,398
2016-17	28,147	82,408
Thereafter	31,143	1,092,691
	445,918	1,554,723
Interest and executory costs	-	(905,522)
Total Lease Obligations	445,918	649,201

¹ Total operating lease obligations include \$237.6 million for government service organizations and \$208.3 million for government business enterprises.

² Total capital lease obligations include \$43.3 million for government service organizations (*schedule 6*) and \$605.9 million for government business enterprises.

The Government has significant other contractual obligations including:

- forward purchase agreements of approximately \$2,581.8 million for power over the next 22 years, \$1,086.5 million for future minimum coal deliveries valued at current prices over the next 13 years and \$341.3 million for natural gas over the next four years;
- contracts for the construction and acquisition of tangible capital assets of \$1,781.4 million over the next four years;
- computer service agreements of \$176.2 million over the next six years;
- beverage container collection and recycling programs of \$87.8 million over the next four years;
- agreements to provide housing subsidies and transfers of \$80.8 million over the next five years;
- agreements to provide loss of income subsidies to previous purveyors of gaming services of \$54.7 million over the next 16 years;
- projects to expand innovation and enhance the competitive ability of the Saskatchewan economy of \$31.4 million over the next four years;
- research and development projects for agriculture technology and opportunities in the agri-food industry of \$25.3 million over the next five years;
- capital grant projects of \$19.6 million over the next two years; and
- other contractual obligations of \$181.1 million over the next 14 years.

Notes to the Summary Financial Statements

8. Government Partnerships

The Government has entered into various contractual arrangements with parties outside the government reporting entity resulting in shared control of certain organizations. The Government's holdings in government partnerships include:

- a 60 per cent interest in Apex Investment Limited Partnership, which invests in a variety of industries in the prairie region of Canada;
- a 45.5 per cent interest in Saskatchewan Entrepreneurial Fund Joint Venture, which assists with the development and growth of small business in the Province;
- a 33.3 per cent interest in Foragen Technologies Limited Partnership, a venture capital fund which provides seed capital to technology corporations; and
- shared control of Prairie Diagnostic Services Inc., which provides veterinary diagnostic services to veterinary and livestock industries in the Province.

As a result of the ongoing receivership of Meadow Lake Pulp Limited Partnership (MLPLP), it no longer meets the definition of a government partnership and, accordingly, is no longer proportionately consolidated as a government partnership (*note 11*).

The Government's pro-rata share of its government partnerships is as follows:

<i>(thousands of dollars)</i>	2012	2011
Financial assets	33,245	49,656
Liabilities	2,132	6,763
Net assets	31,113	42,893
Non-financial assets	534	551
Accumulated Surplus	31,647	43,444
Revenue	6,322	7,416
Expense	8,796	5,824
(Deficit) Surplus	(2,474)	1,592
Recovery of partnership interest	-	423
Accumulated partnership earnings, beginning of year	18,186	16,171
Adjustment for accounting change (<i>note 11</i>)	(15,860)	-
Accumulated partnership (losses) earnings, end of year	(148)	18,186
Equity advances from government organizations	31,795	25,258
Accumulated Surplus	31,647	43,444

Notes to the Summary Financial Statements

9. Non-controlling Interest

Government service organizations controlled by the Government may also have ownership by individuals or organizations outside of the government reporting entity. This outside ownership is a non-controlling interest. The 49.2 per cent non-controlling interest of Prairie Ventures Limited Partnership, a subsidiary of CIC Asset Management Inc., amounts to \$8.4 million (2011 - \$6.7 million) in accumulated surplus, which has been excluded from these financial statements.

10. Trust Funds

Trust fund assets held and administered by the Government are as follows:

<i>(thousands of dollars)</i>	2012	2011
Pension plans	10,609,344	10,634,991
Employee benefit plans	300,709	250,623
Public Guardian and Trustee of Saskatchewan	163,730	158,830
Other	52,216	47,065
Total Trust Fund Assets¹	11,125,999	11,091,509

¹ Amounts are based on the latest financial statements of the funds closest to March 31, 2012, where available.

11. Accounting Change

As a result of the ongoing receivership of Meadow Lake Pulp Limited Partnership (MLPLP), it no longer meets the definition of a government partnership and is now fully consolidated in these financial statements. Prior to 2011-12, MLPLP was proportionately consolidated as a government partnership based on the Government's 50 per cent partnership interest; the remaining 50 per cent asset position was recorded in other investments.

