

Scott Livingstone, CEO Saskatchewan Health Authority

Scott Livingstone has a proven track record of operational success in both public and private health sector portfolios, including hospital and community pharmacy practice, health care informatics, social sector policy and executive leadership.

Since April 2010, Scott has worked as the President and Chief Executive Officer (CEO) of the Saskatchewan Cancer Agency (SCA). His leadership skills and dedication to excellence and continuous improvement has allowed the SCA to achieve its strategic priorities and move forward as a recognized leader in cancer control in the province.

Over the past seven years, Scott has played an active role in the evidence-based assessment of oncology drugs, oncology drug safety and the sustainability of cancer control. Scott has chaired both the National Steering Committee and the

Provincial Advisory Committee for the Pan Canadian Oncology Drug Review. Scott is also the current chair of the two national working groups examining the short and long-term sustainability of oncology drug funding. He has been passionate about leadership development across the organization, patient and staff safety and moving towards a more patient- and family-centered approach to cancer care in the province of Saskatchewan.

Prior to joining the Saskatchewan Cancer Agency, Scott was the CEO of the Saskatchewan Health Information Network (now eHealth Saskatchewan). Through this position he played a lead role in shaping health information technology developments in Saskatchewan.

Scott holds a Bachelor's of Science in Pharmacy Degree and a Master of Science in Clinical Pharmacy, both from the University of Saskatchewan. He has also completed a Hospital Pharmacy Residency Program and is a certified Lean Leader. Scott is a member of a number of professional organizations including the Institute of Corporate Directors and the Canadian College of Health Leaders.

Scott currently chairs and/or participates on a number of provincial and national boards representing Saskatchewan and the SCA in the areas of eHealth, shared services, evidence-based drug assessment and sustainability of the cancer control system.