At April 1, 2011, these financial statements were adjusted as follows:

<i>(thousands of dollars)</i>	Increase (Decrease)
Financial assets	
Cash	21,030
Accounts receivable	38
Other investments	(15,860)
Liabilities	
Accounts payable and accrued liabilities	583
Other liabilities	4,625
Net debt	-

Notes to the Summary Financial Statements

12. Adjustment to Accumulated Surplus

As a result of government business enterprises' adoption of International Financial Reporting Standards (IFRS), the Government's investment in government business enterprises increased by \$47.0 million during 2011-12 with a corresponding increase in the accumulated surplus. Comparative figures have not been restated.

The adoption of IFRS by government business enterprises impacted their financial statements as shown below. The net impact was an increase in their retained earnings of \$280.1 million and a decrease in their accumulated other comprehensive income of \$233.1 million.

Comparative figures presented on schedule 3 were prepared on the basis of Canadian generally accepted accounting principles (Canadian GAAP) and have not been restated. The information below summarizes the impact of the IFRS adoption on the prior year financial statements of government business enterprises and is provided to allow for comparison to 2011-12:

(thousands of dollars)

	2011		
	Canadian GAAP (schedule 3)	Adjustments for IFRS	IFRS

Taxation	409,982	388,868
Non-renewable resources	225,156	210,545
Other own-source revenue	595,421	505,971
Transfers from the federal government	453,399	415,021
	1,683,958	1,520,405
Provision for loss	(103,820)	(105,095)
Total Accounts Receivable	1,580,138	1,415,310

Loans Receivable**Schedule 2**

As at March 31, 2012
(thousands of dollars)

	2012	2011
Government business enterprises	429,798	480,414
Student loans	134,613	129,929
Agricultural loans	40,478	53,218
Other	25,461	24,956
	630,350	688,517
Provision for loss	(75,971)	(82,123)
Total Loans Receivable	554,379	606,394

Government Business Enterprises

Loans to government business enterprises are presented net of government business enterprise specific debt of \$3.9 billion (2011 - \$3.4 billion).

SaskEnergy Incorporated (SaskEnergy)

The Government has \$310.0 million (2011 - \$380.0 million) in loans receivable from SaskEnergy. Of this, \$170.0 million (2011 - \$170.0 million) is repayable over terms not exceeding 29 years and bears interest at rates between 4.5 and 4.9 per cent (2011 - 4.5 and 4.9 per cent). The remaining \$140.0 million (2011 - \$210.0 million) is repayable on demand at a floating rate of interest. The loans are recorded net of \$5.8 million (2011 - \$3.6 million) for SaskEnergy's equity in sinking funds administered by the Government.

Saskatchewan Power Corporation (SaskPower)

The Government has \$100.0 million (2011 - \$100.0 million) in loans receivable from SaskPower repayable over 29 years and bearing interest at 4.8 per cent (2011 - 4.8 per cent). The loans are recorded net of \$3.4 million (2011 - \$2.2 million) for SaskPower's equity in sinking funds administered by the Government.

Loans Receivable *(continued)*

Schedule 2

Government Business Enterprises *(continued)*

Other government business enterprise loans

The Government has \$29.0 million (2011 - \$6.2 million) in loans receivable from other government business enterprises. The loans are repayable on demand at a floating rate of interest.

Student Loans

The program operates under the authority of *The Student Assistance and Student Aid Fund Act, 1985*. Loans are interest free until the discontinuance of full-time studies or graduation. Interest rates are prescribed by the Government and range between 3.0 and 9.5 per cent (2011 - 3.0 and 9.3 per cent). Student bursaries, study grants and other varieties of loan forgiveness are available to students who meet specific criteria.

The administration and delivery of the federal and provincial student loans programs is integrated. The Government approves applications for both provincial and federal loans. External agencies are contracted to disburse, administer and collect loans, and the federal government is responsible for collection of loans in default.

Student loans approved between August 1996 and July 2001 are lender financed, disbursed, managed and collected by a bank. The Government retained responsibility for loan approval during this period and pays a risk premium of 5.0 per cent to the bank when loans become repayable.

A loss provision of \$64.3 million (2011 - \$62.2 million) has been recorded on these loans.

Agricultural Loans

Short-term cattle loan program

The Government holds \$28.3 million (2011 - \$32.1 million) in loans under the short-term cattle loan program. These loans are repayable over terms not exceeding four years at a floating rate of interest between 1.1 and 1.2 per cent (2011 - 0.4 and 1.2 per cent). The loans are secured by general security agreements. The program operates under *The Agricultural Credit Corporation of Saskatchewan Act*. A loss provision of \$5.1 million (2011 - \$5.1 million) has been recorded on these loans.

Capital loan program

The Government holds \$7.8 million (2011 - \$10.4 million) in loans under the capital loan program. These loans are repayable over terms not exceeding 25 years and bear interest at rates between 5.0 and 8.0 per cent (2011 - 5.0 and 8.0 per cent). Security on individual loans varies and may include mortgages on real property, security agreements and guarantees. The program operates under *The Agricultural Credit Corporation of Saskatchewan Act*. A loss provision of \$1.1 million (2011 - \$1.5 million) has been recorded on these loans.

Short-term hog loan program

The Government holds \$3.3 million (2011 - \$8.7 million) in loans under the short-term hog loan program. These loans are repayable over terms not exceeding five years at a floating rate of interest between 1.5 and 1.6 per cent (2011 - 0.3 and 1.1 per cent). The loans are secured by general security agreements. The program operates under *The Farm Financial Stability Act*. A loss provision of \$1.2 million (2011 - \$6.5 million) has been recorded on these loans.

Other agricultural loans

The Government holds \$1.1 million (2011 - \$2.0 million) in loans under various other agricultural loan programs. The interest on these loans ranges from 0.0 to 12.0 per cent (2011 - 0.0 to 12.0 per cent). Generally, the loans are secured by promissory notes and, where applicable, by guarantees or general security arrangements. A loss provision of \$0.5 million (2011 - \$1.0 million) has been recorded on these loans.

Other

The Government's loan portfolio also consists of numerous other loans at various interest rates with maturities not exceeding 17 years. Security on the loans may include promissory notes or charges against residential property. A loss provision of \$3.8 million (2011 - \$5.8 million) has been recorded on these loans.

Net Assets (Debt)	616,084	1,863,243	571,882	253,710

¹ Net assets are restricted as disclosed on page 106.

² Adjustments include:
 • significant intervening period transactions; and
 • eliminating unrealized gains and losses on transactions with government organizations.

³ Total assets includes \$636.3 million (2011 - \$527.4 million - restated) due from or invested in government organizations; total liabilities includes \$4,651.5 million (2011 - \$4,409.8 million) in gross debt owing to government organizations and \$349.2 million (2011 - \$249.5 million - restated) in accounts payable or services due from government organizations; total revenue includes \$231.6 million (2011 - \$262.4 million - restated) from government organizations; and total expense includes \$486.4 million (2011 - \$485.6 million - restated) paid and owing to government organizations.

⁴ Debt charges is reported net of sinking fund earnings. Interest in the amount of \$196.0 million (2011 - \$209.0 million - restated) was paid and owing to government organizations.

⁵ Retained earnings (deficit), beginning of year and accumulated other comprehensive income (loss), beginning of year are reported on the basis of Canadian generally accepted accounting principles (*note 12*).

⁶ Other comprehensive income (loss) for the current year consists primarily of benefit plan actuarial losses of \$283.8 million. Prior year other comprehensive income, reported on the basis of Canadian generally accepted accounting principles (*note 12*), consists of \$219.6 million net unrealized gains less \$81.0 million net realized gains recognized in net income.

Investment in Government Business Enterprises *(continued)*

Schedule 3

The investment in government business enterprises is comprised of the Government's equity in the entities listed below. Beginning in 2011-12, the financial statements of these entities are prepared in accordance with International Financial Reporting Standards (*note 12*). Comparative figures were prepared on the basis of Canadian generally accepted accounting principles and have not been restated.

SaskEnergy Incorporated (SaskEnergy)

SaskEnergy promotes, transports, stores and distributes natural gas in Saskatchewan.

Saskatchewan Power Corporation (SaskPower)

SaskPower generates, purchases, transmits, distributes and sells electricity and related products and services.

Saskatchewan Telecommunications Holding Corporation (SaskTel)

SaskTel markets and supplies a range of voice, data, internet, wireless, text, image, security and entertainment products, systems and services. Through interconnection agreements, SaskTel is part of the national and global communications network.

Saskatchewan Government Insurance (SGI) and Saskatchewan Auto Fund (Auto Fund)

SGI's competitive general insurance business, SGI CANADA, offers a comprehensive line of home, tenant, farm, automobile extension and commercial coverages.

The Auto Fund, the provincial compulsory vehicle insurance program, is administered by SGI on behalf of the Government. Any net assets of the Auto Fund are held on behalf of Saskatchewan's motoring public and cannot be used for any other purpose.

Workers' Compensation Board (Saskatchewan) (WCB)

WCB provides workers' compensation insurance to Saskatchewan workers and employers. Any net assets of the WCB cannot be used for any other purpose.

Liquor and Gaming Authority (SLGA)

SLGA's mandate is to control the manufacturing and distribution of beverage alcohol throughout the Province, to oversee the licensing of all establishments selling alcohol in the Province and to maintain the integrity of all licensed gaming while ensuring maximum benefit to Saskatchewan charities.

To fulfill its mandate, SLGA operates retail liquor stores and video lottery terminals. It also owns and manages all slot machines at Saskatchewan Indian Gaming Authority casinos.

Saskatchewan Gaming Corporation (SGC)

SGC manages and operates Casino Regina and Casino Moose Jaw.

Municipal Financing Corporation of Saskatchewan (MFC)

MFC assists municipalities in financing their capital requirements.

Other Investments

As at March 31, 2012

*(thousands of dollars)***Schedule 4**

	2012	2011
Bonds and debentures	754,402	834,784
Pooled investment funds	92,086	96,185
Equities	71,578	75,262
Loans and advances	19,827	34,292
Other	51,818	102,433
Total Other Investments	989,711	1,142,956

Bonds and Debentures

Bonds and debentures held by the Government have a market value of \$764.4 million (2011 - \$835.7 million), and include securities of:

	2012	2011
Corporations (coupon interest range 1.7% to 12.5%; maturing in 1.0 to 39.8 years)	298,901	239,649
Governments of other provinces (coupon interest range 1.3% to 8.5%; maturing in 1.1 to 25.1 years)	281,348	435,676
Government of Canada (coupon interest range 0.5% to 5.0%; maturing in 1.5 to 25.2 years)	50,195	149,206
Government of Saskatchewan (coupon interest range 4.2% to 5.8%; maturing in 4.4 to 16.9 years)	3,192	4,657
Other (coupon interest range 3.0% to 12.1%; maturing in 1.5 to 44.3 years)	120,766	5,596
Total Bonds and Debentures	754,402	834,784

Pooled Investment Funds

Pooled investment funds represent the Government's investment in units of various funds consisting primarily of debt and equities.

Equities

Equities include \$60.1 million (2011 - \$64.9 million) invested in shares of private companies and \$11.5 million (2011 - \$10.4 million) invested in Canadian and international equity markets for which the quoted market value is \$12.4 million (2011 - \$12.4 million). Investments in equities are as follows:

	2012	2011
Equities subject to significant influence		
Meadow Lake OSB Limited Partnership ¹	10,800	23,695
Other	15,417	16,766
Other	45,361	34,801
Total Equities	71,578	75,262

¹ The Government, as a limited partner, holds a 25 per cent interest in Meadow Lake OSB Limited Partnership (MLOS), an oriented strand board facility near Meadow Lake. The Government had issued options to purchase its units of MLOS. These options expired, unexercised, in 2011.

Loans and Advances

Loans and advances include loan agreements between the Government and companies in which the Government holds shares.

Other

Other investments include various fixed rate securities having a market value of \$52.3 million (2011 - \$103.2 million).

¹ Public debt on the Statement of Financial Position includes only general debt.

² General debt and government business enterprise specific debt are presented net of sinking funds.

³ General debt includes \$73.5 million (2011 - \$78.9 million) secured primarily by assets with a carrying value of \$106.8 million (2011 - \$113.7 million).

⁴ Public debt of government business enterprises includes both general debt and government business enterprise specific debt. General debt of government business enterprises represents amounts transferred from the General Revenue Fund to government business enterprises and recorded as loans receivable (schedule 2). Government business enterprise specific debt represents debt issued by, or specifically on behalf of, government business enterprises.

Schedule 3 provides information on government business enterprises as presented in their audited financial statements closest to March 31, 2012. Public debt of government business enterprises shown above has been adjusted for transactions occurring from the audited financial statements to March 31, 2012 as follows:

	2012		2011	
	Government Business Enterprise Debt (schedule 3) ^a	Transactions to March 31	Public Debt	Public Debt ^b
Saskatchewan Power Corporation	2,605,104	138,030	2,743,134	2,588,090

Total Government Business Enterprises	4,157,064	190,032	4,347,096	3,942,273

^a Includes gross debt net of sinking funds reported on schedule 3.

^b Reported on the basis of Canadian generally accepted accounting principles (note 12).

Public Debt (continued)

Schedule 8

⁵ Included in public debt is U.S. dollar debt converted to \$23.9 million Canadian (2011 - \$37.2 million) at the exchange rate in effect at March 31, 2012 of 0.9991 (2011 - 0.9718).

Public debt is comprised of gross debt net of sinking funds as follows:

	2012		Public Debt
	Gross Debt ^a	Sinking Funds (schedule 9)	
General Revenue Fund	5,906,884	(2,099,294)	3,807,590
Less amounts held by government service organizations	(23,170)	-	(23,170)
Saskatchewan Power Corporation	3,096,922	(353,788)	2,743,134
SaskEnergy Incorporated	1,005,999	(72,803)	933,196
Saskatchewan Telecommunications Holding Corporation	600,800	(78,773)	522,027
Municipal Financing Corporation of Saskatchewan	137,746	(2,097)	135,649
Regional Health Authorities	81,690	-	81,690
Boards of Education	74,487	-	74,487
Saskatchewan Immigrant Investor Fund Inc.	71,738	-	71,738
Saskatchewan Water Corporation	62,661	(8,594)	54,067
Saskatchewan Opportunities Corporation	36,684	(955)	35,729
Saskatchewan Housing Corporation	59,803	(24,766)	35,037
Saskatchewan Gaming Corporation	13,090	-	13,090
Information Services Corporation of Saskatchewan	9,935	-	9,935
Other	7,885	-	7,885
Public Debt	11,143,154	(2,641,070)	8,502,084

^a The average effective interest rate on gross debt during 2011-12 was 6.2 per cent (2010-11 - 6.4 per cent) and includes the impact of foreign exchange and the amortization of any premiums or discounts associated with the debentures. The average term to maturity of gross debt is 11.5 years (2011 - 11.5 years).

Debt principal payment requirements in each of the next five years and thereafter are as follows:

Year of Maturity	2012	2011
Short-term promissory notes	692,340	586,293
2011-12	-	292,342
2012-13	1,198,743	1,184,522
2013-14	811,077	819,201
2014-15	945,699	925,781
2015-16	515,373	538,696
2016-17	422,161	-
6-10 years	1,730,728	1,799,612
Thereafter	4,827,033	4,633,009
Gross debt ^a	11,143,154	10,779,456
Sinking funds	(2,641,070)	(2,431,821)
Public Debt	8,502,084	8,347,635

^a Gross debt includes Canada Pension Plan debentures of \$745.1 million (2011 - \$745.1 million). These debentures are callable in whole or in part before maturity, at the option of the Minister of Finance of Saskatchewan.

Sinking Funds

As at March 31, 2012

(thousands of dollars)

Schedule 9

	2011		2012			Sinking Funds
	Sinking Funds	Contributions ¹	Earnings ²	Redemptions ³	Currency Adjustment	
General Revenue Fund	1,976,416	46,718	166,510	(96,992)	6,642	2,099,294
Saskatchewan Power Corporation	298,734	26,723	28,331	-	-	353,788
Saskatchewan Telecommunications Holding Corporation	66,672	5,866	6,235	-	-	78,773

Saskatchewan Housing Corporation	22,242	520	2,004	-	-	24,766
Saskatchewan Water Corporation	5,761	2,241	592	-	-	8,594
Municipal Financing Corporation of Saskatchewan	1,574	362	161	-	-	2,097
Saskatchewan Opportunities Corporation	514	367	74	-	-	955
Total Sinking Funds⁴	2,431,821	89,909	209,690	(96,992)	6,642	2,641,070

¹ Annual contributions, established by Order in Council, are set at not less than one per cent of debentures outstanding. The aggregate amount of contributions estimated to be required in each of the next five years and thereafter to meet sinking fund requirements by debt classification (see footnote 4) are as follows:

	2013	2014	2015	2016	2017	Thereafter	Total
General debt ^a	51,481	51,481	44,595	35,257	31,012	358,148	571,974
Government business enterprise specific debt	38,394	38,394	37,372	36,872	36,322	520,328	707,682
Total Sinking Fund Contributions	89,875	89,875	81,967	72,129	67,334	878,476	1,279,656

^a Each year, until 2015, includes contributions of 1.0 million U.S. dollars.

² Sinking fund earnings include gains on investment sales of \$128.2 million (2011 - \$71.6 million).

³ The redemption value is based on the market value of the sinking fund units at the date of redemption.

⁴ The market value of total sinking funds is \$2,683.1 million (2011 - \$2,415.6 million). Total sinking funds by debt classification are as follows:

	2011		2012			Sinking Funds
	Sinking Funds	Contributions	Earnings	Redemptions	Currency Adjustment	
General debt	2,010,768	52,546	169,889	(96,992)	6,642	2,142,853
Government business enterprise specific debt	421,053	37,363	39,801	-	-	498,217
Total Sinking Funds	2,431,821	89,909	209,690	(96,992)	6,642	2,641,070

Sinking fund assets have been invested as follows:

	2012	2011
Long-term investments in securities of:		
Governments of other provinces (coupon interest range 0.0% to 9.6%; maturing in 1.9 to 31.7 years)	1,292,057	1,257,328
Government of Saskatchewan (coupon interest range 0.0% to 10.3%; maturing in 1.2 to 29.8 years)	555,455	382,781
Government of Canada (coupon interest range 2.8% to 4.0%; maturing in 4.2 to 29.2 years)	54,566	128,655
Government of the United States (coupon interest 2.0%; maturing in 9.9 years)	4,951	6,954
Corporations	-	10,499
Cash, short-term investments and accrued interest ^a	734,041	645,604
Total Sinking Funds^b	2,641,070	2,431,821

^a Cash, short-term investments and accrued interest are disclosed net of \$0.3 million (2011 - \$0.5 million) in liabilities.

^b Included in total sinking funds are U.S. dollar cash, investments and accrued interest converted to \$250.9 million Canadian (2011 - \$230.1 million) at the exchange rate in effect at March 31, 2012 of 0.9991 (2011 - 0.9718).

Pension Liabilities

Benefit payments	(333,480)	(126,456)	(26,238)	(486,174)	(469,985)
Plan Assets, End of Year³	751,164	-	296,403	1,047,567	1,293,591
	5,045,420	2,085,497	367,489	7,498,406	6,320,822
Unamortized estimation adjustments ⁴	(930,097)	(220,437)	(30,825)	(1,181,359)	(145,027)
Total Pension Liabilities⁵	4,115,323	1,865,060	336,664	6,317,047	6,175,795

¹ The TSP had an actual rate of return on plan assets of 1.7 per cent (2011 - 10.8 per cent).

² The joint defined benefit plan includes only the Government's employer portion of the pension liability. At December 31, 2011, the SHEPP had a total accrued benefit obligation of \$4,089.0 million (2010 - \$3,763.3 million) and pension fund assets of \$3,675.6 million (2010 - \$3,467.2 million) at market related values and unamortized estimation adjustment gains of \$11.9 million (2010 - \$48.9 million). The pension liability would increase by \$583.5 million or would decrease by \$474.7 million if the discount rate was decreased or increased by one percentage point respectively. The market value of the pension fund investments was \$3,540.8 million (2010 - \$3,330.9 million). Of this amount, 35.0 per cent (2010 - 34.0 per cent) was invested in fixed income securities and 57.0 per cent (2010 - 59.0 per cent) in equity investments. The plan assets had an actual rate of return of 2.9 per cent (2010 - 11.6 per cent). The Government and member contributions to the plan totalled \$130.1 million (2010 - \$108.9 million) and \$128.8 million (2010 - \$103.7 million) respectively. Benefit payments from the plan totalled \$165.5 million (2010 - \$143.5 million).

³ At March 31, 2012, the market value of defined benefit plan investments was \$1,037.6 million (2011 - \$1,185.5 million). Of this amount, 43.8 per cent (2011 - 42.6 per cent) was invested in fixed income securities and 43.3 per cent (2011 - 45.2 per cent) in equity investments.

⁴ Unamortized estimation adjustments are amortized to pension expense over periods ranging from 3.5 to 4.0 years for the TSP, from 0.3 to 1.5 years for the PSSP and from 0.9 to 13 years for the other plans. These represent the expected average remaining service life of active plan members at the time the estimation adjustments arose.

⁵ The total pension liabilities are based on the latest actuarial valuations extrapolated to March 31, 2012 for the defined benefit plans and December 31, 2011 for the joint defined benefit plan. Changes in assumptions can result in significantly higher or lower estimates of pension liabilities. A one percentage point decrease in the discount rate would result in a \$697.5 million and \$258.0 million increase in the pension liabilities for the TSP and the PSSP respectively, and a one percentage point increase would result in a \$571.7 million and \$213.1 million decrease in the pension liabilities for the TSP and the PSSP respectively.

Tangible Capital Assets

The segments of the Summary financial statements are based on the accountability and control relationships between the Government and the various organizations within the government reporting entity. Schedule 18 identifies the organizations included in each segment.

¹ *Treasury Board organizations* include the General Revenue Fund, Growth and Financial Security Fund and organizations such as Regional Health Authorities, Boards of Education and Liquor and Gaming Authority.

² *CIC Board organizations* are agencies that are responsible to the Crown Investment Corporation of Saskatchewan (CIC) and include organizations such as Saskatchewan Power Corporation, Saskatchewan Telecommunications Holding Corporation and CIC Asset Management Inc.

³ *Not-for-profit insurance organizations* are intended to be actuarially sound over the long term. These entities typically adjust rates to break even over the longer term and include Saskatchewan Auto Fund, Saskatchewan Crop Insurance Corporation, Crop Reinsurance Fund of Saskatchewan and Workers' Compensation Board (Saskatchewan).

⁴ For segment disclosure (*schedule 17*) certain organizations are classified into categories other than Treasury Board Organizations as follows: ^a CIC Board Organizations; ^b Not-for-Profit Insurance Organizations.

Supplementary Information (unaudited)

Growth and Financial Security Fund Schedule of Transfers and Accumulated Balance

For the Year Ended March 31, 2012

(thousands of dollars)

	2012		2011
	Budget	Actual	Actual
Balance, beginning of year	1,005,968	1,005,968	958,299
Transfer from the General Revenue Fund	57,517	27,334	47,669
Transfer to the General Revenue Fund	(325,000)	(325,000)	-
Balance, End of Year	738,485	708,302	1,005,968

The Growth and Financial Security Fund (GFSF) was established May 14, 2008, by *The Growth and Financial Security Act*.

The purposes of the GFSF are:

- to assist in the achievement of the Province's long-term objectives by providing for financial security of the Government from year to year; and
- to provide a source of funds that are available for programs that have been identified as promoting or enhancing the economic development of the Province.

In accordance with *The Growth and Financial Security Act*, the GFSF receives 50 per cent of the pre-transfer surplus of the General Revenue Fund (GRF) in any fiscal year. This legislation also permits Treasury Board to approve other transfers between the GFSF and the GRF.

Transfers to the GFSF from the GRF are statutory disbursements. Amounts transferred to the GRF from the GFSF are available for use subsequent to receiving required approval from the Legislative Assembly.

In accordance with *The Growth and Financial Security Act*, all earnings on the GFSF's investments are credited to the GRF. For 2011-12, this amount was \$42.9 million (2011 - \$29.2 million).

The GFSF's assets have been invested in fixed income securities as follows:

	2012	2011
Long-term investments in securities of:		
Other provincial governments (coupon interest range 1.9% to 5.3%; maturing in 1.2 to 5.7 years)	319,320	409,839
Corporations (coupon interest range 2.1% to 5.2%; maturing in 2.1 to 4.6 years)	102,640	189,598
Government of Canada (coupon interest range 2.1% to 2.8%; maturing in 2.7 to 5.2 years)	25,977	123,325
Government of Saskatchewan (coupon interest 0.0% to 4.5%; maturing in 2.0 to 4.4 years)	23,170	45,211
Cash, accounts receivable, short-term investments and accrued interest	237,195	237,995
Total Growth and Financial Security Fund	708,302	1,005,968

The portfolio investments noted above are accounted for using the cost method. Under this approach, the GFSF earned a return of 4.4 per cent (2011 - 3.2 per cent).

The market value of the GFSF's net assets at March 31, 2012 is \$711.4 million (2011 - \$1,004.4 million).

The average effective interest rate on debentures issued to the Minister of Finance of Canada is 5.03%.

Canada Pension Plan debentures have a 5-30 year maturity and are callable in whole or in part before maturity at the option of the Minister of Finance of Saskatchewan. Canada Pension Plan debentures are subject in part to annual sinking funds.

Glossary of Terms

Accrual Accounting

The method used to prepare the financial statements included in Volume 1 of the Public Accounts. Accrual accounting recognizes financial transactions at the time they occur, regardless of whether any cash is received or paid.

Accumulated Surplus/Deficit

One of the two measures of a government's financial position (see net debt). The accumulated surplus/deficit is the amount by which revenue has exceeded expense/expense has exceeded revenue from the beginning of incorporation (1905) plus any adjustments that were charged directly to the accumulated surplus/deficit. It is calculated as the difference between assets and liabilities.

Budget

The amount presented in the Estimates and authorized by the Legislative Assembly.

Capital Transfer

A grant provided to a third party such as a university or municipality to acquire or develop capital assets.

Consolidation

The method used to account for government service organizations in the Summary financial statements in which the accounts are adjusted to the basis of accounting described in note 1 of the Summary financial statements and then combined. Inter-organization balances and transactions are eliminated.

Debenture

A certificate of indebtedness where the issuer promises to pay interest and repay principal by a maturity date. It is usually unsecured, meaning there are no liens or pledges on any specific assets.

Debt

Terms used when describing debt include:

Government general debt is debt issued by the General Revenue Fund (GRF) to fund Government spending.

Crown corporation general debt is debt issued by the GRF and subsequently loaned to a Crown corporation.

Government business enterprise specific debt is debt issued by the GRF specifically on behalf of a government business enterprise where the government expects to realize the receivable from the government business enterprise and settle the external debt simultaneously.

Gross debt is borrowings through the issuance of debt instruments such as promissory notes and debentures.

Sinking funds are funds set aside for the repayment of debt.

Public debt is gross debt net of sinking funds.

General debt is public debt net of loans to Crown corporations for government business enterprise specific debt.

Guaranteed debt is the debt of others that the Government has agreed to repay if others default.

Total debt is public debt plus guaranteed debt.

Debt Retirement Fund

The fund, established pursuant to *The Growth and Financial Security Act*, to account for the surpluses of the GRF commencing April 1, 2008.

Derivative

A financial contract that derives its value from other underlying variables such as interest rates, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, and credit rates. It does not require an initial investment and is settled at a future date.

Financial Asset

An asset that can be used to discharge existing liabilities or finance future operations and is not for consumption in the normal course of operations.

Glossary of Terms *(continued)*

Financial Instrument

Any contract that gives rise to a financial asset of one party and a financial liability or equity instrument of another party.

Financial Liability

Any liability that is a contractual obligation to deliver a financial asset to another party, or to exchange financial instruments with another party under conditions that are potentially unfavourable to the entity.

General Revenue Fund (GRF)

The fund into which all revenues are paid, unless otherwise provided for by legislation, and from which all expenditures are appropriated by the Legislative Assembly.

Government Business Enterprise

A self-sufficient government organization that has the financial and operating authority to sell goods and services to individuals and organizations outside the government reporting entity as its principal activity. Government business enterprises are recorded in the Summary financial statements using the modified equity method.

Government Partnership

An investment by the Government where there is a contractual arrangement between the Government and one or more partners outside the government reporting entity and where the partners share, on an equitable basis, the risks and benefits of the partnership. Government partnerships are proportionately consolidated in the Summary financial statements.

Government Service Organization

An organization that is controlled by the Government, except those designated as government business enterprises. Government service organizations are consolidated in the Summary financial statements after adjustment to a basis consistent with the accounting policies described in note 1 of the Summary financial statements.

Gross Domestic Product (GDP)

The standard measure of the overall size of the economy, the value of all goods and services produced during a period.

Growth and Financial Security Fund

The fund established in May of 2008 to assist in the achievement of the Government's long-term objectives by providing for financial security of the Government from year to year and to provide a source of funds that are to be available for appropriation to be used for government programs identified as promoting or enhancing the economic development of Saskatchewan.

Hedging

A strategy to minimize the risk of loss on an asset (or liability) from market fluctuations such as interest rate or foreign exchange rate changes. This is accomplished by entering into offsetting commitments with the expectation that a future change in the value of the hedging instrument will offset the change in the value of the asset (or liability).

Modified Equity

The method by which government business enterprises are accounted for in the Summary financial statements. The Government's investment, which is originally recorded at cost, is adjusted annually to include the net earnings/losses and other net equity changes of the enterprise/partnership without adjustment to conform with the accounting policies described in note 1 of the Summary financial statements. Inter-organizational balances and transactions are disclosed but not eliminated.

Net Debt

One of the two measures of a government's financial position (see accumulated surplus/deficit). Net debt is calculated as the difference between financial assets and liabilities.

Non-financial Asset

An asset that is acquired, constructed or developed and does not normally provide resources to discharge existing liabilities.

Glossary of Terms *(continued)*

Other Comprehensive Income/Loss (OCI)

OCI includes certain unrealized gains and losses of government business enterprises that are excluded from net income but recognized as a change in net debt and accumulated surplus/deficit during the period.

Pension Liability

An actuarial estimate of discounted future payments to be made to retirees under government pension plans, net of plan assets.

Premium/Discount

The amount by which the selling price of a security exceeds/is less than its par or face value.

Segment

A distinguishable activity or group of activities of a government for which it is appropriate to separately report financial information to help users of the financial statements identify the resources allocated to support the major activities of a government.

Summary Financial Statements (SFS)

The statements prepared to account for the full nature and extent of the financial activities of the Government. The SFS includes the financial activities of organizations controlled by the Government. These organizations are segregated into two classifications, government service organizations and government business enterprises, and are collectively referred to as the government reporting entity. Trusts administered by the Government are excluded from the government reporting entity.

Tangible Capital Asset

An asset with physical substance held by the Government that has an economic life extending beyond a year, is to be used on a continuing basis and is not for sale in the ordinary course of operations.

Transfer

A transfer of money from a government to an individual, an organization or another government for which the government making the transfer does not: receive any goods or services directly in return, as would occur in a purchase/sale transaction; expect to be repaid in the future, as would be expected in a loan; or expect a financial return, as would be expected in an investment. Major types of transfers include entitlements, transfers under shared cost agreements and grants.
